

A break in the Colorado River levees in Mexico, June, 1926, when Imperial Valley, in California, was again threatened for a time with inundation. American farmers maintain more than 30 miles of these levees in this foreign country to protect the property and lives of their 65,000 citizens. A total of \$8,000,000 has been expended in this work without aid from the Federal government. They are now asking Congress to pass the Swing Johnson bill, which will give them flood protection and independence from Mexico through the construction of the Boulder Dam and All American Canal. Payment for the entire project will be provided in advance through the sale of power and water. The total cost, including dam, canal, power plant and interest, during construction, is \$125,000,000, which can be paid off within twenty-five years.

Arrangements have been completed by which the Cool Springs Baseball team will meet the Wake Forest Freshmen team on the Forest City ground on Easter Monday. This should prove one of the most interesting games of the season for the local fans. Gillespie, star catcher for the championship Shelby High school team, and Hord of last year's Kings Mountain team will be with the Baby Deacons when they trot out on the local diamond. The locals will have no easy assignment for the game on April 9, but those who have seen the games played so far feel that with an even break the Wake Forest Freshies will go back with the little end of the score.
