### Covering The WATER FRONT

By AYCOCK BROWN

FIFTY SEVEN PEOPLE told me on Monday that Walter Winchell in his Sunday night newscast (Jergen's Program, 9:30 P. M. E. T. T.) acknowledged receipt of a letter I had written him and request that I send him a copy of an editorial I had written about speed maniacs. It so happened that the editorial I had in mind and which was praising Winchell wallows at the fast driving sons of our President was not published in last week's edition of The Beaufort News. Instead I used one about "Crimson Highways To Eternity" because it had a local angle.

THE OTHER EDITORIAL is being printed this week. And this newspaper will continue to praise the Danville, Virginia boy who went to New York and became the world's foremost columnist, when he tells his millions of listeners and readers just what he thinks of fast driving sons of Presidents, Kings, Chief Priests, the Peasantry or any one else . . . or the parent's of the sons if they become speed maniacs when under the steering wheel of an automobile.

CRIMSON HIGHWAYS WILL never become safe ways or happy ways until drunken drivers are eliminated. One way that drunken drivers will not be eliminated from the highways is for courts to let such offenders off with trivial fines or costs of the courts. Crimson highways will not be made safe until court's start taking the evidence of reputable traffic officers and State Highway police in preference to a group of witnesses who might be friendly with the defendant or might not want to see the person arrested prosecuted.

### MIGRATORY WILDFOWL SEASON OPENS NOV. 20

Migratory wildfowl season will open this year on November 20 with a daily bag limit of 10 ducks or four geese. It is believed that since the bag limit was curtailed last year and the season shortened that this year there might be more ducks and geese. Anyone interested in goose or duck shooting may get information about guides and locations to hunt from either of the hardware and sporting goods stores in Beaufort. Managers of these stores will even arrange a hunting trip for you, if you would like.

If North Carolinians consumed the same per capita amount of seafoods as other states in the union, it would require two times the present production to supply the demand.

### Morehead Grid Team Failed To Score In Game With Sea-dogs

By A. R. RICE

Before the largest crowd of the season and one of the largest assemblages to ever witness a gridiron battle in Beaufort the locals rolled up the one-sided score of 26 to 0 over Morehead City last Friday and this, incidentally, was the largest margin of victory ever recorded in a Beaufort-Morehead City game.

The visitors were completely outclassed in every department of the game and never showed anything in the way of an offensive punch. The only wonder is that Beaufort didn't tally twice the number of points that it did. Morehead City made exactly NO first downs all afternoon, a fact itself unprecedented.

After a slow first half that ended with Beaufort shoving over one touchdown, the second half found the winners much more aggressive and three touchdowns were recorded. Frank Rice skirted end for 18 yards and the first six-pointer and then went over center for extra point. David Beveridge hit the line from the one for touchdown. Extra point failed.

Poles that will carry the lines for Tide Water Power company in the electrification of East Carteret have been extended as far as Smyrna. It is hoped by officials of that company that the lines will soon be extended to every community between Beaufort and Atlantic. It will probably be only a matter of a few days before the power will be cut in for Smyrna and immediate communities, and for the first time persons of those sections can have electric lights, and electric service without going to the expense of installing a home plant, such as is already used by some of the families down east.
