Rear Axle Noises

A grind or knock in the rear end should not be ignored. A defect there can loosen up the whole car - ruin it, in fact. Continued pounding may pull the differential apart, loosen the axles, and involve you in a crash with another car or a pedestrian.

No matter how careful you are such crashes are likely to occur. Insurance will make good your loss, both for damage to your car and to the person or property of others if involved in a mixup.
