Legionnaires Fair Was Big Success

Nothing But Praise On Lips of Those Who Attended Event

PROFITS WERE MADE

Exhibit Hall and Free Shows Big Attractions

Carteret county's greatest fair which was sponsored by Carteret Post 99 of The American Legion came to a close late Saturday night. Thousands of persons from all parts of this and adjoining counties attended and it was a success, both financially and otherwise, for the sponsors, exhibitors and Cetlin and Wilson's famous midway attractions.

The free attractions were just as good and even better than some presented in cities a hundred times as large as Beaufort. The Great Wilno cannon act perhaps attracted more attention than any other free act. This young German was actually shot from a cannon, over two ferris wheels into a net three hundred feet away by air. From Beaufort a town of 3,000 the human cannon ball act moved to Charlotte, largest city in North Carolina for a two weeks engagement and from there will go to Augusta and other cities in Georgia. Almost as sensational was the Sol Solomon diving act. From a perch on a ladder far in the air this daring young man would dive "when the wind was right" into a flaming tank of water 120 feet below.

From Beaufort the Cetlin and Wilson shows moved to Henderson, where a fair is being presented this week.

American Legion officials who had charge of the fair's operation are well pleased with results, despite the fact that due to rain and wind, Friday was a total loss. County authorities had nothing but praise for the way the fair was operated as a matter of fact everyone was well pleased with everything.

The Exhibit Hall was a scene of many beautiful and well planned displays. Mrs. S. E. Hayne had charge of these exhibits which were viewed by hundreds of people each day. Especially attractive was the curb market display, the WPA exhibit and the exhibits of the Morehead City and Beaufort graded schools. Many Carteret county firms had booths in the were on display. Nearby was a less (Continued on page eight)

Carolina Coast To Be Published Soon

Carolina coast, a monthly journal of interest to Commercial fishing will be published soon. The magazine, similar in size and style to Carl Goerch's "State" will be printed under the editorship of John Sikes, president and executive manager of N. C. Fisheries, Inc. He will be assisted by other writers on the coast and elsewhere who are familiar with various stories of interest to the fishing industry from the time the various seafood is caught until it reaches your platter. The first edition will be ready for distribution on around November 1.

ALMANAC

"The opportunity of a lifetime seldom comes to you so labeled"

OCTOBER 22-Sarah Bernhardt, great French actress, born, 1845.

23-American troops abandon Manhattan Island, 1776.

24-A. Taylor is first to go over Niagara in a barrel, 1901.

25-English defeat the French at battle of Agincourt, 1415.

26-Massachusetts organizes Minute Men Militia, 1774.

27-A. Clifford gets first United States baby carriage patent, 1829.

28-First child born in an airplane, near Miami, 1929.

Author of Mathematics

Prof. M. A. Hill

After a period of two years work Prof. M. A. Hill, a member of the University of North Carolina staff has completed a First Year College Mathematics which has been published by the Henry Holt Company of New York. A native of Beaufort, Professor Hill graduated from the University in 1920, but liked college so well that he stuck around to become a member of the faculty. He is the son of Mrs. Sarah Hill here and brother of Hilton, Gerald and R. Hugh Hill and Mrs. Vera Stubbs. The text book he has prepared is becoming a standard for universities and colleges throughout the country. Archibald Henderson, world famous mathematician and authority of George Bernard Shaw—if that is worth mentioning—encouraged Professor Hill to prepare this textbook which covers algebra, trigonometry, analytic geometry, mathematics of finance and other things which prove useful to some people.

London Editor Thanks Beaufort News Editor

From the editorial offices of the News Chronicle, Bouverie street, London, England came a letter of thanks this week to Aycock Brown, editor of The Beaufort News for a trans-oceanic telephone report given on the hurricane which swept the coast last month. The News Chronicle's foreign editor called Brown on Friday afternoon September 18, for data about the storm damage along the coast of Carolina. The letter in part follows:

"The Foreign Editor has asked me to thank you very much indeed for the important information you gave and subsequent copy of 'The Beaufort News' with your story... We are keeping your name and address for reference in case any occasion should arise in the future at which time we will cable you for stories from your section of the United States." Yours Sincerely, Gladys Watts, Assistant to the Foreign Editor."

