SPOILAGE OF BREAD PREVENTED BY CARE

Cover Lightly to Keep Out Germs and Dust.

When Cold It Should Be Placed in Close Receptacle That Has Been Thoroughly Aired—Food is Easily Contaminated.

While cooling, newly baked bread should be lightly covered with a clean cloth or paper to prevent mold germs and dust from falling upon it, but should not be tightly wrapped in a thick cloth, as is the practice in some households, for unless it is aired, when taken from an oven, it is likely to become "soggy" and damp, and thus offer an excellent medium for cultivation of molds, say food specialists of the United States department of agriculture. When cold the bread should be placed in a close receptacle that has been thoroughly scalded and aired. If bread is to be kept for more than two or three days in damp, hot weather, the jar or box should be taken out and sunned for a short time now and then, and again scalded and aired. On no account should portions of a former baking be stored with a new batch.

Cake and cookies should be cooled after making and kept in tin boxes or in earthenware jars, which, like bread boxes, should be scalded and aired often. Even if these foods are to be eaten at the next meal, it is well to keep them in some such receptacle, as it insures protection from dust. A cake, pudding, or pie that has been left to cool unprotected from dust or flies is something that no careful housewife would place on her table, if she stopped to think how easily the food may be contaminated.

New Use for Airplane Engine.
A London factory owner believes himself the first to use an airplane engine as an ordinary power unit. Only a small part of the rated horse power is used.

666 has more imitations than any other Chill and Fever tonic on the market, but no one wants imitations. They are dangerous things in the medicine line. adv

Town's Fraud Boat.

This town has a young lad who pawned his watch to obtain money for a bet. We contend that this is a claim to distinction possessed by no other town of earth.—Shawnee Register.

CLUB GIRLS TAUGHT TO PREPARE SUPPER

Each Member Is Assigned Certain Part of the Meal.

Constructive Criticism Found to Be Valuable in Making Each Repast a Little Bit Better Than the Preceding One.

To make sure that the girls in the home-making clubs, supervised by the United States department of agriculture and the Connecticut State Agricultural college, are able to put to practical use what they have learned in the clubs about buying, cooking and serving food, their leaders have organized "supper clubs."

These clubs meet twice a month at the local leader's home. At the first meeting of the month a well-balanced meal is planned with the help of the leader. Each girl is assigned a certain part of the meal, for which she is responsible.

At the second meeting she brings the material and prepares, cooks and serves her part of the supper. Adults are asked to these suppers, and the invitations are highly prized. The usual menu consists of appet, potatoes, one vegetable, hot bread, sometimes salad, dessert, and a hot drink. So far the average cost per person served has been 24 to 25 cents.

After the meal the club girls meet in a group and discuss and criticize the various articles on the menu and the serving. This constructive criticism has been found to be very valuable in making each supper a little better in every way than the preceding one.

GROUP UTENSILS IN KITCHEN

Equipment Should Be So Arranged That Everything is Handy—Put Small Things on Hooks.

Group your utensils so that you can reach them easily. Put those most frequently used in the most convenient places. Small ones may be hung on little hooks fastened to the wall or the edge of a shelf.

Margarine contains nearly as much food value as butter.

Salt and soda is excellent for bee stings and spider bites.

Cooked dried apricots served with cream sauce and grated cheese make a delicious salad.

Old linen dresses can be ripped apart and the best sections made up into dollies and table linens.

Stretch the ironing board cover and it will keep clean longer, the clothes will slip over it more easily, making it a real pleasure to iron.

Moon's Time for Sleep.
A little girl of three, seeing a cloud of smoke enveloping the moon, said, "Auntie, the moon is going to sleep now; see 'em pulling the sheet up over it!"

To Enlighten the Passenger.
A coin in a slot machine has been invented by an Englishman to enable a passenger to learn at what speed he is traveling in a train.

Napoleon's Marshals.
Napoleon had ten marshals. They were Ney, Massena, Bernadotte, Mar-mont, Murat, Davoust, Soult, Bessieres, Angereau and Lannes.

Harvesting by Machinery.
The beginning of practical methods in the direction of harvesting by machinery was not made until 1831.

Reward of Duty.
The reward of his duty is the power to fulfill another.—George Eliot.

MITCHELL FOR SALE

One Mitchell car with one piston ring. Two front wheels one front spring. Has no fenders seat made of plank. Burns lots of gas hard to crank. Carburetor busted half way thru. Engine missing hits on two. Only three years old four in spring. Has shock absorbers and everything. Ten spokes missing front axle bent. All tires punctured ain't worth a cent. Got lots of speed will run like the deuce. Burns either oil or tobacco juice. Helluva good Mitchell for the shape its in. For further information call at Red Cross Barber Shop and while they are explaining the good merits of the car he will cut your hair for 45 c. And while he is telling you what he knows about a car he will shave you for twenty cents and that wont take him long. You may also see Mr. Dickinson at Core Creek as he seems to know all about it. We are also opening up a first class PAINT SHOP. We will paint Chairs, Purses, and all house furniture Automobiles a Specialty. We are now stationed in our new building formerly occupied by Voughts Laundry on Pollock St.

F. C. DICKINSON MANAGER

Josh Billings.

The humorist whose pen-name was "Josh Billings," was Henry Wheeler Shaw. He lived from 1815 to 1885. He turned off many shrewd sayings, bits of quaint philosophy and pointed jokes, but they were rather damaged by the laboriously bad spelling in which they were written. This style of humorous writing, quite popular in the United States half a century ago, has almost gone out of vogue. Today Josh Billings is little more than a name.

Making Glass of Rice Husks.

Experiments have been carried out in Burma with the idea of utilizing the silica content of partly rice husks, in the manufacture of glass. On burning the husks about 18 per cent of white ash is obtained, and, although this ash contains small quantities of iron, it has been proved to be suitable for the manufacture of glass having a pale green or yellow color. In burning the husks sufficient heat is generated to carry out the various processes.

Pitcairn Island Women.

The women of Pitcairn island, descended from English sailors and Otagian mothers, are described as being unusually graceful, as well as vigorous. It is a common sight to see the young women of the island go up and down the steep, rocky shores, carrying barrels of water or other heavy burdens on their shoulders, apparently with as much ease as the young men do.
