Located in New Bern at 23 Middle street, phone 184—have everything for the farm and garden. They specialize in bulbs, seeds, feeds, hay, and grain and are extensive dealers in high grade seeds for all purposes, featuring a complete line of seeds for keeping up the lawn or garden and farm seeds for every need. Mail orders or phone calls given prompt attention.

The farmer and city people have come to know that they can get from them the best seeds of all kinds on the market, hence they seek no further market. They have a reputation far and wide as business men of wide experience and straightforward methods and it is not surprising that the volume of business is ever increasing.

With the advance of the times greater precaution is taken in every branch of life. The manufacturer, farmer, doctor, the scientist, and in fact in every field of research the latest of scientific methods are brought into play to make for efficiency and advancement. This is equally true of the seed business and the modern firm in this line must be one of advanced ideas regarding the scientific production of seeds that are pure, tested and reliable.

The management has made a scientific study of the needs of the terri-

tory in seeds and secures special brands that suit the soil of this section of the state. Every farmer should call around here occasionally and see how production can be increased.

Their brand is by far the better mixtures of grasses offered for the purpose of quickly producing a permanent lawn. It is prepared from a special formula, and is a careful blending of varieties adapted to this climate. It is also highly recommended to be sown over our country lawns, as it gives you a nice velvety lawn during the year and rebuilds your old lawn.

The matter of price has also received attention here, for it has become a well-established fact not only in the city but in the surrounding country that the quotations of this store are always as low as is consistent with sound business. They permit no one to offer greater values, just as they permit no one to offer higher quality, and this happy combination has resulted in a large and ever increasing patronage.

We wish to compliment them and direct your attention to this establishment as one of the reliable business institutions of the community which has added to the development and progress of this part of the terri-