BARDEN TO SPEAK AT CLUB MEETING

Federation of Women's Clubs To Meet in Legion Hut Friday, October 30

Representative Graham A. Barden, of this Third Congressional District will address a group meeting of all members of the Federation of Women's Clubs in Carteret county at the American Legion Hut in Beaufort next Friday afternoon, October 30, at 3:30 o'clock, it was announced this week. His will not be a political speech at that time, although he has been making two and three addresses of this nature daily in his District for the past several weeks. "He will use as his subject, 'Legislation in Its Relation to Women,'" according to Mrs. Bithye Noe of the Beaufort Club.

The Carteret County Federation includes the Morehead City, Beaufort and Atlantic clubs and while all mem-

STUDIES IN ZOOLOGY

Everyone Likes Him

Susie and Senator

Susie the trained chimpanzee owned by Leo Carrer was the most popular attraction on the Cetlin and Wilson midway at the fair last week until Senator Bob Reynolds arrived. Then he stole the show, but she did not mind as the above photo shows. As a matter of fact she shook hands with Senator Reynolds and congratulated him on his ability to be the most popular member of the United States Senate. After posing with Susie Senator Reynolds took in everything on the midway as the guest of Cetlin-Wilson's Mr. Hirschberg, the gentleman with glasses and a gray fedora in the above photo. Later Senator Reynolds posed for photos with Hazel and Speed Merrill, dare devil motorcycle riders and The Great Wilno, human cannon ball whom he introduced to the audience just before his senatorial act was presented.—(Eubanks-News photo.)

Carteret Crocodile

And Man Who Killed It

Few people in North Carolina would believe it if someone said that crocodiles lived on the rivers and bays of Carteret county. They would say, "You are getting our coast mixed up with southern Florida or the Nile in Egypt." But seeing is believing. The 8-foot crocodile shown above was shot last week in Carteret county by Archie Hardesty who lives on Route 2, near Newport. He killed the reptile when it had crawled into his yard a half mile from the nearest water and started an argument with his dog. Local residents prove it is a crocodile because the upper jaws work, an achievement not credited to alligators, which are also plentiful in Carteret waters. The above cut was made from an enlargement of a candid Beaufort News photo and shows Hardesty and his Crocodile which was brought to Beaufort to be mounted by Taxidermist Blythe Noe.

Much Progress Is Made On Carteret W. P. A. Projects

Community Center Building 80 Percent Complete Working on Gyms

Work on Beaufort Community Center is speeding along these days and is at the present time 80 percent complete, according to Philip Ball, county project supervisor. All windows and doors have been installed, the roof is nearly shingled, and the sub floor is almost laid. Work on installing the plumbing will begin within the next few days it was stated.

Nearby and a part of the Community Center project is the golf course which is also nearing completion. Mr. Ball who was the landscape architect on this job before he became county supervisor says the course is 75 percent finished. Grass has been rooted or sown on the Number 1 tee and similar work will get underway on the other eight tees or greens and fairways at an early date. The course will be finished during the late winter and probably by late Spring it will be suitable for playing on and then this county will have golf to offer as a diversion to its residents and visiting vacationists.

Work has also started on two gymnasium buildings in the county, structures which were brought about through the co-operation of Congressman Graham A. Barden of this District. The two buildings which will represent a total expenditure of \$35,000 when finished are located at the Newport and Atlantic schools.

Other projects in the county include road construction, streets in Morehead City, the heating plant at the county courthouse here and malaria drainage down on Harkers Island. Many of the projects will be completed before or during the coming winter it was stated.

VO-AG BOYS SELL WEED IN KINSTON

Newport Vo-Ag boys are go getters. Recently they accepted donations in the form of tobacco from farmers in their section, a total of 296 pounds. Then, along with C. S. Long their instructor they went to Kinston, separated their weed into seven grades and sold it all for a total of \$109.96. "This money has been placed in the bank to the credit of the Newport Agricultural class," wrote L. D. Hunnings, class reporter. "It will be used to purchase necessary equipment and supplies for our shop and chapter operations this year," he added.

Thousands of Garments Made by Women Workers Under Miss Rumley

Thousands of garments of all kinds have been made by the women working in Carteret WPA sewing rooms since they were established, and as a result the needy residents of the county have received much clothing they would not have had otherwise. Products made in the sewing rooms, which are under the supervision of Miss Sara Rumley, are turned over to the Welfare Department which in turn makes distribution to needy cases.

But making garments by sewing room workers is only one of the things which the WPA women of this county have to do. Book binding projects at various schools have given employment to many women and girls who would have been unemployed otherwise. Since the book-binding projects started, thousands of books have been cleaned and conditioned for the school libraries or school students' reference files. The library projects have also been of much usefulness to Carteret county, and Carteret owes it all to the WPA.

