**METALLIC PATTERNING ILLUMINES
MANY KNITTED SPORTS MODES**

ANYTHING for novelty, that is the mood of the mode. The stylist answers the challenge by introducing metallic effect into knitted construction. An increasing number of sweaters, jumpers, knitted coats and jersey frocks are showing a tendency to yield to the lure of gold and silver. One of the charming ideas is the white jersey frock whose jumper is embroidered in all-over gold and silver design after the manner here pictured.

Sometimes the metallic note is expressed in an actual interknitting of gold and silver threads rather than in embroidery. Sweaters and coats whose stripes interwork their coloring with glittering tinsel are among smartest showings.

Newest in the category of sweaters is the slipon knitted entirely of gold, silver and bronze thread in a manner most enchanting. Often, also, colored

jersey shows an interworking of horizontal metal stripes.

Very conspicuous sweaters both as to design and color are worn with plaited solid-colored jersey skirts—especially white. As summer advances more and more will filmy lace-knit sweaters make their appearance. Sweaters knit of chenille with metal stripes are among lovely novelties.

Two items which render the distinctive touch to knitted costumes are color and necklines, ranging from subtle blend to dazzling contrast. As to necklines, there is a distinct preference for the collarless type describing either a V-line, square, round or boat shape.

The bow-at-the-neck fad has entered the domain of the knitted blouse or sweater. It is usually posed at the side of the square neck or at some strategic point near the shoulder.

**WEATHER BROADCAST
FOR FISHERMEN**

Weather conditions along the Gulf coast and in the northwestern Caribbean Sea region are broadcast by the radio station at Pensacola, Fla., for the particular benefit of local fishing smacks which fish for snapper in the Gulf of Mexico. One of the local companies operates 21 smacks and has equipped all of them with radio receiving sets for the particular purpose of getting weather information from WCOA. The smacks average about 25 days to each trip and frequently go several hundred miles from Pensacola. The forecasts are received regularly and are of great value not only in the protection of the boats from storms but also in fishing operations.

Dial numbers have been converted into raised characters to enable blind persons to tune-in different stations on the radio receiver.

Every bride in Mackenrode, Saxony, married in twelve months, with one exception, had the surname Mueller.

WILDWOOD

Misses Nina and Bertie Hines of Goldsboro are here spending a while with their grand-mother Mrs. W. F. West.

Miss Helen Watson has been entertaining a few of her friends from Raleigh at her home here for several days.

Mr. W. M. Hines and little daughter of Goldsboro were here Monday to visit his mother Mrs. West.

The fourth passed very quietly here, there were no marked changes in the daily program. A few of the young folks went bathing and attended the ball at the Atlantic Hotel that night.
