

DRS. BOSTIC AND BOSTIC.

A Medical Alliance of Two Generations Practicing Their Profession Here in Forest City; the Elder Member Cited for His Many Works as a Deep Student of His Profession.

It should be an extreme pleasure and a feeling of entire satisfaction to the people of this section of North Carolina, to know that we have here in Forest City one of the noted physicians of this section, and associated with him his son, who is also becoming well and favorably known as a deep student of medicine and a surgeon of note.

William Chivous Bostic, Sr., is a son of the late George T. and Margaret Jane (Goode) Bostic, a most substantial citizen of Bostic, this county, and after whom the town of Bostic was named, attended the public schools of that section and later completed his literary course at Rutherford college in 1896. At one time Dr. Bostic's father was a man of means, but diver financial difficulties arose in his life which very much depleted his fortunes, and it was necessary for our subject to forego many of the pleasures of life in his effort to secure an education and profession, thus it necessitated him to act as custodian while attending Grant University, Chattanooga, Tenn., in order that he could aid in paying his tuition, but from which institution he graduated in 1899, and in 1905 he received a post-medical degree from the North Carolina Medical college, studying internal medicine and diseases of children. From 1902-03 Dr. Bostic practiced his profession in Tennessee coming to Forest City in 1903 and has since practiced here and is a physician and surgeon of note and held in high regard professionally, socially and otherwise. When Dr. Bostic first came to Forest City he associated himself with the late Dr. G. E. Young, and this partnership existed for a period of twelve years or until the death of Dr. Young.

Dr. William Chivous Bostic, Sr., is nationally known as one of the contributors to present-day medical science, having wrote a thesis on "A Plan to Supply Physicians in the Rural Sections of the State," which he read before the state medical association and which has received favorable recognition from many medical colleges and some of the most noted physicians throughout the land, including the Duke University and the Duke endowment, and from the president of the American Medical association. The plan is at present being methodically studied by the American Medical Association and by the department of health in the state of Massachusetts, and has received favorable comment from many of the leading medical journals throughout the country. He has become internationally known through his ardent efforts in behalf of medical science and for the interest he takes in humanity, for aside from the above he has written other valuable works on scarlet fever, catarrhal jaundice, influenza and pellagra.

Dr. William Bostic, Sr., in 1900, Married Miss Mossie Arledge, daughter of J. P. and Elizabeth (Rucker)

Arledge, of Columbus, N. C. To them were born the following children; Margaret, now wife of P. O. Purser of Monroe, N. C.; Dr. William Chivous Bostic, Jr., now associated with his father in the practice of their profession; Dorothy, who taught school last year in Lexington, N. C., but who will do similar work here in Forest City the coming term; Kenneth, youngest son who is a sophomore at Mars Hill college.

Dr. William Chivous Bostic, Jr., was born in Forest City, North Carolina, September 17, 1903, and has intently followed in the footsteps of his noted father. After attending the public schools he entered Mars Hill and Wake Forest colleges and graduated with the degree of A. B. in the class of 1924. While in school there he associated himself with the Savosier chemical society, the William Edgar Medical society, Cappa Alpha fraternity. Graduating in medicine in 1926 from the University of Pennsylvania, while there Dr. Bostic associated himself in membership with the Me Sig Me Medical fraternity, and the D. Hayes Agnew surgical society, after which he became an interne in a Wheeling, West Virginia hospital.

In 1927 Dr. Bostic, Jr., associated himself with his father in the practice of his profession here in Forest City, and since that time the father and son, both adepts in their chosen profession have continued medical and surgical practice with wonderful success. Dr. Bostic, Jr., is a member of the county and state medical society and of the American Medical association; local surgeon for the Southern and Clinchfield railroads, as is also his father. In 1930 he was one of two delegates from North Carolina to the United States pharmacopoeal convention, which meets every ten years for a revision of their code, and which on this occasion met at Washington, D. C.; is president of the Rutherford county medical association for 1931; married October 20, 1928, to Elizabeth Van Cleave Stevens, daughter of Thadus J., and Johnny (Garbett) Stevens of Carrolton, Ga., and to them a son was born July 2, 1930, and he has been named William Chivous Bostic, III, of whom "Granddad Bostic" refers to fondly as his third son.

Thus it is that the good people of Forest City and Rutherford county, and this section of North Carolina are fortunate in having in their midst such highly skilled gentlemen in the medical and surgical profession, and in this review of the professional, commercial and industrial life of this section we feel that it is but fair to these gentlemen to let every reader know of their professional accomplishments and the benefit they have been not only to their profession, but to the world, for the manifest interest they have taken, especially Dr. Bostic, Sr., in giving to the world so many valuable works that are helpful to all of mankind.

