BAPTIST CHURCH NOTES

One of the most timely sermons and most appropriate for this age in which we are living was delivered last Sunday morning by the pastor, Rev. R. C. Smith. His subject was "Home life for the home-folks." It was based on Eph. 5:22-25 and Eph. 6:1-4. Rev. Smith made the remark that there were more homes now than ever. They are continually being built, but there is less real home life. He set forth the duties of every member of the home backing his statements with Scripture.

The text for the evening service was Rev. 22:11 and the pastor announced that in a way it would be a continuation of the morning sermon. His subject was "The making of a character." Among the many fine thoughts brought in his mes-

sage he said, "It is good to know, better to do, but best to be."

The T. E. L. class of the Baptist Sunday school with their teacher, Mrs. R. C. Smith, enjoyed a picnic at Cleveland Springs last Friday. Mrs. Smith, Mrs. George Pruett, Mrs. M. O. Proctor and others drove their cars and they report a very pleasant outing.

The superintendents of the several departments of the Sunday school are checking up to see what is lacking to reach the Advanced Standard. The efforts will be concentrated on the points lacking with a view of reaching the Advanced Standard in the near future. A new desk is being installed this week for the classification officer and the records and files will soon be in better condition.

Rev. Marion Blanton was present Sunday evening and read the Scripture lesson. He graduated at Wake Forest last term and is teaching this summer at Harris.

A series of meetings began at the local Presbyterian church on Monday evening. Rev. W. L. Latham, of Rutherfordton, is doing the preaching and Rev. Montgomery, the pastor, is directing the music. NOW ON DISPLAY

The New ESSEX "6" COACH

With All-Steel, Bolted and Riveted, Clear Vision Body
The Product of Essex' New \$10,000,000 Body Plant

\$795

F. O. B. Detroit Plus War Excise Tax

Standard Equipment Includes:

Automatic Windshield Cleaner, Rear View Mirror, Transmission Lock (built-in), Radiator Shut-off, Moto-Meter, Combination Scoop and Tail Light.

Many of these advantages you will recognize at a glance. But you will have higher appreciation of their meaning when you know that a plant of 18 acres which with equipment approximated a cost of \$10,000,000, was first built and that special machinery had to be designed, to make possible the New Coach your dealer is now showing.

It is all steel, bolted and riveted, and so rigid that squeaks, rattles and distortions, are as unlikely as in a steel building. Doors are so hung that a man may hang on an open door while the car is being driven over rough roads, without springing it out of true.

And it is so designed and constructed as to permit the use in a totally new manner of a high baked enamel, most lustrous and lasting finish.

There has been constant improvement in the chassis from the first Essex shipped. And only by the accumulation of the resources, the information, experience, and the skill that have resulted from the building of 350,000 Essex "Sixes" was it possible to create this car which we ask you to inspect and to drive as the best looking, best value, best Essex ever built.
