We Are Glad To Publish Criticism

We are glad to publish criticism, if the criticism is directed at some news story we have written. Hardly an edition rolls off the presses of The Beaufort News but what there is some story which might be open for criticism. In the first place we try to give both sides of a story and in the second place we try to give the news as it is reported to us from reliable sources. Take last week for example, the editor was informed by one of the outstanding citizens of Morehead City that the story which had to do with Recorder's Court on Tuesday met with considerable criticism in Morehead City. Since we got our story from Court officials, we have no apologies to make for anything that was said in connection with a case where a man was found guilty of a charge and given a 90 days suspended sentence. But on the other hand if there is anyone who wishes to give a version different from that which was printed last week, we will be glad to publish same. A few days ago under the caption "Gardeners" appeared a story in the newspapers of the State under a Beaufort dateline which involved WPA workers on a ditching project in this county who were doing a bit of gardening when officials visited the community. The story was reliably reported to the correspondent. No one has denied the story, but yet there has been criticism directed at the correspondent who filed the report to the newspaper up-state. We have learned during our somewhat hectic newspaper career that people like to read about the misfortunes of others, just so the misfortune does not strike at home.

Inter-urban Bus Service Is Needed

Perhaps it could not be operated profitably the year around, but our contention is that the person who establishes an inter-urban bus service between Lenoxville and Fort Macon, touching all points between and including Community Center, Beaufort, Morehead City and Atlantic Beach, will see profit in the venture. The possibility of such a service during the summer months has been under discussion by officials of The Chamber of Commerce here, and, at the present time persons who would be in position to consider the proposition are being contacted. If you drive down Lenoxville road frequently, you will see numbers of persons walking to town. There are many people here in Beaufort and in Morehead City who would like to go to the golf course at Community Center at times when it is not convenient to drive their own autos because some other member of the family is using the car. Or probably some of the golf players do not have autos. There are always hitch hikers on the outskirts of Beaufort and Morehead City who are anxious to go from one town to the other. The majority of these hitch-hikers could afford to pay a dime for transportation between the two towns and in most cases had rather do, than 'bum' the ride. During the summer months the run to Fort Macon and Atlantic Beach from Beaufort, Morehead City and the Community Center would be well patronized by visiting tourists and the folks here at home.

Atlantic Beach and the amusements which will be offered there would be within reach of hundreds of persons who cannot now make the trip due to lack of transportation facilities. If such an inter-urban service were established, it is likely that someone at Harkers Island would start passenger boat service to the mainland at Lenoxville Point or Community Center and that would get business from both ways. There are just as many people (summer visitors especially) who would like to go to Harkers Island for a visit, as there are Harkers Islanders who would like to have fast transportation into Beaufort, Morehead City or Atlantic Beach. If the combination boat and bus service was started Harkers Island would be only about 30 minutes from Atlantic Beach. We may have the wrong conception of the whole thing, but our idea is that the need for inter-urban bus service such as outlined operating on hourly schedules would have a paying patronage.

Beaufort Becoming Cultural Center

Beaufort is becoming the summertime cultural center of the South Atlantic coast. During the summer of 1938 one hundred or more students from colleges and universities will come to Beaufort to study art, marine biology and for the purpose of research. Woman's College of U. N. C. in Greensboro will establish an art school here and Gregory D. Ivy, Dean of the institution's Art Department on a visit to this section this week was very much impressed with the layout of Beaufort for the study of art. He made the remark "Beaufort should become as famous along the southern coast as an art center as Provincetown, Massachusetts, on the New England coast." And that would be a real distinction. Announcements received from Duke University this week indicated that the new Marine Laboratory on Piver's Island would open for summer courses on June 13 and continue through September 3. The Marine Laboratory is now under construction. By June 13, several dormitories will be completed, and quite a number of students will come to Beaufort for the purpose of taking courses and doing research work at the wealthy university's coastal unit. On June 13, Dr. Archie Shaftesbury will open the Carolina Marine Laboratory at Beaufort Community Center, bringing with him a dozen or more students for the courses he will offer in advanced biology. All in all, the Beaufort of 1938 will be almost like a college town.

