**ARBHEWLTAYE**

Miss Estelle Caffrey recognized her name last week.

Attaining a production of 112,499 commercial vehicles during 1926, an increase of more than 132 per cent over the preceding year, the Chevrolet Motor Company is now the world's largest manufacturer of gear shift trucks, according to figures just announced by company officials.

The increase is a gain of 64,200 over the 1925 production of 48,299 trucks.

This enormous increase is attributed in no small degree to the numerous refinements and lowered prices of the new trucks. Dealers everywhere reported an enthusiastic reception by the public of these new models.

The 1925 production in its turn had more than doubled the 1924 output of 23,134 trucks.

According to present manufacturing schedules an even greater monthly production is contemplated for the truck division during the coming months to insure dealers a sufficient supply to meet the growing demand.

Production during January, 1927, totalling 15,927 trucks, also broke all truck production records for a single month in the history of the company. The previous high mark was in September, 1926, when 12,845 trucks were manufactured.

A dairy calf club, a baby beef contest, and a poultry club contest have been started by young farm folk of Buncombe County.

Promotion comes to him who sticks Unto his work and never kicks; Who watches neither clock nor sun To tell him when his task is done; Who toils not by a stated chart, Defining to a jot his part, But gladly does a little more Than he's remunerated for. —Edgar Guest.
