

Money Island Beach On Fort Macon Road Scene Of duPont Experiments

Experiments underway at Money Island Beach during the past week have proven that dynamite when properly placed beneath a dry sandhill and exploded will do the work of many mules, drag-pans and laborers and estimates by engineers on the project show that it can be done at a lower cost and quicker. W. W. Alford, representative of the explosives department of E. I. duPont de Nemours Company, has been conducting the experiments.

Money Island Beach, is the development located at old Ocean Beach Properties. The name of the firm building the new beach is Morehead Properties, Inc., Capt. George Brooks of Beaufort is resident engineer on the job. When completed a graded road leading from the Atlantic Beach-Fort Macon pike will have been constructed, leading to the hotel, now under construction near the surf on the beach. Many sand-hills will be leveled and the property subdivided will be sold to persons who want to live in a residential beach area. The name of the properties is derived from Money Island on the sound side, so called because of legends of buried treasure dating back to days of piracy.

INFANTRY COMES TO CAMP SUNDAY

National Guard Units Will Be Put Through Intensive Training During Two Weeks Encampment

The first detachment of soldiers will arrive at Camp Glenn Sunday for their annual encampment. Other units will follow and almost overnight the deserted camp will be full of life and soldiers. The soldiers are members of the 120th Infantry, North Carolina National Guard. During the daylight hours the soldiers will be put through extensive training. Off duty hours will find them swarming the streets of Morehead City, Beaufort and Atlantic Beach.

According to Adjutant General John Van B. Metz, the 120th Infantry units will be brought to Morehead City by special and regular trains over several lines. The annual regimental ball will be held on Thursday night, July 18, at Atlantic Beach hotel.

TRENTON DEFEATS LOCAL TEAM HERE SUNDAY

Beaufort was defeated by The Trenton Service Club beer last Sunday 12 to 7. Batteries for Trenton, Scott and J. Hill, eBeaufort Brooks, Willis and Potter. Oriental plays here Sunday, July 7th.

SMALL CRAFT

Many boats similar to the one pictured above will take part in the races to be staged in Morehead City this afternoon. D. G. Bell chairman of the sail class vessels stated last night that over 20 had entered and that approximately that many more were expected to take part in the annual trophy events starting at 2 o'clock. Jimmie Alvin Willis had charge of the motor boat races this morning.

Fisheries Commission Meets Next Monday

Fishermen along the North Carolina coast who have important matters pertaining to their profession they wish to air should make an effort to be in attendance at the meeting of the Department of Conservation and Development in Morehead City on July 8-9. Important matters pertaining to this industry as well as conservation matters all over the State will be discussed at the meeting.

DIRECTORS OF A. & N. C. TO MEET ON SATURDAY

Important matters will be discussed by the board of directors of the A. and N. C. when they meet at Edgewater Club on Saturday. The outcome of the meeting will have much to do with whether work begins immediately on Morehead City's Port Terminal, it has been stated.

HOME DEMONSTRATION CLUBS

- Monday, July 8th—Stacy Oak
- Tuesday, July 9th—White Oak club.
- Wednesday, July 10th—Smyrna club.
- Wednesday, July 10th, 8 o'clock—Otway club.
- Thursday, July 11th—North River club.
- Friday, July 12th—Peletier club

ROAD TO SALTER PATH DISCUSSED BY COUNTY BOARD

Forward Resolution to Highway Officials Urging Building of Route Leading From Atlantic Beach Road to Isolated Fishing Village

MOSTLY ROUTINE BUSINESS

Properties in Morehead Bluffs Assessed at \$1,500; Three Lots There Had Never Been Listed for Taxation

In a resolution passed by Carteret commissioners on Monday the State Highway and Public Works Commission were urged to incorporate in the county system "that certain road in Salter Path leading from the community to the waters of the Atlantic Ocean for connection with Atlantic Beach properties so as to permit connection with the road and bridge to the mainland." The highway group were urged to give prompt and favorable consideration to this petition.

With a road leading to Salter Path tourists will have the opportunity of driving direct to one of the most written about, most unique and perhaps the most isolated fishing villages along the Atlantic Coast. The good citizens of that community deserve all the consideration, the Highway group will show, just as the citizens of Merrimon and Cedar Island deserve consideration, or if not consideration, or if not consideration, at least a passable all weather road.

