DIZZY Lost Appetite

Mr. M. F. Fink, of Harrisburg, N. C., says: "It must have been fully twenty-five years ago that I began taking Black-Draught regularly."

"I was in town one day, and while talking to a friend I stooped over to pick up something. When I straightened up, I felt dizzy. I spoke to him about this and how I had not felt like eating."

"My friend told me to take some Black-Draught. I knew my mother had used it, and so I bought a package. When I got home, I took a good, big dose, and the next night, another. In a few days I felt much better."

"A good many times I have had this dizziness and a bad taste in my mouth, or headaches, and then I take Black-Draught and get better. I do not have to take it very often. We buy from five to seven packages a year." Try it!

Two blades of grass

With the knowledge that it can prosper only as the people it serves prosper, the Southern Railway System is working along practical lines for the upbuilding of the South's industry and agriculture.

The Southern Railway Development Service is maintained for that purpose. It gathers accurate data concerning industrial opportunities throughout the South and is constantly presenting the advantages of Southern location to men who control or influence the establishment of manufacturing plants.

In the past five years 1200 new industrial plants, with a total capital investment of approximately seven hundred million dollars, have been located along the lines of the Southern, giving em-

ployment to many thousands, adding substantially to Southern wealth.

The Southern's Development Service also is actively engaged in promoting the welfare of the agricultural South, studying farm conditions, encouraging diversified and more profitable crops, the introduction of pure blooded livestock and poultry, the establishment of creameries and cheese and milk condensing plants for the utilization of dairy products. By reason of the interest thus stimulated, many farmers are making more profit per acre.

Alive to its opportunities, the South strides swiftly ahead. And the Southern, whose destiny is forever linked with the South, makes ready for the greater demands which its service must fulfill as two blades of grass, two ears of corn, two factories spring up where before there was only one.

Since 1920 the Southern has invested \$160,000,000 in new equipment and other improvements. Spent largely in the South, this money has provided a strong stimulus to Southern prosperity.
