

About Precious Stones.
An emethyst is quartz crystal steeped with manganese. Opal is crystal of another variety, containing from 5 to 18 per cent of water. Diamonds are carbon, and rubies are a kind of borandum.

Killed Value of Old Coins.
Old-fashioned copper cents of the years 1817, 1818, 1819 and 1820 were formerly very rare and correspondingly valuable; but bags full of them were found in an old bank and the market was flooded.

First Enthusiasm Gone.
Marieite was delighted when a small brother arrived at her home. However, after some weeks she began to think he was somewhat of a care, and one day when her mother told her to rock his cradle, she looked at him with disdain and remarked, "Oh, you little bothering thing!"

Inconsistency.
Uncle Bill Bottletop says he knows a man who will fool with any old kind of liquor, who refused to eat mushrooms for fear a little toadstool might get mixed in.

Echo Under Water.
An instrument has been invented by which ship soundings can be made by means of an echo through the water.