Other matters coming to the attention of the board at the Monday meeting were in the following minutes:

Upon motion it is ordered, that the bid of C. D. Jones & Co., for supplies for the County Home for the month of July be accepted.

Upon motion it is ordered, that beer licenses be issued to the following: Atlantic Beach Corporation and Motor Inn Service Station.

Upon motion it is ordered, that various bills presented for payment be ordered paid, except E. M. Chadwick and L. W. Hassell's the same pending correction.

Upon motion it is ordered, that State Highway and Public Works Commission be requested to change location of county road between Core Creek and Harlowe Creek, in such manner as to meet the requirements of the bridge now under construction by U. S. Government across Inland waterway.

BEAUFORT OUTSKEETS NEW BERN

With a score of 218 out of a possible 250, Beaufort's skeet club won over New Bern on their field Tuesday afternoon in a 250 target event. New Bern's score was 205 out of 250. Those firing for the locals were Hancock, Mason, Nelson, Noe and Taylor. On the New Bern team were: Cook, Dr. Menius, Mitchell, Springle and Harker.

Covering The WATER FRONT By AYCOCK BROWN

A DEEP SEA DIVING party made Beaufort their base this week while they made an attempt on two or three occasions to find the wreck of the Thistleroy, cotton laden vessel which sank off Cape Lookout back in 1912. Members of the party seem to think that if the hulk could be located it would be possible to salvage much cotton. But so far they have not located any sign of the wreck, or if they did, the sunken craft was not positively identified.

IN THE PARTY WHICH is financed by persons whose names were not revealed, were the following: Mr. and Mrs. W. O. Lee, L. H. Barnes, C. L. Clark, Capt. C. Guttrall and Capt. John Mogg. The latter two are divers. They came here from Norfolk.

CAPT. MOGG, A GENIAL Australian went down some sixty feet Tuesday to the hulk of an old iron vessel which had just about rusted away. We asked him how things looked down there. He told us about small fishes by the millions which swarm around one's helmet. They are from his description, probably the fry of Sheepshead and Black Fish. Occasionally there will be a school of brilliant colored fishes passing by. They are probably yellow-tails, inhabitants of

She Sails To Blue Water

Schooner, "Luther M. Werner."

Chartered early this season by Edgewater Club, for an indefinite period, the Luther M. Werner, under command of Capt. William Casey has made angling history for this section of the coast. On many voyages to the Gulf Stream off Cape Lookout during the past few weeks, guest-members or those extended the privileges of Edgewater Club and use of the boat, have yet to make a "water-haul." By that we mean that fish dolphin and amberjack or both have been taken by anglers on every cruise the schooner has made to the Stream. Comfort and safety combined makes the craft ideal for off shore fishing, and men, women and children have made notable catches while fishing from aboard the vessel out there in Blue Water.

Parasitic Protozoan That Looks Like Leaf Of Clover Discovered

The first line of the above head has you guessing. It has anyone except a scientist guessing but it has to do with an oyster pest that is destroying the bivalves by the millions. Dr. Prytherch, director of the laboratory on Piver's Island, discovered the pest.

Now planters are trying to discover some way to combat the microscopic parasite and thus save the oyster beds. So far no name has been found for the protozoan, although it has tentatively been identified as one of the Haplosporidia. With the naked eye it cannot be seen, but under a powerful microscope, it makes the tissues, or gills and muscles of an oyster look like a patch of three and four leaf clovers. In oysters examined that were infected with the parasite, Dr. Prytherch has discovered from 50 thousand to one and two million per oyster. But the parasite is not injurious to humans and does not present any cause for alarm to oyster eaters.

Locally the pest has not made its appearance in large quantities, but in Mobjack Bay, Va., and in Terrebonne Parish, La., oyster planters have lost stock amounting to millions of dollars. Because he is undoubtedly the best informed man on this oyster pest and because he made the discovery of the parasite protozoan that looks like a three or four leaf clover, Dr. Prytherch has been appointed director of a gigantic oyster pest control program in states of the Atlantic coast which Congress has recently appropriated approximately one hundred thousand dollars.

