

A Newsy Trip Around The World

By Elizabeth Saunders

One of the world's most unusual fountains, located in a hot and waterless region of North Africa, gets its water from the air—not from the ground or clouds. It contains 3,000 large slats which collect the vapor that condenses on them through the great change in temperature occurring between the hot days and the cold nights.

John Harris was fined \$10 in Barrington, N. J., for driving a truck which was minus tail light, springs, brakes, exhaust pipe, hood, headlights, fan belt, flooring, mirror, and had a tomato-can carburetor and only three tires.

Steven Clemente of Hollywood, Calif., who does knife throwing scenes for the movies, charges \$15 to throw at an extra, \$25 at a featured player, and from \$50 to \$100 at a star.

Ever hear of Snorri Karlsefni? No? Well, according to Dr. Amadus Johnson of Chicago, decipherer of old Scandinavian records, Snorri was the first white child born in America, in 1004, some 583 years before the birth of the famed Virginia Dare.

Many eloping couples get married at Satan's Kingdom on the Connecticut-New York State line. A satan of a name for a wedding place.

Arthur Hubbell, called the "human inner tube," of Oklahoma City, Okla., can expand his waist 40 inches by pumping air into his mouth.

Roy Head, bachelor farmer of Pioneer, La., has joined the women's demonstration club to get some pointers on home life.

The European book-collecting world received a shock recently when about 40 famous "first editions," which have been accepted as genuine in all standard bibliographies for 50 years were found to be forgeries. In most of them either the aper or the type or both did not exist at the time the books were supposed to have been printed. And in some cases the text was taken from revised editions.

Dr. Cruz of Vienna declares that few women have legs which are mates, and that in most cases the difference between the two is very marked. It must have been an interesting survey which led to this conclusion.

Scotland's first woman minister, Mrs. Vera Kenmore, recently had to resign from the ministry when she became a mother.

Mrs. S. M. Basham of Oregon City, Ore., celebrated her 83rd birthday recently by starting to learn to write.

"All tables must be firmly screwed to the floor, beer may be served only in paper cups, and no bottles are permitted on the premises."—This was the disarmament ukase of the police of Berlin during an election campaign.

Although she is 104 years old, Miss Eleanor Hadow, of Leamington, England, rides a motorcycle which she learned to drive 14 years ago.

Widows who have not remarried are held in such high esteem in China that p'ai-lous, or memorial arches, are erected in their honor. These gateways, which are made of elaborately carved wood, sandstone or marble, are often 50 feet high and usually built over streets and roads, sometimes only a short distance apart when the community has a number of them.

Mr. and Mrs. Elmer Tew of Af-ton, N. Y., are the proud parents of twin daughters, often referred to as the Tew twins.

The Chinese usually tell fortunes by reading the lines of the feet as well as those of the hands; the Swedes seldom fail to shake hands with one another after they have finished a meal either at home or in a restaurant; and many Negroes in our Southern states still leave the price tags in new suits of clothes to show that they were not made at home.

When Edward Bonebright, farmer of Springdale, Mont., broke his leg he improvised a crutch from a shovel and hobbled three miles for surgical aid.

A History of the World War, being prepared by the Carnegie Endowment for International Peace, already comprises over 150 volumes.

an auto accident at Huntington Park, Calif., in which there were serious injuries.

Larry E. Anderson, 26, expert penman of Los Angeles, Calif., has written 53 eligible letters on a grain of salt.

COLD STORAGE PLANTS NEEDED IN EAST CAROLINA ETHERIDGE SAYS

By R. BRUCE ETHERIDGE, Director N. C. Department of Conservation and Development

To state that the commercial fisherman has been a heavy sufferer from the effects of low prices and general stagnation of business may seem trite, but to point out that little of a permanent nature has been done to place him in the same status with those engaged in other occupations is only justice to a large group of our population.

Quick-freezing and storage plants will be in the nature of both temporary and permanent relief for a branch of industry that remains almost prostrate. Further it will fit in excellently with the established policy of preserving the surplus of food and other necessities for distribution to those in need of immediate relief.

Briefly summed up, the erection of quick-freezing and storage plants for fish give promise of accomplishing the following:

1. Prevent huge wastes in one of

the most valuable forms of food in which there is a deficiency in the diet of most inland residents.

2. Provide immediate markets for surplus stocks of food for which fishermen receive no returns, thus providing immediate relief for a large group whose income is frequently below that necessary for a decent standard of living.

3. Furnish additional stocks of food for cases now on relief rolls and for others during the winter when the need is usually greatest.

4. Establish means for holding surplus stocks of seafoods until markets provide outlets with at least a small margin of profits.

5. Lead the way to new methods of marketing that will enable the consumer to receive a more palatable and better preserved product. Quick-freezing preserves the tissues intact without breaking down the cells. Spoilage sets in earlier and affects adversely the taste of seafoods when cell walls are broken.

AMAZE A MINUTE

SCIENTIFACTS BY ARNOLD

THE EARTH'S GREAT SPEED!
A RIFLE FIRED IN THE DIRECTION OF THE EARTH WOULD NEVER REACH IT, AS THE EARTH TRAVELS 60 TIMES FASTER THAN A BULLET.

FROG WINKS
WHEN FROGS WINK THEIR EYES, THE LIDS MOVE UPWARDS.

AIR BURNER
A SINGLE BLAST FURNACE WILL CONSUME 37,500 CUBIC FEET OF AIR PER MINUTE.

6. Preserve the initiative and self-reliance of a highly individualistic group which, as a rule lives in the most inaccessible portions of the State and has no other source of dependence except upon the water.

