WHAT caused the disappearance of the Lake Erie cisco? Do Gulf shrimp live but one year? How does stream pollution affect our fisheries? Can the yield of commercial fishery be predicted?

Department of the Interior, according to Dr. H. F. Prytherch, Service Laboratory Director, in charge of the Fisheries Biological Station at Beaufort.

LIKE OTHER Service employees throughout the country, Dr. Prytherch is taking time during his official duties this week to call public attention to National Wildlife Restoration Week which is now (April 14 to 19) being celebrated throughout the nation under the sponsorship of the National Wildlife Federation.

Washington, D. C.
BIGGEST CROP BUYING
PLAN YET

During debate on the lease-lend bill, Senator Murray of Montana came up to the vice president's dais and whispered in Henry Wallace's ear. The bill, he said, ought to contain a provision whereby Britain would buy or borrow farm products as well as armaments.

Vice President Wallace replied that he thought so, too, but had not felt it necessary to "spell it out" in the bill. However, he mentioned the matter to Senate Floor Leader Barkley, who offered an amendment to the lease-lend bill.

This was the simple mechanics whereby the biggest farm purchase plan since the last war was started. Most people don't realize it, but the lease-lend act makes the United States not only the arsenal for Great Britain, but also her granary, packing house and slaughter house.

A total of \$1,300,000,000 has been allocated out of the seven billions for British defense—all of which will bring sorely needed help to the farmer. So while industrial regions have prospered in this war, the farmer so far has not.
