NUMBER FORTY THREE

## Will Celebrate Navy Day In Beaufort Tomorrow

Officers And Men From Destroyer Worden Will Take Part in Celebration—School Will Parade and General Holiday Will Be Observed

### MOREHEAD CITY CELEBRATES ALSO

Beaufort and Morehead City have had a strong reminder of war times for the past two days caused by the presence in the harbor of two of Uncle Sam's fighting ships. The vessels are the destroyers Worden and Flusser. They dropped their anchors in the Fort Macon channel at 9:30 yesterday morning having been brought in by Captain Tom Grace Willis.

The vessels are late models and are about as good in their class as any navy in the world affords. They are 310 feet in length, 30 feet beam, and draw 12 1-2 feet of water. They are equipped with four 4 inch guns, one 3 inch anti-aircraft gun and twelve torpedoes. Under full steam they can make 35 knots an hour having engines of 28,000 horse power. The vessels are oil burners.

Although war-like in appearance the warships are here on a peaceful mission. The presence of so many blue jackets and dapper looking young officers may work some havoc on the hearts of the young ladies of the community but this is not supposed to be their main object. The purpose of the trip is to celebrate "Navy Day" which is October the 27th and is Theodore Roosevelt's birthday. The day will be observed in many ports along the Atlantic and Pacific coasts.

In order to assist in the celebration tomorrow the Chamber of Commerce has appointed the following committees: Finance, Raymond Wheatley and C. R. Manson, Arrangements F. B. Seeley, W. A. Mace, W. H. Taylor; Decorations C. R. Manson. The program is to have a parade of sailors and the schools beginning at 10:30 which will end at the courthouse where there will be music and speaking. Former secretary of the navy Josephus Daniels was invited to be present but has not been heard from at this writing. The principal address will be made by Captain Shields of the Worden, or one of the other officers. After the ceremonies a lunch will be given to the officers and men.

For the purpose of the celebration the Worden was assigned to Beaufort and the Flusser to Morehead City. The celebration in the two towns will be somewhat of similar nature. Commander Stephen Daugherty is in command of the Flusser. The officers of the Worden are Lieutenant P. W. Fletcher, Lieutenant W. H. Weed, Ensigns J. C. Taylor, H. C. Scott, E. G. Martin and P. R. Sterling who is at home on leave. The crew consists of 90 men only half of whom are allowed to come ashore at one time.

The Worden was built at the Squantum Works of the Fore River Shipbuilding Company, at Quincy, Massachusetts, and although she did not take an active part in the struggle over seas, it was only the armistice that prevented her from taking her share of the burden.

She is commanded by Lieutenant Commander Henry Jadwin Shields, U. S. Navy, who during the war was the gunnery officer on the U. S. S. Von Steuben, which was an auxiliary cruiser and transport and as such carried many troops to France and also acted as escort to many convoys.

The second command, the Executive Officer is Lieutenant Paul W. Fletcher, U. S. Navy, son of Captain W. B. Fletcher, U. S. Navy, retired. Lieutenant Fletcher served on the U. S. S. Balch, one of our destroyers in European waters during the war, which did very effective work in conveying the thousands of ships entering English ports.

Both officers and crew of the Worden take great pride in the name and also the ship, it being named after Commodore Worden, one of the bravest of American naval officers, who remained at his post although blinded by the explosion of a shell. He so ably conducted his vessel that he conquered his adversary which

was a much larger and powerful vessel.

The Worden stands highest in gunnery, of all the destroyers in the Atlantic Fleet for the current year, which speaks for itself.

The men are looking forward to a very interesting and enjoyable time in Beaufort.

### INTEREST GROWS IN NEWPORT FAIR

County Agent Harris is putting in full time now in the Newport section looking after the Community Fair which is to be held there Friday, November the 3rd. He says a large number of people are going to make exhibits and that many of them will be very interesting. There will be displays of poultry, hogs, cattle, tobacco, fruits, garden stuff, canned goods and many other articles. There will also be shown some interesting antiques, such as old clocks, glass ware, and other household effects. The indications are that a large crowd will attend the Fair.

### DOUBLE WEDDING AT MOREHEAD CITY TUESDAY

Morehead City, Tues., Oct. 24.—The Methodist Episcopal church was the scene of a pretty and unusual wedding Tuesday morning at 7:30 o'clock when Miss Ruth Davis, daughter of Mr. and Mrs. Herbert Davis was married to Mr. William Gladstone Oglesby and Miss Fannie Wade, daughter of Mr. and Mrs. John Wade became the bride of Gordon C. Willis, by the same ceremony. Reverend James Craige, pastor of the First Baptist church of which Miss Wade is a member, performed the holy rites assisted by Reverend W. A. Cade, pastor of the Methodist church.

