A WINTER COAT

not only keeps cold out, but conserves body-warmth; body-fat serves the same purpose, it enables us to resist unsettled elements and serves as the great source of our body-heat. Greater body-warmth means richer blood, more fat, not obesity but fat which the body consumes for warmth, vitality, resistance-power—as a furnace consumes coal for heat—**Scott's Emulsion** does this.

A teaspoonful after each meal makes body-warmth—healthy, active blood—sharpen the appetite and makes all good food do good.

It drives out and keeps out colds by raising endurance-power and creating strength.

Reject substitutes for **SCOTT'S**.
