

## TOWNSHIP SCHOOL WORK NOW MOVING ALONG SMOOTHLY

### First Grade Can Take Care of A Few More Pupils— Compulsory School Law

The parents in Cool Springs Township Schools who have children nearer six than five years of age, see Mr. A. C. Finch this week if you want your children to go to school this session. It will be possible for the first grade to take care of a few more pupils. All pupils who are six years old now are urged to begin school at once in order to be enrolled before the grade is filled. The first grade will not take pupils under seven years of age after a few more days. It is necessary for first grade pupils to begin at once if they intend to go to school this year.

All pupils between the ages of seven and fourteen in Cool Springs Township who have not begun school by Monday, September 17th, will be indicted for violating the compulsory school law. All parents in the township are requested to see the following principals this week if you have a valid reason for not sending your children to school: Eugene Allison, Alexander School; Morgan Cooper, Bostic School; A. C. Finch, Forest City Grammar School; C. C. Erwin, Cool Springs High School; Rex Long,

Mt. Pleasant School; Annie S. Harris, Pleasant Grove.

The schools in the township have a better beginning this year than they ever have had. The enrollment is larger and the pupils are more interested in their work this year than any former year.

Last year the high school won first place in French. First place in agriculture and baseball. It is unusual for a small High School to win one first place in a state contest. According to the law of averages Cool Springs High School is not due to win another first place in over a hundred years. However, the boys and girls are a bit selfish when it comes to winning first prizes and expect to win again before their time according to averages.

Forest City Grammar School was placed on the A-1 list last year by the state department of education. Alexander school will be accredited this year. The other grammar schools in the township are doing standard work but they do not have the required number of teachers to be accredited. It requires at least seven teachers for a school to become standard. This is only one of the many requirements for a standard school.

A number of pupils from the grammar schools entered the National Highway Safety Essay contest last year. Dorothy Moore of the Forest City Grammar School won third prize, consisting of \$5.00, and a bronze medal.

The football squad is looking good now. Coach Seitz has over two teams out each day. Most of the material this year is green but all the fans

know that Coach Seitz has been working hard the past week seasoning the material.

## FLOYD'S CREEK NEWS

Forest City, R-1, Sept. 11.—Mr. J. M. Mauney who had the misfortune to get his home destroyed by fire last May is erecting a nice bungalow at the same place, which will add greatly to the appearance of our community when completed.

Misses Ethel and Bertha White spent the week end with their cousin, Miss O'lema Putnam, at Henrietta.

Mr. and Mrs. Grover Scruggs and little daughter, spent Saturday night with Mr. and Mrs. Frank Green.

Mr. and Mrs. W. J. Edwards spent Saturday night at Mr. Elisha Davidson's.

Mr. Gillet Hamrick and family, of Sharon, and Mr. and Mrs. D. E. White were the dinner guests of Mr. and Mrs. J. C. Powell Sunday.

Mr. F. E. White and family spent Sunday at Henrietta, the guests of Mr. Will Putnam and family.

Mrs. J. W. Honeycutt had been on the sick list for a few days, but is improving, we are glad to note.

Mr. and Mrs. John Tate spent the week at Shelby.

Mr. and Mrs. Oscar White and little daughter, Lucile spent a few days last week with Mrs. White's parents, Mr. and Mrs. Elliott, at Uree.

Mr. and Mrs. Albert Toney, of Henrietta, spent Sunday at Mr. A. W. Tate's.

William C. Durant offers \$25,000 "for the best and most practical plan to make the eighteenth amendment effective." The best way would be to jail all the bootleggers and their customers, and then put all those who are left within one of the smaller states where they can be closely watched.

Three young men who set out for Spain in a thirty-two foot boat returned after going a short way because their water supply went bad. Well, they could have bathed in the ocean.

Do you  
Advertise Absence?

ACCUMULATED milk bottles, stacked papers, drawn shades, these are some of the ways that absence from home is advertised. House-breakers are quick to note and take advantage!

need  
this oilier oil  
because  
it's a tougher  
more durable  
oil  
that's  
specially processed  
to stand the gaff  
and do its job  
under all  
conditions

"STANDARD"

overcomes friction at higher speeds

A special friction machine is used in Standard Oil Co. of New Jersey laboratories to study the ability of different lubricating oils to overcome friction. It is operated with different quantities of oil, at various speeds, and with varying loads.

In one series of tests, the weight of the load was kept at 175 lbs. per square inch. The quantity of oil supplied was 12 drops each minute. With "Standard" Motor Oil the machine operated perfectly at 700 revolutions per minute. With other motor oils used by motorists today, the machine became over-heated and the oil failed at from 300 to 400 revolutions per minute.

How much do you spend for gasoline? How much for tires? When did your battery last have water? The "Standard" Motor Record will tell you. Ask your "Standard" Service Station or dealer for a free copy.

# "STANDARD" MOTOR OIL

"Standard" Greases, Transmission Oil and Gear Compound are made with the same care as "Standard" motor fuels and motor oils.

## It Pays a Double Profit to Lime Small Grain

THE N. C. DEPT. OF AGRICULTURE SAYS:

"Crop yields are enormously increased and cost of production correspondingly lowered by using pulverized limestone in combination with acid phosphate or other commercial fertilizer.

At one experiment station limestone in combination with fertilizer under the wheat crop gave an increase of an average of \$18.23 an acre more than was secured with the fertilizer without the lime.

At another station pulverized limestone, in combination with acid phosphate, nitrogen, and potash, increased the clover hay crop six times what was secured from the fertilizer without the lime."

Any small grain crop that has been LIMED and fertilized prior to, or when seeded, will develop a much better root system and will go through Winter freezes far better than a crop not limed or fertilized.

THE INCREASE IN THE LEGUME CROP THAT MAY FOLLOW WILL USUALLY PAY THE COST OF THE LIMING.

MASCOT DOLOMITIC LIMESTONE is Carbonate of Calcium and Carbonate of Magnesia—both essential plant foods required by all grain crops. The application of MASCOT may be made in connection with Super-Phosphate or any complete fertilizer at one effort.

LEAVE A LAND THROUGH THE FIELD THE WIDTH OF A CORN ROW, UNLIMED, BUT FERTILIZED, FOR COMPARISON.

THE UNIFORM FINENESS OF MASCOT INSURES DEPENDABLE RESULTS.

"MONEY SPENT FOR LIME AND LEGUMES IS THE SAFEST INVESTMENT A FARMER CAN MAKE."
