WILL ROGERS SAYS:

If all the charges that has been made in this campaign in regard to both candidates were laid end to end it would take 'em over two hours to pass a given point.

If all the denials were heaped in a pile an aviator couldn't fly over them. It is a funny thing about a denial. It takes twice as many words to deny it as it did to make it.

While Smith was heaving charges at him, Hoover just pulled down the blinds and shut the windows and started communing with Work. Through close association with Coolidge he has become practically speechless. There is nothing gets you quite so sore as to have somebody ignore you. Al is asking questions but he is not even getting a minority report on them.

MR. W. L. HORN RECEIVES PLANS FOR NEW THEATRE

Expects To Build Handsome New Structure Adjoining His Property on Main Street

Mr. W. L. Horn has received complete plans for his proposed new theatre and informs The Courier that as soon as a lot of preliminary works is disposed of, he will begin the erection of a handsome new theatre building adjoining his property on Main street, opposite The Courier office.

Mr. C. K. Howell, noted architect of Atlanta, Ga., was here last weekend and left complete sets of plans with Mr. Horn, outlining in full detail every item in the building of one of the handsomest theatre buildings in the state. The elaborate set contains thirteen large sheets of blue prints and sixty-seven sheets of specifications for the contractor. The proposed new theatre is to have a frontage of sixty feet on Main street, two stories high, and of the handsome new material known as "Nu Brik." Two storerooms and a handsome arcade compose the entrance, while the theatre proper will extend eastward, covering a large area. The plans call for every modern convenience, with an elaborate equipment throughout. Elegant waiting rooms, luxuriously fitted, modern heating and ventilating systems, acoustics of the very highest type and wired for sound. The wiring and acoustics are planned with the idea of installing the Vitaphone or any other modern amusement device which may be desired.

The theatre will seat over 1,000 and is to be bowl shaped, making it possible for every patron to see the stage or screen, from every seat, from the same angle and also making it possible for a small child to see clearly, even with a tall person sitting in front of him.

The stage is to be twenty-one feet deep, with an orchestra pit large enough to accommodate a fifteen piece orchestra.

Mr. Horn is a staunch believer in Forest City and its future and says he is going to spare no expense in the erection of his new theatre, making it, when completed, one of the finest in this section of the state. He says the actual work of construction will begin as soon as he disposes of the mass of detail necessary to the beginning of a building of this magnitude.

Mr. T. R. Padgett informs The Courier that he will build a handsome business house on his lot adjoining Mr. Horn, but may delay work on this project until the spring.