7. Provide larger purchasing power, thereby improving general purchasing power and helping business throughout fishing communities.

8. Help develop one of the most valuable natural resources in North Carolina.

No accurate figures are available on the waste of fish from the lack of markets; but it has been great, particularly in recent years. The catch of seafoods is extremely uncertain, being dependent upon the elements and seasons. Seafoods are among the most perishable of all commodities. A time of plentiful yield is usually followed by a stagnation in markets and abrupt drop in prices, often below the price of production. It is in such cases that the most modern methods of preservation and storage will prevent tremendous waste of one of the most valuable natural resources of our State. A comparatively recent case where a fisherman gave away several thousand pounds of fish rather than to take a price that would not compensate him for his time has come under the observation of officials. Another case where an entire boatload of fish consisting of more than 20,000 pounds was dumped at sea because the markets would not absorb the product has been brought to our attention.

Under such conditions as these, the total return to the fisherman in North Carolina has shrunk from \$2,629,214 in 1928 to \$827,000 in 1932, according to latest estimates from the U. S. Bureau of Fisheries.

During the recent years the fishermen have suffered severe losses in nets, boats, and other equipment from storms. The Department of Conservation and Development estimated that damages from the storm of September, 1933, in North Carolina was approximately \$150,000. This included only damage to fishing equipment and not to the homes and other properties owned by the fishermen. Any assistance at this time will be of material value to those who have not been helped directly by other means.

The Surplus Relief Administration

has purchased huge supplies of agricultural products for distribution to the needy. Seafoods will give a more rounded diet for those dependent upon relief rolls for food. Medical authorities are in agreement that the average family does not consume sufficient seafoods for a properly balanced diet. In this connection, the late Dr. Chas. O'H. Laughinghouse, State Health Officer, said: "A majority of the people of North Carolina do not consume more than a small per cent of the quantity of fresh fish and oysters that they should. In these times when every family, both in town and country, is a large consumer of canned goods, it is more important than ever before that there should be an increase in the quantity of oysters, in season, and fresh fish on ever table. This is necessary in order to maintain a proper balance in the kind and quality of food for good health." Dr. J. M. Parrott, present State Health Officer, has recently suggested an exchange of seafoods and fresh fruits and vegetables as a measure of absorbing surpluses and promoting best health.

ADMINISTRATOR'S NOTICE

North Carolina, Carteret County, Having qualified as Administrator D. B. N. C. T. A. of the estate of Sarah C. Arendell, deceased, late of Carteret County, North Carolina, this is to notify all persons having claims against the estate of said deceased to exhibit them to the undersigned at Beaufort, N. C., on or before the 16th day of August, 1935, or this notice will be pleaded in bar of their recovery. All persons indebted to said estate will please make immediate payment.

This 14th day of August, 1934.
E. W. HILL,
Administrator D. B. N. C. T. A. of Sarah C. Arendell. Sep 20

STRAITS

Mr. Norman Chadwick left Saturday for Boone, N. C., where he will attend college.
Mr. D. M. Davis of Southport spent the week end here with his mother Mrs. Lizzie Davis.
Mr. and Mrs. Burton Stewart left

Saturday for Durham after spending some time with his parents Mr. and Mrs. Wilbur Stewart.

Mr. Norman Whitehurst and sister Miss Mattie Whitehurst of Elizabeth City spent the week end with Mr. and Mrs. Robert Davis.

Mrs. George Whitehurst and son Gilbert spent a few days at Kinston with relatives.

Mr. Ira Chadwick and son Walter and Mr. Roma Pigott were at Southport Wednesday.

IN MEMORIAM

In loving remembrance of our dear baby, George William Scott, who died September 6, 1932.

September the sixth again is here To us another sad day of the year Because today recalled the memory Of our darling laid to rest.

Just two years ago today you left us, And we miss you more each day, For little did we think the angels Would so soon take you away.

From the world of sorrow and pain To the land of peace and rest, God has taken you dear darling Where you have found eternal rest.

Lonely the home and sad the hour, Since from us you have gone, For a brighter place than ours In Heaven is now your own.

Though surrounded by friends we are lonesome; In the midst of pleasure we are blue A smile on our faces and a headache Always thinking of you.

We mourn for you in silence; Tears of sorrow silently flow, But our memory keeps you near us, Though Heaven claims you as its own.

Mr. and Mrs. C. W. Scott Beaufort, N. C.

LOOK! WHO'S COMING LOOK!

Mr. S. B. Coles, a Missionary from Angola, West Africa will be at St. Stephen Congregational church Friday night Sept. 7, at 8:00 o'clock. The public in general is cordially invited. Get your seats early!!
Rev. N. C. Calhoun.

Here's the Fireless Steam Locomotive

REGARDED at first as a mere whimsey of a fanciful inventor, W. J. Kremer's fireless steam locomotive is being successfully utilized in the Brooklyn Navy yard. This latest product of the machine age dispenses with the conventional fire box, but boasts instead a water tank. Capable of moving at 12 miles per hour, the engine has treble the power of other engines its size.

DJER-KISS TALCUM
For Particular People

• All the world knows Djer-Kiss is foremost among all Talcums. For the whole family, after bathing, it is indispensable. Use it daily. Softer, finer, absolutely pure—it protects and absorbs. The delicate, inimitable Djer-Kiss fragrance, of course. White and Rose.

Jumbo Size \$1.00
Regular Size 25¢

Djer-Kiss TALCUM POWDER
C. J. and Djer-Kiss Parfums in a dainty Vanette, Purse Size 25¢
