NOTICE OF FORECLOSURE SALE
DCA-3969-M
Under and by virtue of the power of sale contained in that certain deed of trust executed by Charles A. Clawson and wife, Janie P. Clawson, to CAROLINA MORTGAGE COMPANY, TRUSTEE, dated August 15, 1929, recorded in the Registry of Carteret County, North Carolina, in Book 63, Page C-111, the undersigned as the duly appointed substituted trustee (see book 84, page 469, of said registry), will offer for sale at public auction at the courthouse door in said county, in the City of Beaufort, N. C., at 12 o'clock M., Thursday, April 8, 1937, and will sell to the highest bidder for cash the property described in said deed of trust as follows:

Adjoining the lands of C. E. Case, formerly E. H. Dill, situated in the town of Beaufort, and known and designated in the plan of said town of Beaufort as parts lots number (70), and (80), Old Town, described as follows:

Beginning at a point on the north side of Ann Street, ninety-nine (99) feet eastwardly from the northeast corner of intersection of Ann and Craven Streets, thence running eastwardly with north line of Ann Street fifty (50) feet, thence northwardly parallel with Craven Street two hundred and twenty five (225) feet, thence westwardly parallel with Ann Street fifty (50) feet, thence southwardly parallel with Craven Street two hundred twenty-five (225) feet to the beginning.
This being same land mentioned and described in a deed from E. H.

Dill and wife to D. W. Dill, dated the 24th day of October, 1899, and recorded in Carteret County, N. C., in Book VV, at page 154, and devised by said D. W. Dill by will to Mary L. Dill; and being conveyed to Charles A. Clawson by deed from Mary L. Dill, dated March 12th, 1904, filed for registration March 17th, 1904, duly recorded in the office of the Register of Deeds for Carteret County in Book ZZ, page 595.
This sale will be made subject to all outstanding and unpaid taxes and other assessments, if any.
This sale is to be made on account of default in the payment of the indebtedness secured by the aforesaid deed of trust, and is made pursuant to demand made upon the undersigned by the holder of said indebtedness.
This, 4th day of March, 1937.
KESWICK, CORPORATION
Substituted Trustee.

Beaufort School News

GRADE 1-1
By Mistake
A. B. Morton's name was omitted from the honor roll for the fifth month of school.

GRADE 1-1
Sunday was Bryan Loftin's birthday. Monday afternoon his mother came to school and gave him a surprise birthday party. The class sang a happy birthday song to Bryan. After the song Bryan gave an Easter basket filled with candy eggs to each child. All of us had a good time.

GRADE 3-2
Suthey Rhue, Frank Morning, and Roscoe Conway got us some minnows from the ditch. J. T. Hardesty brought some snails which he found. We put them all in a bowl and some of the boys put in some marbles. Edna and Hilda Glover brought some food for the fish.

We planted some beans in a flower pot so we could watch them grow.

GRADE 5-1
Last week our grade made some things of clay. Gordon Bell Davis made a stage coach which was very good. Hendricks, Philip and Edwin made some airplanes which were also especially good.

Dot, Mattie, Lucy Belle, and Catherine have made a portfolio to keep our pictures in. It is very pretty. Our class won the dollar for having the most parents present at the P. T. A. in February. We are going to buy a book with it.
We are studying about birds. We have already found many bird pictures.

Reported by Ricard Smith and Floyd Springle.

GRADE 5-2
Helen Dixon and Garland Dudley, who have been absent for several days because of sickness, have returned to school.

Bobbie Safrin and Blythe Noe, Jr., whom our class is sponsoring in the baby contest visited our rooms last Friday. We are pleased to find that both babies Bobbie and Blythe, are ahead in the contest.

Since we have a picture show in our room, we have decided to have a show each Friday afternoon at 2:30 o'clock.

We are proud that we have two members in the school band—Carl Edwards, Jr., and Robert Willis. The band is giving a concert Sunday afternoon.

Lorine Austin,
Class reporter.
6-1 CHOOOL NEWS

We have been busy for two weeks practicing on a St. Patrick's Day program. All our class has a part in the exercise and we are anxious for all our parents and friends to see the program.
We regret that a number of our class mates are sick. Some of them have flu and some chicken pox.

Jane Ranssey,
Pansy Mason.
GRADE 6-2

Mrs. C. R. Wheatly gave our class a set of encyclopedias. We are enjoying them very much. Some of the boys in our class are interested in making bird boxes for the bird box contest. Our class is getting ready to organize a baseball team. We hope to have the champion team.
Lina Bell, Frances Langdale,
Reporters.

GRADE 7-2
Our room has an attendance record of 98 per cent for the first five months. We have finished our physical-political maps of Australia and have them on display in the classroom. Some of our boys are busy building bird boxes to enter the county contest.
Delcha Willis.

