BIG COWS GIVE MOST MILK

Analysis of Records of Testing Associations Show Large Animals Are Best Producers.

Cow-testing records based on 38,582 dairy cows from 110 cow-testing associations are being analyzed by specialists of the dairy division, United States department of agriculture. The tabulations have brought out a number of interesting relations between milk production, butterfat test, butter fat production, and income over cost of feed. The larger cows excelled the medium and small cows in production of both milk and butter fat.

The average annual milk production of all the animals was 5,838 pounds per cow, and the average butterfat production 246 pounds. These figures are considerably larger than the average

Poor Cows Should Be Discarded or Made More Profitable by Careful Feeding and Management.

for the United States, indicating that dairymen who are members of cow-testing associations either dispose of their poorest cows or else make them more profitable by better feeding and handling.

HOW FEEDING BETTERS MILK

Important Relation Shown Between Milk Secretion and Certain Mineral Substances.

Experiments conducted by the bureau of animal industry, United States department of agriculture, with dairy cows are showing an important relation between milk secretion and certain mineral substances. Feeding compounds of phosphorus and calcium have resulted in a decidedly beneficial effect on the milk flow in both quantity and fat content.

It has been shown also that a deficiency of phosphorus in dairy rations has a detrimental effect on milk secretion of cows and growth of calves. A remedy was found in the addition of sodium phosphate to rations deficient in phosphorus. The work is being continued.

RECORD KEEPING PAYS WELL

Everything Must Be Considered in Light of Scales, Babcock Test and Cost of Milk.

Before the results of modern herd records were known dairy cattle were admitted to the herd books, and bought and sold chiefly on their outward appearances. There was no standard by which to determine the relation of form to production. A nice looking cow was the one which brought the most money. What constituted such a cow was largely a matter of opinion or prejudice.

With the introduction of herd records opinions came to be valued in direct proportion to one's understanding of the relation of form to production. Everything must be determined in the light of the scales, the Babcock test, and the cost of milk production.

INGREDIENTS OF CALF MEAL

Some of Most Commonly Used Materials Are Cornmeal, Middlings, Wheat Flour, Etc.

A calf meal, in order to give success, should be made up of ingredients that are easily digested and that are not too expensive. A few of the most commonly used materials are: fine cornmeal, flour middlings, wheat flour (poor grade), ground rice, oat flakes, barley malt, coconut meal, linseed meal, flaxseed meal, cottonseed meal, blood flour, blood meal and dried skim-milk or skim-milk powder. Skim-milk powder is not absolutely essential and it is rather expensive, but many of the calf meals that have given the best results have contained considerable amounts of it.

DAIRY NOTES

Use a small top pail.

It's the top dollar that puts the cream into the cream check.

Land which is not suitable for cultivation can be utilized for pasturage for dairy cows.

When cows are feeding on good pasturage and especially on alfalfa, little or no oil meal is required.

There never was a time when it was more necessary to weed out the "boarders" in a dairy herd than now.

Safe and Sure for DIARRHOEA DYSENTERY FLUX, Etc.

Didn't Overvalue Her Catch.

In the faintly lighted conservatory Jack had just asked Jill to marry him. She had murmured, "I don't care if I do!" and thus they were engaged. "Jack, dear," she began, "am I the only girl?" "Now, look here, dear," he interrupted, "don't ask me if you are the only girl I ever loved. You know as well as I do."

"Oh, that wasn't the question at all, Jack," she answered. "I was just going to ask if I was the only girl that would have you?"

Acute Agony.

"I thought the prima donna seemed upset about something." "She had a quarrel with her accompanist just before the concert began and he revenged himself on her in monstrous fashion." "What did he do?" "Just when she was reaching her highest note he struck the wrong key." —Birmingham Age-Herald.

Quite Different.

"What do you think Ellen told her jealous husband when he asked her if the paper she was bending over was a cloak for her design?" "What did she say?" "That on the contrary, it was a design for her cloak."

Child's Logic.

"Oh, mamma," said Elsie, suddenly, "my foot feels prickly." "It's only asleep, dear." "Then it must be having an awful bad dream," returned the child.—Boston Transcript.

The Atlantic Patrol.

After the wreck of the Titanic, 11 of the leading nations of Europe joined with the United States and Canada to provide a service for the observation and patrol of ice along the north Atlantic steamship lanes. These nations contribute in different proportions to the expense of this service, but the work is done by the United States coast guard cutters Seneca and Tampa who cruise back and forth during the warmer months when the icebergs come south and send out to all vessels wireless reports of the location and movements of the ice.—Boys' Life.

Had No Experience.

An artist was showing a young woman over his studio. After she had critically examined all the pictures, she remarked:

"I notice several sunsets among your works, but not a single sunrise. How's that?"

The artist, who was rather noted for his bohemian habits, blushed a little at the question, and then stammered:

"You see, it's this way. To tell the truth, the reason I've never painted a sunrise is because I'm never up at that time."

Pangloss Cannibals.

The Pangloss are said to be the only tribe of cannibals in Africa whom a European nation has not been able to subjugate completely.
