TWO FISH ON ONE HOOK CAUGHT BY J. W. MASON

Tuesday while Messrs. James W. Mason and Robert L. Fritz were a fish, but when he started to haul it in, it pulled in a queer fashion. He kept bringing it closer and closer until he hal it to the side of the boat. And the ? on the end of the line was a large black fish which a foot and a half shark had bitten and was still holding on. Rather than turn loose of the black fish the shark permitted itself to be pulled on board the boat. Mr. Mason vouches that this fish yarn is no fish yarn.

TIDE TABLE

Information as to the tides at Beaufort is given in this coiumn. The figures are approximately correct and based on tables furnished by the U. S. Geodetic Survey. Some allowances must be made for variations in the wind and also with respect to the locality, that is whether near the inlet or at the heads of the estuaries.