Over 100 people of South Africa who went to Argentina to settle have just returned home destitute.

MYRNA LOY AT THE SEABREEZE

Stars As A Manproof Woman; Portia On Trial Thursday

MAN-PROOF which comes to the Sea Breeze theatre Mon.-Tues. is one of the outstanding productions of the year. Myrna Loy, picked by twenty million newspaper readers as the screen's most popular feminine star, is co-starred with Rosalind Russell, who has skyrocketed to stardom in the past year. Playing opposite them are Franchot Tone and Walter Pidgeon. Making a four star cast that has the ability to play their parts in such a way it makes you feel as though you, yourself, are a part of the story. MAN-PROOF is a story of Mimi (Myrna Loy) and Alan (Walter Pidgeon) the man she loved. Elizabeth (Rosalind Russell) the girl he married. and of Jimmy (Franchot Tone) who "kind'a" hung around to see what would happen.

The second big attraction at the Sea Breeze is Faith Baldwin's PORTIA ON TRIAL which will be presented on Thursday April 14.

An attempt to tell the greatness of this story would require too much space, so it will be up to you to see for yourself the heart stirring qualities of this drama of Mother and Son.

RALEIGH HAS QUARTER WITHOUT AUTO DEATH

Raleigh.—The state's capital today rounded out its first quarter with perfect traffic fatalities in 1937 at the same season and there was no boasting today over the new record, the best in years. The city officers believe that they have caught on to a new way of avoiding the accidents that have been common.

Chile's imports in January were nearly 50 per cent higher than in the corresponding month of 1937.

Morehead Bowlers Whitewash Beaufort

By TOM HOOD

The Morehead Junior Chamber of Commerce all but picked the Beaufort Chamber of Commerce clean in the second match of the tournament which was held Monday night instead of Tuesday night as originally planned. It seems that the teams "Amateurs" and "Professionals" were correctly used in our last weeks write up, regardless of the intentions of the writer. Final score of the play-off shows Morehead 18 and Beaufort 6. That puts Morehead twelve games on Beaufort in the tournament totals, which are now 30 against Beaufort's 18.

Next week's play-off will be on Tuesday night and it is hoped there will be no more interruptions so that every encounter will be played Tuesday's at 7:30 P. M. as per schedule.

The Beaufortites might have been a little despondent after the games Monday night but to talk to them now, you would think they could beat the World's champions. Incidentally, I imagine the Morehead teams really feel they could beat most anybody. I think they have a right to that anyway. There were a number of spectators out to watch the match and both teams seemed to have a real "cheering section." There is no doubt that the interest is increasing every day and by the end of play there is no doubt that it will have been an interesting thing. Bowling enthusiasts are invited to go over to the Idle Hour of Atlantic Beach, N. C. to see this twin-city get together.

Dr. Spence Has Big Flower Farm

Dr. Spence who with Mrs. Spence operate the Morehead City Floral Company have considerable acreage in the Crab Point section devoted to flower growing. Already many of his various species of flowers are in the blooming stage. He has devoted quite a large part of his flower farm to the growing of gladioli.

POTPOURRI

Italian Language Unchanged
Most languages have changed during history, but the Italian, considered the most beautiful of languages and most liked by opera stars, has not changed in hundreds of years. This language, taken from Tuscany, replaced the Latin spoken in the days of the Caesars. The Italians are not direct descendants of the extinct Roman empire.

My Neighbor Says:

When cleaning bamboo furniture, go over it with a brush dipped in salt water.
A slice of cake covered with crushed strawberries makes an excellent quick dessert.
Cabbage used for salad should be washed, stripped and put in the refrigerator until ready to serve.
Climbing rose bushes should never be pruned until after they have blossomed; bush roses may be pruned after all danger of killing frost has passed.
When making custard pies, satisfactory results may be obtained if the undercrust is partially cooked before the custard is poured into it. Pastry needs a stronger heat than custard to bake it.
A small window may be made to look larger by setting the curtain rods beyond the casing on each side and using draperies of a material heavy enough so that casings will not be seen through material.
