Road Versus Rail

It is now many years since the express of the railway business in England and Scotland services used to race against each other, and there is today very little "sporting interest" in connection with trains. On the continent, a new form of railway racing is growing up some time ago, touring cars being used for the purpose. This road versus rail racing is now discouraged in Europe. However, it is catching on so much in New Zealand that a recent race between a car and the Wellington-Auckland train was broadcast throughout the country. The race took place at night and, despite the handicap of bad and very hilly roads, the car won by half an hour.

At one time he ran a pressing club here on Turner street. He is a one armed man and has a large family. His sentence was six months on the roads.

Old-Fashioned Miser
Perhaps it is just the return to the modest manners of grandmothers' day, which has come with so many of the new fashions, or perhaps it is something to do with the depression, but whatever the reason, the miser's purse of yesterday is with us again, says the New York Herald Tribune.
You will know this purse when you see it, crocheted of silk thread and steel beads in the form of two small pouches, each closed with a ring which slips over the opening, and hung to the finger by another larger ring in the middle. It is a new and different kind of security deposit, and reasonable in price into the bargain.