A splendid example of the varied work being done in the county by WPA women workers was shown in a booth at the Legion fair last week. It attracted more attention than any booth in the Exhibit Hall. The splendid booth was set up by Miss Rumley, county supervisor of Women's Works and Mrs. Stancil her Supervisor and showed not only garments, but quilts, novelties, rugs and many other useful things being done by the women, including a "before and after" display of book binding.

The WPA sewing rooms in Beaufort and Morehead City are temporary. (Continued on page eight)

GAME WARDEN IS MAKING ARRESTS

Hunters who go hunting for deer and other game in Carteret county are learning that Game Warden Leon Thomas is on the job. Since the seasons opened recently he has made seven or eight arrests of persons who tried hunting without a license. As a result of the arrests each defendant when tried before a magistrate have been found guilty and fined from seven to twelve dollars each. Game Warden Thomas says that deer hunting remains mighty good and that in the Newport section a number of bears have been killed since the season opened.

Potatoes & Sex Feature of Court

Flays Drunken Drivers

Judge N. A. Sinclair

In his charge to the Grand Jury, Judge N. A. Sinclair, a native of Fayetteville who is presiding over October term of court here this week flayed drunken drivers and the recorders courts which let them off with minimum sentences, fines or whatnot. If any recorders were present at the time, they might have turned red behind the ears during the charge, but it is a situation which is existing in many counties, the Judge told a newspaperman later. Judge Sinclair can trace his ancestral lineage way back to the hills of Scotland. One of his favorite hobbies is to gath or combination pecans-Hickory nuts off a tree on his place. They are so large they look like miniature water melons. Judge Sinclair has a fine record behind him and one of his biggest achievements was to wipe out the Ku Klux Klan in many localities, when the organization became notorious a few years ago.

Seduction Case Proves To Be Highspot of This Session

SINCLAIR PRESIDES

No Sentence Yet For Two Potato Thieves

Detective and confession magazine writers could have gotten some good material for stories if they had listened in on the potato theft case involving Cecil Peterson and Milton Phillips or the seduction case involving Clifton Wade and Miss Laura (Billie) Dickinson tried in superior court here this week. Judge N. A. Sinclair of Fayetteville is the presiding jurist and is conducting court here for the first time in five years.

Up until the time we go to press today only two cases had been closed. The case against State Highway Patrolman I. T. Moore, charged with assault was dismissed by the court. Cecil Guthrie a 'peeping thomas' of Morehead City was convicted on that charge and given a 12-months suspended sentence.

As this story was written near noon on Thursday the defense and prosecuting attorneys in the Wade-Dickinson case were still telling it to the jury. Unless some of the bevy of attorneys representing either side get short winded the possibilities are that it will be late afternoon before the jury actually gets the case. Their decision will tell the story. This case has been very sensational. (Continued on page eight)

Covering The WATER FRONT

By AYCOCK BROWN

MY HAT IS OFF to the pleasant talking long distance operator who went Senator hunting for me on Tuesday night and bagged him four and a half minutes later by my Knick bocker. It was a matter of importance pertaining to the legal voting residence of Wesley E. McDonald. The newspapers had been querying me steadily since Sunday to get the dope and when I finally got same I naturally filed it, but there had been such an effort on the part of the newspapers to clear up the story that I thought it important enough to call Senator Reynolds. He is Wesley's boss.

CHECKING THE NEWS and Observer schedule of Democratic speakers I noted that Reynolds was speaking at Stoney Point in Alexander county. I could not place either locality but assumed it was somewhere (Continued on page eight)

TIDE TABLE

Information as to the tide at Beaufort is given in this column. The figures are approximately correct and based on tables furnished by the U. S. Geodetic Survey. Some allowances must be made for variations in the wind and also with respect to the locality, that is whether near the inlet or at the heads of the estuaries.

PUBLIC BUILDING PLANS UNDERWAY

Will Be Completed by December According to Washington Story This Week

Washington, D. C. Oct. 22—Plans for the new Beaufort post office building will be finished by the end of December, it was predicted today at the Treasury's procurement division.

Tentative drawings for the proposed Beaufort structure are now well under way and should be finished and oked by the procurement division advisory committee on design before the end of this month, according to officials of the procurement division architectural section.

Under the tentative set-up, the new Beaufort building will be of a modified Colonial design, architects stated. They added however, that the architectural type would not be defined. Continued on page four
