## 75,000,000 HAIR NETS FOR U. S. WOMEN

From the day of the caveman, when it is reputed he thought nothing of dragging his mate by her hair, woman has devoted much time, much energy and much money in beautifying what has been aptly termed her "crowning glory." Today the well-dressed woman finds that there is nothing in the world that will keep her hair from becoming undressed, excepting a hairnet. There is no reason for untidy hair. The hairnet of today is made of human hair, knotted together to conform to the shape of the head. The color and texture of the hair used in the making of these hairnets will match the color and texture of the hair of the wearer, so that it is almost invisible. It is estimated that over one thousand meshes are knotted together in one single hairnet and as each hairnet is made by hand, one can readily see how nimble must be the fingers employed in the making of each net. About 50,000 American girls are employed in this task of making the 75,000,000 nets used by the women of this country every year. Hairnets are as necessary a part of the well-groomed woman's toilette as is the dress she wears. No woman who has any consideration for her personal appearance would think of being without one. The hairnet industry is one of the important ones in the woman's world. A rigid examination of the hair is made before it is passed and approved as suitable for making the hairnet. The photo shows how the completed hairnet is placed on the head conformers, where possible defects can be detected. Each hairnet must conform to the head before it is finally packed and shipped to Woolworth stores all over the country. (Herbert Photos, New York, N. Y.)

## For Forest City Merchants Only

Being one of a series of chats with Forest City businessmen in which they are told how they can increase their volume of sales.

## ATTRACTING FOREST CITY PEOPLE TO FOREST CITY STORES

HAVE you ever watched some of Forest City citizens go riding off away from Forest City to do their shopping? Have you ever watched them come riding back, loaded up with supplies? Have you ever, while you watched, wondered why they passed up your stores right here in Forest City?

Sure, you have. So have all of us, whose first and deepest interest is in Forest City.

Yes, we've watched. And we've wondered. And we've felt badly about the fact that these good citizens of Forest City chose to shop outside of Forest City.

It isn't that you merchants of Forest City don't offer shopping means just as good as those of the stores in the nearby bigger towns. No, that's not at all the reason. Your merchandise is just as good. Your service, too, is every bit as good. Maybe better.

One reason is that the nearby bigger towns do a better job of attracting some of Forest City's citizens to their stores.

Your job, then, you merchants of Forest City, is to do some attracting of your own.

Puzzled wondering won't do it. Neither will mere talk. But advertising will. Not only your own advertising. But the advertising

of the manufacturers whose goods you try to sell, as well.

Your immediate job, as you can well see, is to get into your local, home newspaper the advertising aid of the manufacturers whose goods are on your shelves. And you can help get this aid easily enough.

After all merchandise can be sold only in ratio to the amount of selling effort expended. Advertising is selling effort. It performs all the functions of selling but that of supplying the personality which the merchant himself does.

One of these days, maybe today, you'll be visited by the salesmen of the manufacturers whose goods you stock. Whenever they come, interest them in Forest City. Interest them so that they stay interested. Interest them so that they'll want to interest their sales managers.

Once you've injected this interest into the salesmen, it will spread. And spreading it will prove extremely help-

ful in bringing into your local, home newspaper the advertising support of the manufacturers whose interest it is that you sell more of their goods.

Once you've got this advertising support, you'll have a decided advantage in attracting Forest City people to Forest City stores.

THIS newspaper has joined small town newspapers all over the country in a nationwide campaign to convince national advertisers that they can best assist small town merchants by advertising in the local, home town newspapers of the small town merchants.

You need the advertising aid of the manufacturers whose goods you stock—urge their salesmen to recommend your local home newspaper.
