COMMISSIONER'S SALE OF REAL ESTATE.

Murder Mystery Thickens
BOSTON, Oct. 11—Investigators revealed tonight that a former admirer of Mrs. Grayce Asquith has confessed he committed a serious statutory offense against the bleached blonde Weymouth widow several weeks before she was hacked to death in her Lakeshore cottage, but denied any knowledge of the slaying.
The offense the man reportedly admitted is punishable by long-term imprisonment. Authorities withheld the man's name. He was held for questioning but no charge has been lodged against him, it was disclosed. The alleged confession was said to have been made within the past two days.

North Carolina Leads In Vegetable Growing

Raleigh Oct. 15—North Carolina leads all other states in the value of garden vegetables grown for home use.

That is the conclusion reached by M. E. Gardner, extension horticulturist at State College, after studying figures recently released by the bureau of the census, U. S. Department of agriculture.

The figures did not cover Irish and sweet potatoes, but they included the other principal vegetables grown American gardens. Mississippi stood next to North Carolina, and Tennessee ranked third.

The value of North Carolina's crop of vegetables grown for home use was placed at \$9,631,010. The Mississippi and Tennessee valuations were between eight and nine million dollars.

In 1935, North Carolina farmers also raised 95,684 acres of garden vegetables for sale, not counting Irish and sweet potatoes, Gardner observed.

This acreage was divided thus: Beans, 22,009 acres; cabbage, 8,516 acres; sweet corn, 9,619 acres; Tomatoes, 5,420 acres; watermelons, 20,240 acres, and other vegetables except potatoes 29,878 acres.

Gardner pointed out that the increased production and consumption of garden vegetables over the nation indicates a change in the dietary habits of the American people.

This is particularly true in North Carolina, he went on, where the people are paying more attention to a balanced diet and where farmers are seeking to live at home by producing on the farm as much of their food requirements as possible.

The greater consumption of garden vegetables is not only conducive to better health, he added, but it is also providing many families with another welcome source of cash income.

Cotton in Union County is late but is well fruited and prospects are good for a normal harvest this fall.

Dig Sweet Potatoes Before First Frost

Raleigh Oct. 16 Don't leave sweet potatoes in the ground until frost nips them, warns L. P. Watson, extension horticulturist at State College.

They are sensitive to cold and will be damaged by frosty weather, he stated. Cold-damaged potatoes will not keep as those which are protected.

If an unexpected frost should kill the vines, he added, cut them off and dig the potatoes at once.

Watson also urged growers to be careful not to bruise or cut the potatoes in digging, hauling, or storing. Blemishes decrease their market value and increase their susceptibility to disease.

A large two-horse turn plow with a rolling coultter attached to the beam and adjusted so as not to cut the potatoes is a good implement for digging. Or a "middle buster" may be used if the rows are barred off.

Don't throw potatoes from one row to another. Three rows may be piled together, since potatoes from the two outside rows may be laid over in the middle without throwing.

When picking up the tubers, place the different grades in separate piles. This saves trouble later. Leave the culls in the field.

Allow the potatoes to remain in the field long enough for the surface to dry so that the roots will be freed from clinging soil. This also avoids carrying excess moisture into the storage house.

Do not fill hampers or crates too full. Overfilled containers may cause the potatoes to be mashed or bruised in transportation or storage. Always clean out storage houses and containers before putting in potatoes. It is also good to let the storage room and baskets air for a few days after they are cleaned.
