

De Luxe Models In 1928 Hudson Line

"VOGUE OF TOMORROW" IN DESIGN—EXCLUSIVE LINES AND MODERN STYLE FEATURED

Hudson Super-Six Landau Sedan

With nickled steel window sash, narrow steel pillars and the landau leather top material carried down to the body belt at the rear the Landau Sedan reflects smartly both speed and roomy spaciousness. This is one of the Hudson de luxe models.

In its new line of custom-built cars, presented for the 1928 season, the Hudson Motor Car Co., offers an innovation which will undoubtedly prove important. There are three of these models—the victoria, the 5-passenger landau sedan, and the 7-passenger sedan.

All these cars were designed for Hudson in Hollywood, Calif., by a firm which has specialized in special, exclusive bodies, none of which ever have been offered at less than \$5,500. A few months ago a number of these de luxe bodies were purchased by Hudson officials, and others, for their personal use. So different were they from models current at the time that Hudson determined on them as the basis for a special line of cars in the 127-inch chassis.

These custom bodies are built to

express what Hudson terms "the vogue of tomorrow." The whole contour of the car is designed to express fleetness and modern style with a sport motive. Color schemes and mouldings are more daring than in Hudson's usual models. The front window pillars are slender in outline, while the outer rim of the windshield is brightly nickle-plated. Similarly, the window supports at the top of the doors are unusually trim and are nickle-finished. This is said to improve vision from within the car and to assist an impression of smartness.

The rear quarters of these cars are covered with landau leather, which comes down from the top in an unbroken surface. Car interiors are fully and richly finished in de luxe style.

These cars are being manufactured

for Hudson in Amesbury, Mass., by a firm of custom builders whose total capacity has been contracted for by Hudson. The construction is of hand-hammered aluminum panels and selected hardwood. The use of aluminum instead of sheet steel permits the obtaining of distinctive and subtle body lines and saves the weight of one passenger.

Hudson's big production program at this time of the year is declared the result of the reception of the new Hudson-Essex line. From reports the country over, this is said to have been the most favorable of any line of cars in the company's history, despite generally cold weather. In Detroit, since the introduction of the cars, retail sales have exceeded 100 cars a day—or about triple the normal rate.

ANOTHER DAY

O' early morning sun so bright,
You come to us from out the night;
You bring to us a bright new day,
That starts us happily on our way.

O' early morning sun so dear,
You bring the tidings of good cheer;
You keep our souls both pure and clean,
Like a golden ray from your sun-beam.

—Lloyd Mauney

The Cream of the Tobacco Crop

"Luckies never cut my wind" says Billy Burch, Captain of N. Y. Americans' Hockey Team

"I can't afford to take any chances with my physical condition. That's why I stick to Luckies. In addition to the pleasure I get from their fine flavor, they have never cut my wind to any noticeable degree. Finally, I never suffer with sudden coughing which might be very dangerous for me when there's a scramble on the ice."
