YOUNG TAR HEEL FARMERS PLAN SUCCESSFUL YEAR

By C. S. Long
Agricultural Instructor

NEWPORT, Oct. 11—The Newport chapter of Young Tar Heel Farmers met Tuesday October 4, 1932, in the agricultural classroom. The chief purpose of this meeting was the election of officers. The following officers were elected: Cornell Garner, President; Cleveland Garner, Vice-President; Durwood Hill, Secretary; Roy T. Garner, Treasurer; Richard Garner, Reporter; Elbert Mann, Assistant Reporter; Durwood Swain, Doorkeeper.

At this meeting there were several other topics discussed; the annual Young Tar Heel Farmer program; paying the state dues and the district score card. It was decided that regardless of the so-called depression, this, our third year of age, will be outstanding. Several means of raising money for financing our shop program and White Lake Camp were discussed. The club plans to meet twice each month this year, and it is our aim to have an interesting and educational program arranged for each of these meetings.

The agricultural teachers of group II whose personnel consists of L. G. Matthis, Vanceboro, Chairman; M. A. Morgan, Dover, Secretary; C. S. Long, Newport, Reporter; W. L. McGahey, Aurora, and G. A. McClenny Swan Quarter held their regular monthly meeting Thursday afternoon, October 6, 1932, at the Vanceboro Farm Life School. The topics for discussion at this meeting were planning shop work and selecting projects.

Mr. E. N. Meekins, District Supervisor of Vocational Education, was present at this meeting, and had some very good suggestions to offer in regards to shop work planning and project selection.

These monthly meetings are very beneficial instructive. Their chief purpose are the exchanging of ideas and plans, and to suggest and discuss new methods by which each teacher will probably be more successful in the organization and instruction of his pupils in Vocational Agriculture.

There is only ONE 5-STAR MOTOR OIL

QUALITIES	PARAFFINIC OILS	NAPHTHENIC (ASPHALTIC) OILS	Essolube (HYDROFINED)
KEEPS BODY	★		★
WINTER FLUIDITY		★	★
LOW CARBON		★	★
LOW CONSUMPTION	★		★
LONG LIFE	★	•	★

The perfect motor oil must excel in five qualities—ability to keep its body, winter fluidity, low carbon, low consumption, and long life.

The best Paraffinic oils rate well in three of these qualities. They are deficient in two. Naphthenic (Asphaltic) oils rate well in two of these qualities—are deficient in three.

There has been no commercial method—before hydrofining—which could combine the good qualities of these two types of oils.

Essolube, the hydrofined oil, combines these qualities for the first time. It keeps its body under tremendous engine heat and at extremely low temperatures. This means protection for your engine at all temperatures—less wear on your motor and fewer repair bills for worn-out parts—less wear on your

battery. It has winter fluidity. This means it flows freely in cold weather and reduces wear on your motor during winter. It has next to no carbon—this means fewer repair bills for carbon cleaning jobs. It gives you low consumption. This means it lubricates longer, reduces bills for worn-out bearings, reduces oil bills. It has long life. This means it doesn't sludge—fewer oil changes, further savings on oil bills.

Essolube—the Esso of motor oils—is on sale at all dealers and stations of the following companies at no extra cost: Standard Oil Company of New Jersey, Standard Oil Company of Pennsylvania, Standard Oil Company of Louisiana, Standard Oil Company, Incorporated in Kentucky, Colonial Beacon Oil Company, Inc.

Essolube

FREE BOOKLET—"Essolube, A Five-Star Motor Oil," gives you the story of the great hydrofining invention which makes Essolube possible. Ask for it at your "Standard" station.