The decorations of the church carried out a color scheme of white and green. Prior to the wedding the many friends of the contracting parties were treated to a musical program under the direction of Mr. Theodore Webb who is organist.

The choir of which Miss Davis is a member rendered the bridal chorus by Cowen from the opera, "The Rose Maid." Mrs. W. A. Cade sang "Beloved, It is Morn."

Messrs. Earl W. Piner, Darcy Willis, Edward Oglesby, brother and George Oglesby.

Little Miss Edith Caswell Davis clad in organdy and Master Sylvester Gibbs Jr., acted as ring bearers each carrying an immense red rose. Miss Reba Canfield as maid of honor wore a brown crepe gown with hat to match and carried an arm bouquet of yellow chrysanthemums.

The two brides proceeded to the altar together where they were met by the grooms. They wore dark blue traveling suits with gray hats and other accessories to match. Immediately after the wedding the bridal parties left on an automobile tour for South Carolina and western points in North Carolina.

### REAL ESTATE TRANSFERS.

Realty transactions recently recorded by Register of Deeds Troy Morris are as follows:

John L. Morris and wife to Ralph Morris 1 acre H. I. T. S., consideration \$10.

Isaac Piner and others to R. W. Piner 25 acres H. I. Township, consideration \$75.

Monroe Lewis and wife to W. M. Davis and others Trustees pt lot—consideration \$100—Smyrna township.

H. D. Smith and wife to Bank of Beaufort, Trustee pt. lot in Hedrick town, consideration \$1400.

C. W. Thomas to C. S. Maxwell et al 191 acres, consideration \$4000.

A. B. Buck and wife to W. M. D. Kirkman lot in M. City, consideration \$750.

### COUNTY AGENT HELPS SELECT BREEDING HOGS

Mr. M. Hamilton and I left last Monday for Raleigh and Middlesex where we selected the stock for Mr. Hamilton's hog farm. We first visited Mr. A. F. Manning's farm at Middlesex and looked over his hogs. Mr. Manning has been breeding Duroc-Jerseys for several years but none of his hogs came up to our expectations so we went to Raleigh and observed the hogs that were on exhibition at the State Fair. The hogs were plentiful so we were not long finding some that came up to the requirements from every standpoint. We finally bought our hogs from Jordan Bros. but before purchasing them, we had a talk with Mr. Shay and asked his advice. He recommended the hogs that Mr. Jordan was breeding to us as the best and the fanciest stock that we could buy anywhere within the state. The sire of the oldest sow that we bought was the grand champion of the Fair this year. These hogs of Mr. Hamilton's will be bred to farrow in March and will be shipped to him sometime next month. I can recommend these hogs to any one who wishes to have the very best stock on their farm and I hope the farmers of Carteret County will look up the pedigree of these hogs and get their breeding stock from Mr. Hamilton. Mr. Hamilton is making preparations all the while to take care of them as the State Department recommends as soon as they arrive. Any one who wishes to look these hogs over, get in touch with Mr. Hamilton and he will give the full particulars as to when they will arrive, etc.

I visited several specialists in Raleigh and made engagements for them to be with me at a later date to begin several projects in this county. Mr. Kirby, Assistant State Demonstration Agent will probably be the first one to visit the county. He will assist me in organizing the pig and poultry clubs in the county. I am hoping to get at least one hundred boys to join the club and about the same number of girls. We only want boys and girls who are interested in the work and the ones who will stick to it to the last. Sometime in the near future I will go around to the different schools and present the proposition to the individuals.

Dr. Wm. Moore, State Veterinarian, has promised to send me a man to this county to treat our cattle for tuberculosis. He did not advise me the exact date that he would do this work but I will advertise it in the papers in due time for each individual to get it done. To be on the safe side and in due time, put in your application at my office in the courthouse and when the man arrives to conduct the tests, I will see that your work is done. There will be no charges to the farmer for this work.

Signed:  
A. H. HARRIS,  
County Agent.

### LEE FULCHER ACQUITTED IN SUPREME COURT

Justice W. P. Stacey of the North Carolina Supreme Court handed down an opinion of the Court last Wednesday which relieved Lee Fulcher of Wildwood of the charge of assault on Mrs. Malissa Sharp. Fulcher was tried in Beaufort at the June term of court and was sentenced by Judge Cranmer to six months on the roads. The Supreme Court says that Judge Cranmer should have nunsuited the action.

Fulcher's defense was that Mrs. Sharp had threatened to strike a child of his with a tobacco stick and that he took the stick away from her. In doing so he bruised her wrists somewhat and she made the charge of assault against him. The Supreme Court held that he had a right to protect his child and was therefore not guilty.

