Miss Barbara Osborne, home economics teacher, will teach, during the week, the students of agriculture the importance of vegetables in the human diet and of the importance of having a home garden to be followed by instructions in table manners. A. B. Bushong, agricultural teacher for the school will have the home economic girls for his students whom he will teach lessons on gardening. The importance of the garden, garden soils, adaptable varieties of vegetables to plant, planting and cultural information, and common diseases and insects with control methods for same are some

of the phases of the subject to be under discussion.

Two essay contests are now being held in the school under Professor Curtis Price who heads the school.
