**ELLENBORO STUDENTS WILL TREAT FARMERS' WHEAT**

in October have an advantage over those planted in November or December and generally make larger yields. The crop may be planted in cotton middles before the seed cotton is picked."

But planted in furrows 12 to 15 inches apart with the ordinary shovel plow running four to six inches deep, oats will give best results, states Mr. Hudson. The seed should be covered about one inch deep in this furrow and plenty of seed used. The furrow will gradually be filled by the freezes and the oats will not be pushed from the ground as when sown broadcast.

Mr. Hudson suggests planting from 12 to 15 pounds per acre of hairy vetch along with the oats for purposes of soil improvement. This, he said, will not decrease the oat yield.

Anson County farmers have developed a system of planting oats and barley, one and one-half bushels each, per acre, to assure a harvest. If the oats are killed, the barley will stand and so a hay crop will be secured. By the addition of vetch to this mixture a sure and profitable crop is obtained. But the main thing now, states Mr. Hudson, is to get the oats planted before November first, if possible.

Radio concerts and programs are a part of each evening meeting held by farmers of Macon County. The county agent has a new receiving set with the aerial rigged up over his official truck.

The only college game in this section this season.

Bostic, R-4, Oct. 23.—Mr. Deward Houser, only a lad nearing his 15th birthday, went squirrel hunting recently and shot six times, killing a squirrel each time. Mr. Houser is excellent to be so young.

Mrs. Roy Melton and two children, of High Point, spent last week visiting her parents, Mr. and Mrs. J. E. Towery and Mr. and Mrs. J. D. Melton.

Miss Virgie Beaty, of Spindale, spent last week with her grand parents, Mr. and Mrs. J. D. Houser.

Mr. Jack Anderson, of Alexander, spent the week end with his parents, Mr. and Mrs. J. S. Anderson.

Mr. and Mrs. John Grayson and family had as their guests Sunday, Mr. Gray Grayson and family, Messrs. Ernest and Clyde McCurry, Lee Toney, Mr. and Mrs. Dan Melton and daughters, Misses Nannie and Mary.

Mr. Bedford Beaty and family spent Saturday night with Mr. Beaty's mother, Mrs. John Yelton.

Miss Inez Houser had as her guests Sunday, Miss Lizzie Beaty and Mr. "Sug" Hensley of Spindale.

Mr. Clay Whisnant of Hendersonville, spent Saturday night with Mr. John Yelton.

Mr. and Mrs. Eli Melton had as their guests Sunday Mr. and Mrs. Jethro Rollins and little daughter Jean, Mr. "Bill" Grayson and family.

Mr. Guy Melton visited Messrs. Bery and Ralph Rollins Sunday.

Mr. Fred Houser has gone to Asheville to get a position.

Editor and Mrs. Clarence Griffin and small son, Donald, and Mrs. W. M. Clay, of Spindale, spent Sunday afternoon with Mr. Griffin's cousin, Mrs. Jethro Rollins and Mr. Rollins.

Yadkin County is turning to Guernsey cattle. Community effort in the purchase of pure bred bulls is the new movement recently begun.

Lime legumes for soil improvement and for hay and forage is the fall program of work in Davidson County.

Miss Laura Howard, home demonstration agent, and Mr. F. E. Patton, county agent, are putting on a Rutherford county exhibit in Ivy's Department Store, Charlotte, this week. This exhibit consists of agricultural crops, fruit and truck produce, home industries and educational feature exhibits. This exhibit is for this week, on occasion of Ivy's Golden Harvest Sale. Six other counties will exhibit at this sale.

**COUNTY WELFARE COMMITTEE WILL MEET THURSDAY**

The County Welfare Board will meet with Mrs. Moss, County Welfare Officer, at the Courthouse, Thursday afternoon at 4 o'clock. Mrs. J. R. Moore, Mrs. C. J. Gold and Rev. G. R. Gillespie constitute the board.

**ELLENBORO FARMERS GET CARLOAD LIME**

Ellenboro, Oct. 23.—That Ellenboro farmers are preparing for a more profitable agriculture has been recently demonstrated by the ordering of a carload of lime which arrived in Ellenboro last Saturday. The lime was ordered and distributed to the farmers at a very low cost by the agricultural department of the school working through the teacher of agriculture.

Lime is very important for many of our legume crops such as clovers, cowpeas, soybeans and peanuts. Then, the yields of corn and small grains are greatly increased by the use of lime. Lime has been demonstrated to double the yield of corn at some of our experimental stations. A fertile soil is the first essential for a prosperous agriculture and it is believed that Ellenboro farmers are taking steps in the right direction by applying lime to their soils.

The carload which recently came was distributed to ten farmers in the community and an equal number got lime from a car which came this past Spring.

Ellenboro, Oct. 23.—The Ellenboro agricultural students, directed by their teacher, will treat local farmers' wheat against smut at the school next week as a part of their course in agriculture. The new copper carbonate treatment will be used for which no charge will be made other than the cost of the material which should not exceed three cents per bushel.

Copper carbonate has been used for the past few years to treat seed wheat for smut and has been found to be just as effective in controlling smut as bluestone. It is a dry treatment and has many advantages over the bluestone method. Wheat may be treated a month before the time of sowing since the seeds are not dampened during the treatment.

A barrel suitable for making the treatment has been prepared in the school shop by the students of agriculture, and the agricultural department of the school is ready to serve the farmers of the community while the boys learn. Fifty pounds of the copper carbonate has been ordered by the department of the school.

Farmers who may wish to get their seed are urged to see the agricultural teacher and make a date to get the work done next week.

**OPEN FURROW SOWING BEST WITH OATS**

Raleigh, Oct. 22.—Oats planted early by the open-furrow method will not be severely winter-killed and will produce good yields of valuable hay and grain.

"We have reports that a number of farmers want to plant oats this fall to supply forage and grain next spring. Much of the corn, fodder, hay and other forage were severely damaged by the wet weather of early fall and it is necessary that much small grain and legumes be planted to replace this feed," says C. R. Hudson, farm demonstration worker of State College. "Planting oats early, say in October, and using the open furrow method of planting will greatly reduce winter-killing. Oats planted

**Our Special Values in New Fall Frocks and Coats**

The Fall Frocks displayed in our special Fall showing must be seen to be appreciated . . . they are designed for the discriminating woman . . . They are in "the latest manner" and in all the wanted colors and styles. You can make great savings at this shop while getting just the frock you want.