### MARRIAGE LICENSES.

Register of Deeds Troy Morris has issued licenses to wed to the following couples:

J. N. Russell, Morehead City and Allie Garner, Newport. Geo. W. Piner and Mrs. Cora Hill, Morehead City. William G. Oglesby and Ruth Davis, Morehead City. Gordon C. Willis and Fannie B. Wade, Morehead City.

### SITE SELECTED FOR HIGH SCHOOL

Board of Education Has Decided on Site Recommended By J. J. Blair of State Board of Education

The following is a report made to the Board of Education as to the location of the new Smyrna-Straits high school, by Mr. J. J. Blair, Director of School House Planning for the State of North Carolina. This report was unanimously adopted by the Board of Education on Oct. 23, and the new building will be in readiness for the coming year. This school will accommodate the high school pupils from the following schools: Davis, Williston, Smyrna, Lottville, Marshallberg, Straits, Otway and Bettie in the future. This will be one of the largest high schools in the county. There will be some one hundred and twenty-five high school pupils to enter this school next year. The report is as follows:

Beaufort, N. C.  
Oct. 22, 1922.

To the Board of Education, of Carteret County. Gentlemen:—

I wish to present to you in an official manner a few facts with reference to the proposed consolidated high school for certain schools within the limits of Carteret County: viz: Davis, Williston, Smyrna, Marshallberg, Straits, Louisville, Otway and Bettie.

Our State is taking the lead in the matter of uniting groups of small schools into schools of a larger type, this plan being what is commonly known as consolidation. In these central schools it is customary to combine the children of all classes within the entire district about the sixth or seventh grade, thus forming what is known as the standard junior and senior high school. The advantages derived and the economy of administration of this arrangement need not be discussed or considered. One of the most essential and necessary requirements of this form of school organization is the proper location of the central building, to the end that it may serve in as convenient and satisfactory manner as possible the entire area comprised in the district. Some of the conditions which need to be met may be enumerated as follows: 1—The geographical center of the district forms an important item. 2—The center of population of the district should influence greatly the selection of the site. 3—The character and condition of the highways is an essential condition to be met and considered. 4—As the building is to be the center of the community the beauty of the situation should be such as will inspire a pride of ownership on the part of all the citizens and patrons. 5—As a building of this type is a valuable asset to any county it should be placed within sight of the leading highways of the district.

With all these conditions in mind the Director has visited in turn and more than one time, under different weather conditions five different sites with a view of aiding the Board in selecting the one which will nearest meet the conditions enumerated above.

Site No. 1—Located between Smyrna and Williston. It does not altogether meet the condition of beauty of situation and it is too far to the northward of the center of population.

Site No. 2—This site has some advantages which others do not possess. The cultivated area immediately within the village of Louisville (sometimes called Tusk) would not be available on account of its value for cultivation, and probably owned by a number of individuals, making it difficult to secure the proper title for the amount of land in one tract for a building of this character. The site further up the road toward Straits the character of the undergrowth and drainage makes it unsuitable. Also it is unnecessarily far away from the geographical center of the district.

Site No. 3—This site is on the road toward Marshallberg where the Angle road intersects. While the land here is fairly well drained, the only field suitable for recreation purposes is that from which a crop of

### BUILDING AND LOAN ELECTS NEW SECRETARY

The directors of the Beaufort Building and Loan Association held a meeting last Thursday evening at which Howard F. Jones was elected Secretary to succeed G. W. Duncan who declined some weeks ago to accept the office another year. Mr. Jones has entered upon his duties and will give all the time necessary to attend the Association's business. One of the principal matters attended to at the meeting was the consideration of the report recently made by auditing firm of Raleigh. This report showed the association's affairs to be excellent shape. The assets of the organization consists mainly of first mortgages on real estate in Beaufort and elsewhere. More than forty thousand dollars is lent out in this way. Notwithstanding the fact that a good many people on account of the hard times of the last two years had to withdraw their money from the Association others have come in and the business has made satisfactory progress. The auditor's report shows that the association has earned satisfactory profit and that it is doing remarkably well when the depressed condition of business in general is taken into consideration. From now on an active campaign will be conducted for the purpose of attracting new shareholders and increasing the association's usefulness to the community.

### FORMER VISITORS RETURN.

Dr. and Mrs. D. W. Wynkoop, of Babylon, Long Island, New York accompanied by their little daughter Miss Lucia arrived here last week and will be guests of the Inlet Hotel for several months. Dr. Wynkoop and family have visited Beaufort several times before and are very pleasantly remembered by the people here. In 1917 a few weeks after war was declared Dr. Wynkoop volunteered for army service. He was commissioned a Captain, afterwards made a Major and saw much service on the battle front. He was gassed, spent many weeks in a hospital and finally returned to the United States. He was connected with the army for some time after the war, being located for a time in Washington and later in Chicago. Dr. Wynkoop's two sons are in school, one at Yale and the other at St. Alban's.

