

THE DUTY of ALL

Every Family in Carteret County ought to subscribe for the Beaufort News because it is published at the county seat and because it gives the news of the county and to some extent of the State and nation. Some families in Carteret county do not take any newspaper at all and many of them do not take a county paper. This ought not to be the case.

In this day of progress it is necessary to read newspapers in order to be informed. Ignorance is one of the greatest curses that the human race has to contend with and is responsible for many of its ills. Reading is the foe of ignorance and every person ought to do at least as much as read a newspaper. A newspaper in the home causes the children to form the reading habit and has a beneficial effect on their lives.

You can get the Beaufort News and The Progressive Farmer for a whole year for \$2.25 and no better investment of a small sum could be made than this.

You can get the Beaufort News alone for TWO YEARS for \$3.00. A trial three months subscription to the Beaufort News will cost you fifty cents.

The Beaufort News will continue publication whether its subscription list grows larger or not, because it has enough now to be on a firm basis. It is doing four times the business now that it did when the present management took hold. THE NEWS IS A FIXTURE here now. It passed the experimental stage some time ago and is here to stay. However, the publishers of the News want it to be in a position to do the greatest possible good to the people of Carteret county and this can best be accomplished by a larger and generous support of the people. The News is a public not a private institution. It is the people's newspaper and the people should take a pride in its growth and success.

A Fine Chance

To Buy Some Good Land REASONABLE

The well-known Allen-Gooding lands on both sides of the Inland Waterway were bought by us at public sale and we are now offering this property in

20 ACRE TRACTS

Each tract will have frontage on the Inland Waterway and as the Central Highway will pass about a mile from this property it will have good transportation facilities.

These lands have a rich soil and no fertilizer is needed to make crops on them. Fine yields of cotton, corn, potatoes, soy beans and other crops can be had on them.

Now is the Time to BUY

In a year or two it is likely that prices will be much higher for all desirable property. Come to see us or write

GOVERNMENT MUST PRACTICE ECONOMY

Vast Mountain of Debt Must Be Paid By The Nation Says Secretary

WASHINGTON, April 4.—"Secretary of the Treasury Mellon performed a public service soon after he took over the office in warning the country to practice the most rigid economy, and reminding the people once more of the vast mountain of debt bequeathed to President Harding by the retiring administration," says the Republican Publicity Association, through its President, Hon. Jonathan Bourne, Jr. "Other cabinet officers have emphasized the situation in their public utterances, and it behooves the public to think deeply on the subject in the days that are before us. Interests of all kinds are clamoring before Congress for appropriations of various sorts. Many of the projects are meritorious, while some have little to recommend them and should not be given consideration at any time.

"In the present financial situation of the country Congress must pause and consider the possible effect on the Treasury and business in general, of any proposal for enlarged expenditures. As an aid to a proper realization of the financial obligations of the Government there is presented herewith a statement showing the money that must be raised by the

Treasury between now and the end of the fiscal year on June 30, 1923.	
"Maturing Debt, Treasury Statement of December 31, 1920.	
Victory Notes, payable May 20, 1923	\$4,225,928,250.00
Certificates of indebtedness (floating debt)	2,592,811,950.00
War Savings Stamps payable January 1, 1923	618,602,124.98
Total debt principal	\$7,437,342,324.98
Estimated Appropriations for Fiscal Years 1922, 1923, and last quarter 1921.	
Regular appropriations	\$4,738,000,000
Interest, public debt	2,065,000,000
Railroads	800,000,000
Deficiencies	372,000,000
Miscellaneous	315,000,000
Total appropriations	\$8,290,000,000
GRAND TOTAL	\$15,727,342,324.98

POULTRY CACKLES

GRAINS FOR POULTRY FLOCK

Corn and Wheat Are Best and About Equal in Feeding Value—Scratch Mixture is Good.

Corn, wheat, oats, and barley are the principal grains fed to poultry; kafir corn and buckwheat are used also, but are not so generally available and usually cost more. Corn and wheat are the two best grains and are about equal in value as poultry feeds, although wheat can be fed alone better than corn, which is inclined to be fattening. Oats and barley, on account of their hulls and higher fiber content, are not so good as corn or wheat. Rye is not well relished by fowls and is seldom fed. Wheat screenings or slightly damaged grains sometimes

A Well-Developed Flock Scratching in Litter for Feed.

may be bought to advantage, their value depending entirely upon their quality and condition, but as a rule only sound grains in good condition should be fed to poultry, and moldy grains should never be used. The locally grown grains, which poultry will eat freely, may generally be used to the best advantage, say poultry specialists of the United States Department of Agriculture. A scratch mixture, consisting of whole or cracked grains, made of a combination of any two or more of those mentioned, can be fed to advantage. It is not advisable to feed continuously any single grain, especially corn.

