BAILEY HEARD AT GASTONIA

Blames Republicans for Letting People Play the Stock Markets.

Gastonia, Sept. 29.—The continued importance of the Republican party and of President Herbert Hoover and their failure to keep their campaign pledges was further assailed here today by Josiah William Bailey, Democratic candidate for the United States senate, as hundreds of Gaston county citizens applauded.

Mr. Bailey took up the record of President Hoover and the Republican party in detail, showed the depressing influence which the Republican policies of Mr. Hoover and the Republican party have had upon both business and agriculture, especially in the south, and charged that the Republican leaders were directly responsible for the stock market crash of a year ago by permitting the concentration of money in Wall Street for speculation purposes instead of seeing that it was used in legitimate business.

The Republican tariff has virtually destroyed the foreign markets for American made goods, Mr. Bailey declared, with the result that this country is no longer able to export its surplus, thus causing depressed prices for agricultural products and unemployment in the industrial field. The federal farm board has failed utterly to improve the status of the farmers, and farm prices have been dropping steadily ever since it was created, Mr. Bailey pointed out.

In summing up the situation, especially with regard to President Hoover, Mr. Bailey said:

"Mr. Hoover knows he has not made good. The Republican party knows that it has utterly failed. And they both know why. There is a reason. It is not the fault of the farmer, as the Republicans suggest. It is not the fault of the worker, as they intimate. They know that the Republican party has passed into the hands of selfish and predatory interests. They know that Roosevelt knew this in 1912, and that because he sought to rescue his party from these interests he was flagrantly cheated of the nomination for president and thrown overboard. They know how Mr. Harding was nominated and what happened. They know that from that day to this the Republican party has proceeded upon the simple plan of selling the favors and privileges of the government for campaign contributions. It has been bought and it is owned by those who bought it. They know that they cannot enact a tariff bill for protection; they know that they must under the guise of protection work out their tariff measures in the interest of privilege.

"The Republican party is a party of which the people have lost control. There are always enough irresponsible delegates in the South to be had for money to swing any Republican national convention. The Republican machine always gets them—and it always nominates its candidate. That is about all that the Republican party in most of the southern states exists for. And this is what the president's southern political representative, Horace Mann, recently said of it. He spoke of them as 'interlopers, carpet-baggers and hijackers!' In this he brings the 1912 statement of President Taft up to date—that famous Greensboro statement:

"The simple truth is that the Republican party is so controlled that measures of popular relief are no longer possible by means of it. That is why the present administration has failed. It knew where the trouble was; it knew that, unless there should be relief, there would be grave depression; it knew and named the remedy; but when it was given the power to apply it, it failed because, constituted as it was, it could not apply it. No man can 'serve two masters,' was said of old. The political party that depends upon predatory interests for financial support can never serve the people."
