THE COUNTY ROAD PROPOSITION

The proposed county road law found on another page of this issue is only one of several likely to be submitted at the road meeting advertised to be held in Jackson August 18th. It was our intention to publish all the proposals in one issue, but this we could not do.

We understand one proposition is to incorporate only seventy-five or a hundred miles in the county system and leave the others for the townships to keep up, it being claimed that in a county system the roads serving the smaller communities would receive no attention, and for proof of this reference is being made to how they fared when all the roads of the county were under a county system prior to 1911.

The question of raising the necessary funds to build and maintain county roads is being freely discussed, some in the townships where bonds have been issued contend that any county system to be adopted should provide for the absorption of the township bonds already issued, contending that it would be unfair to the townships that have already taxed themselves and built roads to now be equally taxed to build in townships that have not been taxed for this purpose. We fear this is the rock that will wreck any proposal that may come up, and we are referring to it at this time that the matter may be fully discussed before the August meeting.

PRACTICAL HEALTH WORK

Rockefeller money is being spent in Northampton in practical health work that may mean much for the betterment of a large part of our population as well as of material benefit to the whole country from the discoveries made and the lessons learned here.

As is well known, John D. Rockefeller has given a large amount of money for research work and the study of diseases, and some time ago a branch office was opened at Edenton from which work will be directed in the study of malaria in Eastern Carolina. Dr. F. M. Boyd is director in charge at Edenton and among other places he has selected a place in Oconeechee Neck, on the Roanoke in Northampton for field study, and has sent Dr. J. W. Williams and Messrs L. T. Coggshead and W. T. Henery who will be located here for quite a while making a survey and studying malaria. Dr. F. M. Russell, of New York, director of the International Health Board of the Rockefeller Foundation spent a few days in the county last week. The work is being carried on on a part of the Ransom and Bu gwyn plantations in Oconeechee Neck, and the location is said to be ideal for the purposes of the study. These are among the richest farm lands in the country, but the malaria prevalent there in the summer and fall has kept white people away, the native colored population being more or less immune to the dreaded malaria, which seems to be more prevalent on the large river plantations.

When the French attempted to dig a canal across the Isthmus of

Panama they failed on account of malaria. The Americans followed them some years later and made the Canal zone a healthy place. If malaria can be conquered in the tropics it can be banished or controlled in the fine climate of North Carolina.

Card of Thanks

We wish to express to our neighbors and friends our sincere thanks and heartfelt appreciation for the many kindnesses shown to our loved husband and father, M. D. Story, during his last sickness and death. Our physician, Dr. W. R. Parker, was faithful till the end, and we feel quite sure all was done for his comfort that human mind and hands could do.

Mrs. M. D. Story and Children

"Everything in Furniture"

THE BOOK— That keeps the wolf away

That horror to all of us—"want"—may not face you today or tomorrow, but who knows what dire future is ahead of any of us. In a twinkling of the eye all that we have and own, may be wiped out. Yes, it isn't a pleasant picture, but if you're protected by a strong bank such as ours, with a comfortable Savings Account, there will be no necessity of fearing "want."