Will Explain Modern Fertilizing Methods

RALEIGH, Mar. 17—Recent studies in the mechanical application of fertilizers for cotton will furnish the subject for a radio talk on the Carolina Farm Features program Saturday, March 20.
Dr. Emerson R. Collins, agronomist at the North Carolina Experiment Station, will explain in the broadcast the progress which has been made along this line.

The experiments in fertilizer placement around cotton were started in 1931 and practically the same placements were used in 1932 and 1933. The outline of the experiment station was revised in 1934 to take advantage of the information obtained in the previous years.
Some of the placements which had proved but of little value were dropped and other placements that offered promise were added. The second outline was carried out in 1934 and 1935, and revised for the 1936 season.

The experimental plats are located at the Upper Coastal Plain Experiment Station near Rocky Mount on a Norfolk sandy loam soil.
The Carolina Farm Features scheduled of the Register of Deeds of Carteret County in Plat Book 1 at page 96.
This the 15th day of March, 1937.
James M. Howard, Sr.,
Trustee.

Shunk "Plants That Give Light;" Wednesday, Boone Trail School Program; Thursday, Wake County Home Demonstration Day; Friday, N. M. Williams, "Caring for Baby Chicks;" and Saturday, Dr. E. R. Collins, "Improved Methods for Fertilizer Placement on Cotton."

Top-Dressing Is A Tonic For Pasture

RALEIGH, Mar. 17—Top-dressing makes a good spring tonic for old pastures, says John A. Arey, extension dairy specialist at State College. Give the old grass a dose of "plant food" and it will soon be growing thickly enough to supply good grazing while new pastures are still too young and tender, he pointed out.
For Sandy soil, Arey said 300 pounds of 4-8-4 fertilizer may be applied to the acre; clay soils should receive the same amount of a 4-12-4 mixture.

But a Spring tonic by itself may not be enough to reclaim the sod in time if the grass has got too thin, Arey added, and in this event the thin spots should be recessed when the fertilizer is applied.
If the soil is reasonably loose, the seed and fertilizer may be drilled in satisfactorily with a disk drill, he continued.

Soil that has become hard packed should be sacrificed first with a disk harrow, and then the seed and fertilizer can be drilled in without difficulty.
After pointing out that pasturage is the best and cheapest feed that can be supplied cattle and workstock Arey stated that the animals, especially young cattle, should be inspected for lice.

A calf heavily infested with lice cannot make a good growth, even when plenty of rich, succulent pasturage is available, he pointed out.
In cold weather, infested animals may be dusted with a mixture of equal parts of Flowers of sulphur and ground sabadilla seed or sodium fluoride. On warm days they may be sprayed or sponged with lime-sulphur cold tar, or nicotine dips.

Williams Gives Tips On Crop Fertilizers

RALEIGH, Mar. 17—North Carolina farmers spend 20 to 30 million dollars every year for fertilizer.
Yet many of them do not get full value for the money they spend because they do not apply the right mixture to their crops, said C. B. Williams, head of the State College agronomy department.

The kind of fertilizer to apply depends upon the crops grown and the type of the soil.
The amount of grower will find profitable to use depends to some extent upon their rice he can expect to get for his crops, Williams added.

When prices are up, the grower can afford to apply more fertilizer to get the highest yield consistent with good farming practices, he continued.
For the major crops grown in the State on average soils, and with a prospect of average prices, Williams recommends the following fertilizer applications:
In coastal plain: Tobacco, 800 to 1,000 pounds of 3-8-6 to the acre, the fertilizer mixed according to recommendations of the tobacco committee. Cotton, 450 to 500 pounds of

4-8-4. Corn and small grains, 250 to 300 pounds of 4-8-4. Legumes, 200 to 300 pounds of 2-8-4. Late sweet potatoes, 600 to 800 pounds of 3-8-8.

Good Seed Necessary For Profitable Crop

RALEIGH, Mar. 17—"Bed the best sweet potato seed you can get now and next fall and winter you will get better prices for your crop."
"Good seed not only produces greater yields per acre, it also helps produce good quality potatoes that command top prices," said L. P. Watson, extension horticulturist at State College.
This year growers should give more attention to quality than to quantity, he added, as a big crop is in prospect and only the best potatoes will bring good prices.
A buyer recently told Watson he paid 25 cents more a basket for good grade potatoes than for the run-out, low quality potatoes most farmers were offering him from the 1936 crop.
The average yield per acre last year was 90 bushels.

At 25 cents more on the basket, good grade potatoes would bring \$22.50 more per acre, Watson pointed out.
But this is not all, he continued. Good seed would produce a greater yield and the grower would get much more than \$22.50 per acre over the returns for inferior potatoes.

A Chowan County grower who planted the No. 1 strain of Porto Ricos last year got 248.9 bushels of No. 1 grade potatoes from each acre, Watson pointed out.
A Pamlico farmer planted Porto Rico strain No. 1 and got 375 bushels to the acre; a New Hanover grower harvested 437 bushels from an acre.
No. 1 potatoes are now worth \$1 a bushel, Watson added. "You can figure for yourself whether it paid them to plant good seed."