A mash made of ground grains, mill products, and meat scrap should be fed usually in addition to the scratch mixture. Cornmeal, wheat bran, wheat middlings, and meat scrap form the base of a good mash, while corn chop, corn-and-cob meal, ground oats, and

Jefferson County, Ala., will save about \$5,000 a year in milk and butter bills by the recent purchase of a 60-cow dairy for the county farm. These cows were purchased at the

"That is the vast sum that must be collected from the people if the obligations of the nation are to be kept and the Federal machine maintained without impairment of efficiency. The war is over, but its tremendous cost must be met if the national credit is to be sustained. Fifteen billion dollars is a far greater sum than any nation ever was called upon to raise in 27 months of peace, but it is the task that is set for America to perform, and it cannot be avoided.

"In their two years' control of Congress the Republicans have amply shown their ability to cut expenditures to the bone. This summer they will undertake a readjustment of the tax burden and a revision of the tariff so that business will be relieved and revenues set at the highest point consistent with sound judgment. Necessity demands that Congress set itself against every new plan for taking money from the Treasury, and make appropriations solely for the imperative needs of the Government. In the performance of that duty the administration, both executive and legislative, should have the hearty support of every citizen."

Sugar cane in Allendale County, S. C., was a worth-while crop for one demonstrator in the county. He planted 3 1/2 acres, which produced 1,800 gallons pure sirup when harvested. This gave a total profit of \$514 an acre, as the sirup sold for \$1 a gallon. He is now planting 5 acres.

THE KINDERGARTEN DEVELOPS CHARACTER

At the recent meeting of the Department of Superintendence of the National Education Association, Superintendent H. S. West of Rochester, N. Y., said:

"Education for citizenship in this country makes a peculiar demand for the development of character qualities. If an approach to the American ideal means anything it means a growth in our appreciation of the fact that liberty is the right to do as we ought and not as we wish. We believe in the kindergarten primarily because of its possibilities for beginning and effectively continuing just this appreciation. Child instincts are dominant at the age of four. To the kindergarten is entrusted the great responsibility and the most delicate task of so balancing self expression and self repression as to develop a human personality that is at the same time self sufficient and yet helpful and co-operative."

HOMELESSNESS

It has been said that a man will fight for his home, but it is hard to induce a man to fight willingly for his landlord or his boarding house.

And Billy Sunday has said, "A man living in a rented house and singing Home, Sweet Home is merely kidding himself and serenading his landlord."

A noted sociologist has said, "If every family had a home, with lawn and flowers and trees in front and a garden in the rear, crime would disappear in two generations."

Dark, crowded, unsatisfactory housing conditions are among the most prolific sources and causes of disease, insanity, immorality and crime, both in town and country areas. Homelessness constitutes a most serious menace to society.—K. V. Haymaker.

FARMERS SPEND MUCH TIME TO KILL OR CONTROL WEEDS

Fighting weeds occupies about 30 per cent of all the time a farmer spends in cultivation of crops, according to experts in the United States Department of Agriculture, who recently have been conducting a weed survey. Special attention has been given to the best methods of conquering some of the worst weeds, and the following publications on their eradication or control may be obtained by writing to the department.

Farmers' bulletins: 610, Wild Onion; 660, Weeds in General; 833, Wild Oats in Hard Spring-Wheat Area; 845, Bermuda Grass; 1161, Dodder; Poison Ivy and Poison Sumac; 1002, Canada Thistle.

Department circulars: 108, Chicory; 130 (5 cents a copy), Hawkweeds or Paint Brushes.

Department Bulletins: 511 (10 cents), Farm Practice in the Cultivation of Cotton.

In addition to these the following multigraphed leaflets on special weeds may be obtained by writing direct to Forage Crop Investigations, Bureau of Plant Industry, United States Department of Agriculture, Washington, D. C.: Chemical

Weed Killers; Eradication of Nut Grass; Wild Carrot; Crab-Grass; Killing Dandelions in Lawns; Sheep Sorrel; Chickweed in Lawns; Eradication of Quack Grass; Wild Morning Glory or Bind Weed; Honeysuckle as a weed-Perennial Sow Thistle.

Pulaski County, Ark., farmers are much interested this winter in learning the best ways of butchering, curing meat, and making sausage. The county agent arranged a number of demonstrations. An average of 3 hogs and 14 hogs were butchered at each demonstration. Practically all the farmers living near the farm, at which a demonstration was given attended.

One Alabama district agent, with headquarters in Lee County, reports \$118,637 worth of produce and supplies handled cooperatively in his district during 1920. This was a saving to the farmers of \$23,187, or an average saving of \$1,785 a county in the district.

RAT-SNAP

Better Than Traps For Rats
 Why? Because RAT-SNAP is doing the work and the rat is doing the work. RAT-SNAP is a safe rat poison. It is safe for you, safe for your dog, safe for your cat, safe for your children. It is safe for your pocket. RAT-SNAP is a "household" rat poison. It is safe for your dog, safe for your cat, safe for your children. It is safe for your pocket. RAT-SNAP is a "household" rat poison. It is safe for your dog, safe for your cat, safe for your children. It is safe for your pocket.
