of them out and looked at it after reading your article. Now I have always supposed that the ship in these pictures I have was the Deering. But this picture shows only four masts and you state that she had five masts.

Tobacco Farmers Meet Tonight At Newport School

Tobacco growers of this section will gather at Newport school tonight at 7 o'clock for a discussion of tobacco growing and the diseases and insect enemies of that crop.

CARD OF THANKS

We wish to thank our friends in Beaufort and Carteret County for the sympathy they showed us during the recent illness and death of our beloved mother, Cathrine Walker of Chicago.

With swine diseases appearing much earlier than usual this year in Bertie County, some farmers are experiencing heavy losses, reports R. D. Smith, assistant farm agent.

Barden and Bonner Urge Relief For Crab Packers

Washington, Jan. 21.—A ten-fold expansion of the American crabmeat industry is in prospect in event an appeal of the American Crab Packers Committee for increased import duties upon Japanese canned crabmeat is accorded favorable action by the U. S. Tariff Commission.

Mr. Harris, prominent in perfecting or recently developed methods for canning the meat of species of crab caught along Atlantic and Gulf shores, led a parade of interested domestic producers who appeared at a two-day hearing to impress upon the Tariff Commission that "seafood is a necessary and important part of our food supply in an emergency when we cannot depend upon our competitor, Japan."

North Carolina Representatives Graham A. Barden, of New Bern, and Herbert C. Bonner, of Washington, were included in the several senators and congressmen who appeared at the hearing in support of the committee's appeal for the tariff increase.

Both Tarheel State Congressmen asked the commission to accord to the American crab packing industry the relief requested in a raise in tariff from fifteen per cent to twenty-two and one-half per cent of declared value of imported canned crabmeat.

Evidence of alleged unfair competition included a charge by biochemical experts that king crabmeat produced by Japanese canneries and sold in America is known to contain arsenic of one point less than the "tolerance level", or limit of the drug allowed under regulations of the Federal Food and Drug Administration.

An interesting argument over nativity of the giant king crab marked the proceedings, with importers claiming it to be a "Japanese sea monster" and Americans contending it "is as much American as Japanese."

SPORT LITES

By J. W. STEWART

By J. W. STEWART

Colds and flu have cut heavily in some of the teams and thus very little playing has taken place and what games have been played, have been played with the teams minus some of their most valuable players.

Two games have been played since the last publication of this column, these games being between Newport and Atlantic and Newport and Harkers Island. Newport girls won both of their games.

Harkers Island's Basketball teams are receiving praise from the various sections of the county that they have played against. Your columnist has heard these words of praise, and also there has been heard some words of discouragement by patrons of Harkers Island. The patrons of the other schools have far greater hopes for the Harkers Island teams than the home patrons of the team, and these should be the ones who should be expressing words of encouragement.

Improvements

H. B. Green, Concord, Route 1, says he plans to spend his AAA conservation and price adjustment checks each year to make some definite improvement on his farm, reports Assistant Farm Agent W. H. Williams.

Successful

Lincoln County farmers had an unusually successful year with their crops in 1941, with the exception of a few normal cases, says J. W. Webster, assistant farm agent of the State College Extension Service.

Some agricultural experts believe that with farm labor costs going up just as farmers are sending their sons into the draft army, there will be an increasing need for farm machinery.

MORE ABOUT WATERFRONT

(Continued from page 1)

Wahab told me recently that he planned to sail from the island aboard his yacht "Wanderer" sometime during the late winter for a cruise to Florida. He also told me that his plans to establish the small boat building plant at Ocracoke which was given some publicity several weeks ago was held up temporarily because all the skilled craftsmen on the island were now employed as carpenters on the new Coast Guard station building.

IN THE RAPID transformation from tree to plank and plank to army camp buildings, the longest delay is the 48 to 60 hour period necessary to season the lumber in the dry kiln. The remainder of the operation is almost continuous. The name Safrin in North Carolina seems to mean lumber. Here in Beaufort R. W. Safrin and two of his sons, Leonard and Robert, manage the business. Another Scarborough-Safrin Lumber Company is located at Mt. Gilead and three of R. W.'s brothers manage that outfit. Merlyn, another son of R. W. Safrin chose aviation as a career and he is now one of the transport pilots on the Braniff Airline operating between Texas and Chicago.

IT SEEMS TO me that the waterways of the entire outer coastline, practically ignored (except at one or two places) since the beginning of American Independence, should get some attention during this money spending era we are now passing through. If the Navy is really going to build up large squadrons of PT type boats (the "PT" stands for Patrol Torpedo), I believe it would be practical to provide sufficient depth (12 to 15 feet) in all the sounds and inlets along the entire coast for them to dart in and out of during maneuvers, or during actual warfare.

waters of the ocean, along our State's outer coast-line from South Carolina to Virginia.

CAPT. WILLIS of Ocracoke in town on Tuesday told me that Stanley Wahab of Baltimore was expected to arrive at the island this week. Wahab told me recently that he planned to sail from the island aboard his yacht "Wanderer" sometime during the late winter for a cruise to Florida. He also told me that his plans to establish the small boat building plant at Ocracoke which was given some publicity several weeks ago was held up temporarily because all the skilled craftsmen on the island were now employed as carpenters on the new Coast Guard station building.

THAT REMINDS me.—Wahab wrote me last week outlining his plans for the construction of a recreation center on the ocean beach at his Wahab Village development. The new recreation center, including dance pavilion, bath houses and other facilities will be adjacent to the ocean's surf. Wahab is seriously considering building the structure as a replica of the old Clyde Line wooden steamer "Pioneer" which went ashore on the beach at Ocracoke back in the 180s, during one of the greatest ever experienced. The Pioneer's stranding was like a gift from God, because she was loaded with a general cargo, everything from canned goods to pianos. The cargo was salvaged by the islanders and saved many from suffering during a very bad depression.
