TIMELY FARM QUESTIONS ANSWERED AT STATE COLLEGE

By F. H. Jeter
RALEIGH, Sept. 19—

Q. My cowpeas and soybeans show very little growth and in many spots have died. What is the cause of this and what can I do to correct this trouble?

Ans. The cause of the plants failing to show good growth and dying in isolated spots is the dry weather and the resultant hard soil. The extreme dry weather this year has caused many crops to fail and some of them to die where the soil was hard. Due to this condition the roots

could not grow deep enough to maintain contact with the lower water table and the crops made poor growth.

Q. Will the use of electric lights with my chickens during the fall and winter months give greater egg production?

Ans. Much investigational work has been conducted along these lines during recent years and uniformly good results have been obtained. The use of lights will increase the working hours for the flock which will bring a greater consumption of feed and a corresponding increase in egg production. While eggs produced in this way are often used for hatching, this practice is not recommended as the chicks will, as a rule, be backward and subject to all poultry ills.

Q. At what rate and at what time should nitrate fertilizer be applied to Chrysanthemums?

Ans. If the soil is made fertile at the time the plants are set it is not necessary to apply any additional plant food until the flower buds are formed. When the buds are formed nitrate of soda or sulphate of ammonia may be applied as a top dressing between the rows at the rate of one ounce to each square yard of soil. This should be thoroughly worked into the soil. A light mulch, one or two inches thick, of fresh cow manure may also be used. If this is used the plants should be watered as soon as the mulch is applied in order to soak into the soil the available plant food. With the commercial fertilizers, light applications of about one ounce to the square yard should be made every two or three weeks until the flower buds begin to show color.

The KITCHEN CABINET

(A Western Newspaper Union)

To me it seems as if when God conceived the world, that was poetry: He formed it, and that was sculpture: He varied and colored it, and that was painting: And then, crowning all, He peopled it with living beings, and that was the grand divine, eternal drama. —Charlotte Cushman.

THE TASTY TORTE

For the cake par excellence, the torte is one of the daintiest. Our German cooks excel in this kind of a cake combination. They are rich with nuts, chopped or rolled fine, plenty of eggs and crumbs, with spices. The baking is another important point, as slow, careful baking is necessary for a light and tender torte.

Schaum Torte.—Beat three egg whites until stiff but not dry, add one cupful of sugar very lightly and gradually, not to lose the lightness, a pinch of salt, one-half tablespoonful of vinegar and one-half teaspoonful of vanilla. Bake in two deep layer tins for one hour. Put together with whipped cream, or add nuts and chopped pineapple with the cream.

Walnut Torte.—Beat the yolks of six eggs with one cupful of sugar, add one-fourth pound of walnuts and six lady fingers grated, two tablespoonfuls of flour and one teaspoonful of baking powder. Add the juice and rind of a lemon and when all the ingredients are well mixed, add the stiffly beaten egg whites to which a pinch of salt has been added. Bake in layers in a moderate oven and use the following:

Filling.—To one beaten egg yolk add two tablespoonfuls of sugar, and three-fourths of a cupful of milk. Cook, stirring constantly until the mixture coats the spoon, add one and one-half cupfuls of grated walnut meats with a flavoring of almond and vanilla. Use between the layers and ice the top of the torte.

Date Torte.—Rub sixteen dates to a smooth paste with two tablespoonfuls of lemon juice. Beat two whole eggs, add seven yolks, add one and three-fourths cupfuls of sugar, beat well, add the dates, three tablespoonfuls of grated chocolate and one teaspoonful each of cinnamon, allspice, and a cupful of cracker crumbs. Stir well and fold in the stiffly beaten whites of seven eggs. Bake in a large spring form forty minutes.

Nellie Maxwell

Business Men

Need Banking Facilities. Paying bills with currency is rather an inconvenient method. Small bills can be paid in this way but even those had better be paid by check. Merchants, farmers, manufacturers and professional men can best settle their accounts with checks. By this means they can keep a record of what they are doing. A cancelled check is a good receipt.

THE PEOPLE OF CARTERET COUNTY

who are in need of the conveniences of a bank are invited to open accounts with us. Your business will be appreciated of course and we will do every thing in our power to make our relations pleasant and profitable to you.

The Bank Of Morehead City