COOL SPRINGS SCHOOLS
HAD RECORD YEAR

Continued From First Page)

boys and girls had not been clothed and fed properly perhaps cold and disease would have prevented their attending school regularly. The association also gave buttons for perfect attendance and gave prizes to the boys and girls who stayed on the honor roll all during the session. The association helped to create a better spirit of cooperation between teachers and parents. This is the prime purpose of the association. The opportunity of the parents to know the teachers is limited. The Parent-Teacher association makes it possible for the parents to meet the teachers and work out certain problems together. It is hoped that all the patrons in the system will become members of the P-T. A.

Next week a list of boys and girls who made perfect attendance during the year will be published. Also the pupils who received gold medals for

five years attendance. Suffice it to say that fifteen received gold medals and around 200 received perfect attendance certificates. 210 attended school 180 days last session. A few of this number were tardy and did not receive the certificates.

SPINDALE WATER SUPPLY
PUREST IN STATE

Spindale, June 2.—Within recent days unfounded rumors have been floating about town as to the impurity of the Spindale water supply. According to a report received this week from the state laboratories, Spindale has the purest water supply in North Carolina. An analysis of the water shows no impurities or pollution whatsoever.

Maybe the reason the city dwellers are moving into the rural sections is because they have been reading the big bankers, who declare that there is "plenty of money in the country."

Druggists Annual
Banquet June 3

Rutherfordton, June 1.—The annual banquet of the Rutherford County Druggists Association will be held at the Isothermal hotel Wednesday, June 3rd beginning at 7 p. m. Every druggist in Rutherford county as well as a number of wholesale druggists from Charlotte, Shelby, Spartanburg, Asheville and other places are expected to attend. About 50 druggists and ladies will be present. A most unique and interesting program is being arranged. There will be two short speeches, while a radio entertainer will appear on the program. There will be stunts, contests and prizes for the ladies. It will be a gala occasion.

Dr. O. J. Mooneyham of Henrietta, will be toastmaster. Officers of the association are: President, Mr. J. Gomer Davis, Spindale; sec-

retary-treasurer, B. P. Scruggs, Rutherfordton.

Every drug store in the county will close that night at 7 o'clock, so all the employees can attend this annual banquet and get together meeting, which is always looked forward to with much interest.

The Goforth Transfer Company recently moved the household effects of Supt. Lockman, of Caroleen, to Jasper, Ala., getting through on time and with everything intact. Try them for moving.

So far as we have been able to observe the modern flappers are able to take care of themselves, and at the same time, two or three times as many men.

Every once in a while a newspaper editor finds a sensible subscriber, for example, the one that wrote us last week that The Courier was better than ever.

NATIONAL COTTON WEEK

THIS THE FIRST WEEK IN JUNE has been designated as "National Cotton Week". Not only is this true as to the U. S. A., but England and Canada, as well, join in this glorification of "King Cotton."

IT IS HIGH TIME that the 120,000,000 people of our country pay due homage to one of the oldest and chief agricultural products of our country. There was a time when raw cotton was the chief item of trade between this country and others. The one Cash Crop.

THIS COUNTRY seems to have gone Silk and Rayon mad. A record single purchase of raw silk was made in the New York market, some weeks ago, involving 25,000 bales—value: \$8,000,000. Millions of our farmers and mill operators are dependent upon the welfare of the cotton industry.

WE DESIRE TO DO OUR BIT by calling the above to your attention and making special display of all cotton showings that we have. We have also devoted our entire window space to the showing of cotton. Last week we bought in all cotton merchandise the largest single order that has been given by this store. We take it for granted that you, too, are going to do your bit.

COME IN and see our display of cotton showings.

Special For National Cotton Week
Summer House Frocks

There is every type in the group, from sheer printed batistes and dimities to tailored high-count prints guaranteed vat-dye colors.

"THE PAINTED DESERT"
AT HORN'S FRI.-SAT.

"The Painted Desert," featuring Helen Twelvrees and William Farnum, will be the attraction at Horn's Friday and Saturday of this week. This is a mighty melodrama of real America—the grandeur of the old West—pictured in the great silent places in the land of the crimson mesa, the emerald canyon and the indigo sky. A picture that is a living canvas of action, drama and romance, with the most beautiful settings ever shown on the screen.

Snake head and Gee Whizz Teeth 25c. Farmers Hardware Co.
