Burgwyn High Man

It must be a source of gratification to Senator Burgwyn that in the election last Saturday he received all the votes at his home precinct but two, and that at Rich Square he was the high man, receiving more votes than were cast for any other candidate, local, county or State.

PRIMARY ELECTION

The primary election passed off very quietly in Rich Square last Saturday. The great fight centered on the contest for Congressman from this the Second District. There were 296 votes cast in all, Kerr receiving 238, Dickinson 28 and Robinson 9. Several ballots were put in the wrong box and could not be counted. Kerr was the loser by this. The same thing occurred with candidates for other offices. Several persons came to vote who could not do so because they were not registered. They were registered for the special school election held last year but not for this election. The school registration could not be used in this election. Our election officers, E. A. Huggins, registrar, and W. A. Weaver and P. C. Tyler, judges, were careful to hold the election exactly in accordance with the law. They did not try to influence anyone. The vote for Lieutenant Governor was Burgwyn 249, Fountain 15, Langston 9. For Constable and Tax Collector the vote stood Spivey 169, Bolton 60, Griffin 45, W. E. Futrell 6, P. M. Futrell 5. The vote at Woodland for the same candidates was, Griffin 134, Spivey 94, Bolton 51, W. E. Futrell 22, F. M. Futrell 20. At Woodland Burgwyn received 329 votes to 2 for Fountain. He carried Rich Square township by a majority of 552 over both opponents. Kerr carried the township by 469 majority over both of his opponents.

INDUSTRIAL COMMITTEE MEETS

A few representatives, representing sections of Northampton county that were not present at the industrial development meeting held at Rich Square the 4th of May, met at Seaboard Tuesday afternoon of last week to further discuss the initial steps necessary towards bringing into the Roanoke-Chowan section some kind of industries. Mr. J. H. Stephenson, president of the Kirby Township Farmers Club opened the meeting and after a few remarks had the minutes of the previous meeting read by the secretary. J. B. Stephenson chairman of the committee for arranging the meeting, went somewhat into detail about the purpose of the meeting and the results that might be expected to accrue from the efforts which are being put forth by a number of interested persons in this county.

Mr. J. T. Chase, General Manager of the Virginia Electric and Power Co., who is keenly interested in the development proposition and is taking an active part in furthering the movement had planned to be present, but a pressing engagement made it impossible. C. L. Whipple, power engineer for the above named company was present and was very helpful in giving out hints and information to those present that should prove of incalculable help to the permanent committee, the greater part of which has been appointed, in collecting data and facts about Northampton county for the purpose of having something concrete to show any one who may be considering the advisability of locating within the borders of Northampton. There were numerous expressions from those present, all of which were favorable towards the movement, and each one signified his willingness to cooperate in any way he could for the purpose of influencing industries to come to Northampton County. W. D. Barbee's name was added to the permanent committee.

FARM DEMONSTRATION WORK

POTATO BUGS

You are well acquainted with the potato beetle. This insect can destroy potato plants in a short time if no control measure is used. Calcium arsenate may be used either as a spray or dust. This is the cheapest poison that can be used and is very effective. It may be bought at the hardware stores in either Jackson or Rich Square and possibly at other places.

As a dust, cover the plants well. There is little danger of burning plants but too much should not be used as it is wasteful. As a spray use ten table-spoonsful to three gallons of water or two pounds to fifty gallons of water.

It is not too late to sow sudan grass for hay or temporary pasture. Use thirty pounds to the acre and if the land is thin apply 100 pounds of soda after the grass is up. The seed are much cheaper than last season.

RED SPIDER

Great damage was done the cotton crop in places last season by the red spider. You are probably familiar with this pest. Its presence is indicated by the appearance of blood red spots on the upper surface of the leaf. As damage increases the leaves get redder or turn rusty yellow over the entire surface, become folded, turn brown and dry and finally drop. I have a supply of circulars explaining the habits of this pest and its control. I will send them free on request. Write for them now as early control is necessary.

E. P. GULLEDGE,
County Agent.