### FARMERS OF THE SOUTH HEADED FOR INDEPENDENCE

WASHINGTON, D. C. Oct.—"The Southern farmer is making hopeful progress in his journey from dependence upon a single money crop, with its one pay-day year at market time for cotton or tobacco, towards the independence to be obtained by the operation of his farm to yield cash returns throughout the year from the sale of truck crops, cattle, hogs, poultry and dairy products," says Fairfax Harrison, president of the Southern Railway Company, in his annual report which goes on to say:

"One proof of this progress is found in a report by the United States Bureau of Markets that from January 1, 1922, to August 19, 1922, there were shipped from the states of North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana and Tennessee 107,298 carloads of cabbage, canteloupes, lettuce, onions, strawberries, sweet potatoes, tomatoes, watermelons, Irish potatoes, peaches and mixed vegetables, compared with 83,629 carloads for the same period of last year, an increase of 23,669 carloads or 28.30 per cent, and this showing was made in spite of the fact that there was a substantial decrease in production of watermelons and peaches because of unfavorable weather conditions.

"Other bits of evidence of the same character are the establishment of twenty-six new creameries in the territory served by Southern Railway System, a large increase in the production of butter, the raising in South Georgia of milk food poultry along the lines for many years profitably practiced in east Tennessee, the placing of farms throughout the territory of more pure bred poultry than in any previous year, and the growing of high grade tobacco in South Carolina and Georgia.

"The movement of farm settlers into the South, comparatively light

### WILL REGULATE SALE OF MILK

County Board of Health Issues Regulations Effective December the First

Realizing the value of pure milk for the people of Carteret County, the County Board of Health has adopted the following rules and regulations regarding the producing and handling of same. These regulations are to become effective December 1st, 1922. In order that you may be able to comply with section 8 of these regulations, we have arranged with the state veterinarian to conduct the tuberculin test free of charge to the individual. All instructions as to how and when this will be done, will be published in the papers at a later date. The ordinance is as follows:

Section (1) MILK. (a) Definition Milk is hereby defined as the normal, lactal secretion of the cow, all parts of which shall without adulteration and contain all of its normal constituents and within 48 hours prior to its delivery to the consumer or purchaser if raw, or within 60 hrs. if pasteurized, be obtained from the udder by the complete milking of one or more healthy cows which are properly fed and kept, excluding that obtained within 15 days before and 5 days after calving. (b) Composition. The composition of milk as marketed shall contain constituents parts in the following proportions—Not less than 3.5 per cent of milk fat, and 8.5 per cent of solids not fat.

(2) Cream. Cream is defined as that portion of milk rich in milk fat which rises to the surface of milk on standing, or is separated from it by centrifugal force, is fresh and clean, and contains not less than 18 per cent of milk fat.

(3) Buttermilk. (a) Buttermilk is that fluid derived of whole milk or cream which is the by-product of churning without the addition of water. The condition of manufacture and handling of this product shall be of such sanitary character as shall meet the requirements of the health department. (b) Buttermilk manufactured from skim milk powder, skim milk, or any product and ripened with commercial or other starter shall so be labeled, and shall be regulated by the same ruling as applies to buttermilk. (c) The practice of dipping buttermilk from cans or other containers is declared dangerous to the public health and is hereby prohibited. Buttermilk shall be delivered in the manner provided in sections 4 and 8 of these regulations, or delivered in sanitary receptacles provided with a spigot through which the product shall be drawn without uncovering or exposing the contents of the receptacle to contamination.

(4) Ice Cream. The composition of the ice cream shall be that provided by the State Law. The condition and methods of manufacture, handling, delivery and serving ice cream shall comply with the requirements of the health department.

Section 2. Disposal of Human Excreta. Open or insanitary privies are prohibited on dairy farms. The disposal of human excreta on dairy farms shall be in the manner provided by the State Privy Law for cities and towns and in compliance with the plans and specifications of the North Carolina State Board of Health.

Section 3. Barns. Barns used for milking or housing milk cows shall be of suitable construction, have sufficient light and air space, and shall be kept in such cleanly condition as shall meet the requirements of the health department. The premises about the barns and milk houses shall be kept free from manure or other conditions which might influence the sanitary quality of the milk or the health of the animals.

Section 4. Milk Houses. All milk houses and other buildings used for the handling and storage of milk shall be of suitable construction and adequately screened and protected from dust and flies the year round. All dairies shall be adequately equipped with acceptable facilities for hot water or steam.

Section 5. Containers. All bottles, cans and other utensils used as containers, shall be of suitable construction, and shall be properly sterilized in boiling water, steam, or equally
