Box 477  
BEAUFORT, N. C.

A tremendous increase in soil fertility on 20 acres of land seeded to Korean lespedeza and grazed by 30 cows is reported by Knox Brothers of the Steel Creek section of Mecklenburg County.

Scotland County farmers are apprehensive over a probable infestation of screw worm since the worm has appeared in adjoining counties of South Carolina.

**September Weather Very Pleasant Here**

According to the weather report for September as furnished by the U. S. Weather Station of Pivers Island, there were 23 clear days, 5 cloudy and 2 partly cloudy ones. The hottest day was on the 7th when the temperature went as high as 88 and the coolest was on the 30th when the mercury dropped to 56 degrees during the 24 hours period that day. The rainfall was 6.99 inches. The temperature day by day is as follows:

	Max.	Min.
1.	80	66
2.	85	70
3.	82	70
4.	87	73
5.	87	76
6.	86	75
7.	88	74
8.	86	71

27.	86	70
28.	85	73
29.	84	70
30.	74	56

**When to Plant Roses**

In those sections where the temperature never goes below 5 degrees above zero, fall planting is best as the plants set at that time will make better growth the first season. The planting, however, should not be made until the leaves have fallen from most of the trees and shrubs. Only field-grown, dormant plants should be selected for fall planting. Set the plants two or three inches deeper than they were in the nursery row or pot and wide enough apart to permit the roots to spread out as they naturally grow. Where the temperature runs below 5 degrees spring planting is preferable.

**Well, Well! Just look who's now in the ROGUES' GALLERY**

- George Ade
- Julian Street
- Nina Wilcox Putnam
- Frank Condon
- Kay Kennedy

You wouldn't expect to find them in such company, but there they are, along with others of the most famous writers of the day.

The Rogues' Gallery we are talking about happens to be a different kind of Rogues' Gallery from the one you probably are thinking about. It comprises a series of the breeziest, most mirth-provoking sketches that it has ever been your good fortune to have an opportunity to read.

Watch for the **ROGUES' GALLERY** in future issues of this paper

You can't afford to pass up a chance to read these brilliant sketches by the most famous writers in the field of humor.

Eleven Alamance County farmers will start new crop rotations following a recent visit to that county by Enos Blair, extension agronomist at State College.

**VICTIM OF BANDITS RETURNS HOME**

**Miss Dorothy Sanderlin** Miss Sanderlin was expected home in New Bern today after spending several weeks in Aston Park hospital, Asheville, where she was taken in a critical condition after being mowed down by a bank bandit's sub-machine gun early in September, in the college town of Mars Hill where she was a student. She was expected to reach Goldsboro by pullman and an ambulance from New Bern to meet her there. Miss Sanderlin is a member of Eastern Carolina's younger social set, is well known in Beaufort, and has a host of friends here, all of whom are very happy to learn her condition has improved to such an extent that she can return home.

**Courses For Ambitious Youths In U. S. Marines**

Depression times have left a large number of school graduates among the persons who are floundering in a sea of economic uncertainty, according to Major Clarence Nutting, who interviews many applicants for the marine corps at his office in the New Post Office Building, Savannah, Ga. Many of these young men are ready for the battle of life, but they find the door of opportunity closed to them. Naturally they are puzzled by the turn of affairs in a changing world, which apparently have robbed them of a foothold on the ladder which leads to success, Major Nutting says.

The U. S. Marine Corps, has provided a loophole for the ambitious young man who is not content to mark time while the country is working its way out of the current depression.

It has established an educational system that is sure-fire for any worth while youth who is determined to go ahead, and which has proved itself to be as nearly perfect as human ingenuity can make it.

Fortunately the system is so arranged that the basic education of the student, whether it be high school or college, leaving no limit to the heights which may be reached. It is literally a school in which anyone may receive instruction with decided profit to himself.

Starting about fifteen years ago as an experiment, the success of the Marine Corps Institute has been astounding. Hundreds of Marines have received diplomas in arts, trades or

science. With its units scattered all over the globe from Panama to Peking, the correspondence method was adopted as the only practical method. It has worked perfectly. From the school at Washington, diplomas often go to men who have made good as students in China, the Philippines, Hawaii, and elsewhere.

We believe that our Institute has more than fulfilled its plans to produce the best educated military service in the world, and it is helping to solve many a young man's problem.

High school graduates from Virginia, North and South Carolina, Florida and South Georgia are now being accepted for service in the Marines at the Marine Recruiting Station, Post Office Building, Savannah, Ga. Applications will be mailed upon request.

**October Is Time To Plant Flower Bulbs**

Raleigh, Oct. 8—Flower bulbs are to blossom in the spring, such as tulips, hyacinths, narcissi, and grape hyacinths, may be lanted in October, or as late as mid-November in eastern North Carolina.

The ideal soil does not pack, is crumbly and moist, yet well drained, said Glen O. Randall, professor of floriculture at N. C. State College.

When preparing to plant bulbs, plow the soil to a depth of 10 inches, then pulverize it thoroughly, he recommended.

Stable, manure, thoroughly decayed, is a good fertilizer. If decayed manure is unavailable, bone meal may be used, or a complete fertilizer containing 4 to 5 per cent nitrogen, 8 to 10 per cent phosphorus, and 4 to 6 per cent potash.

A good way to plant bulbs, when they are to be set in clumps or in beds, is to remove the upper four

inches of soil, set the bulbs the desired distance apart, and then cover them with the soil that was removed.

When planting a large area, the soil may first be removed from a space about 3 by 5 feet in size, the bulbs placed in position, then covered from soil from an adjoining area.

This opens up the adjoining area, where bulbs may be set and covered with soil from an area just beyond. This process may be followed until the lot is planted.

In all cases, Randall stressed, apply the fertilizer and carefully prepare the soil before setting out the bulbs.

About \$45,000 was distributed in rental checks to tobacco farmers of Nash County by the farm agent last week.