No Ocean Sunfish In Stomachs Of Dolphin Dr. Gudger Disected

We sent Dr. E. W. Gudger, noted ichthyologist of the American Museum of Natural History in New York several stomachs of dolphin caught off Cape Lookout. He is making a study at this time of Ocean Sunfish and wanted to know if dolphin, swift swimming inhabitants of the Gulf Stream off Cape Lookout, at the young of the pointed tailed sunfish. Following the receipt of the first batch of stomachs forwarded Dr. Gudger by the editor of this newspaper, who is a sort of field representative for the ichthyologist, the following excerpt from a letter received, is of interest:

"To my regret, and I am sure to yours also, I did not find any young of the ocean sunfish. However, there were two small fishes of interest to my colleague, Mr. Nichols. From several of the stomachs I found various

A BANANA PEELING CAUSE OF INJURIES

Miss Elizabeth Ratcliffe, daughter of Mr. and Mrs. J. A. Ratcliffe was painfully injured last Thursday when she slipped on a banana peeling. This banana peeling was not on Front Street in Beaufort but in New Bern. Miss Ratcliffe is employed by the Kress Chain store in New Bern and was able to return to work yesterday, according to reports given by her mother.

MRS. SARAH J. DEY

Funeral services for Mrs. Sarah J. Dey were conducted last Friday afternoon in St. Paul's church here. She died on Wednesday. Burial services were conducted in New Bern where her late husband, Charles P. Dey lies buried. She had lived in Beaufort for several years. Mrs. Dey was a native of Caldwell, a mountain county.

Pink Bloomers and Butter Feature Evidence of Trial

Charged with stealing one pound of butter, valued at 35 cents, from the Service Market in Morehead City, on June 24, Mrs. Clara Ortlieb of that city, was found guilty of the allegations when tried before Judge Paul Webb here on Tuesday during a record breaking session of Recorder's court. Judgment was deferred until next Tuesday and indications are that after judgment is imposed, the defense will appeal to Superior Court.

Magistrate Henry Noe, heard four hours of the preliminaries of the case last Friday night in a packed courtroom. After hearing the evidence offered, he found probable cause and bound the defendant over to Recorder's Court under a bond of \$100.

E. C. Willis, manager of the Service Market had Mrs. Ortlieb arrested, alleging that on June 24, she entered the establishment and purloined the "now famous" pound of butter. Several witnesses for the State testified that they saw Mrs. Ortlieb conceal the butter beneath her dress, (petticoats and bloomers were often mentioned during the hearing) and that same was removed after she had walked to the sidewalk, either in front of the vegetable rack or adjacent to the car in which the defendant's daughter was sitting. Witnesses further testified that after handing the object to her daughter, the daughter drove off, going around the block to return within a few minutes. Defense witnesses testified that the car was backed out into the street, but

that it was not driven off, as alleged. Mr. Willis sent his son for Chief J. N. Willis to come and arrest the woman. Chief Willis, who is Morehead City's most popular officer, testified that he found no butter, even though he was invited to make a thorough search of the car and of the defendant's person. He searched the car and Mrs. Ortlieb insisted that he see for himself that she had no butter concealed beneath her dress. In raising her dress, Mrs. Ortlieb displayed certain undergarments. Chief Willis testified that the "bloomers" the defendant was wearing were pink. "Anyone in close proximity of the car could have testified to the pink bloomers episode, as it was of the defendant's own accord she made the display.

So far no butter has been produced as evidence. Damaging evidence was offered by many witnesses however, and one, Fred Guthrie stated on the stand that he had been offered \$5 to testify in behalf of defense. Witnesses for the defense testified that the car was never driven away from the front of the store. The woman was found guilty, nevertheless, and after judgement is rendered by Recorder Webb, next Tuesday, indications are that an appeal will be taken to a still higher court.

Other cases on the docket disposed of or continued to future terms of court were the following:

Jack Greer, violating prohibition (Continued on page five)

TIDE TABLE

Information as to the tides at Beaufort is given in this column. The figures are approximately correct and based on tables furnished by the U. S. Geodetic Survey. Some allowances must be made for variations in the wind and also with respect to the locality, that is whether near the inlet or at the heads of the estuaries.
