GOOD NEIGHBOR CO-OPERATION The United States is getting much better co-operation from some of our South American neighbors than has

leaked out to the public. When Portugal protested to the United States against Roosevelt's fireside chat hinting the seizure of the Azores, the Brazilian government immediately got in touch with the U. S. state department. The Portuguese had sent the Brazilians a copy of their protest, and Brazil asked us what reply we were going to make.

Ambassador Caffrey in Rio de Janeiro immediately showed Foreign Minister Aranha a summary of our proposed reply, and Aranha volunteered to send Portugal exactly the same answer-telling them it was vital to the safety of the Western hemisphere that the Azores be in friendly hands, and that Brazil could not afford to see the islands taken by the Axis.

This message was sent: which means that Brazil will co-operate with the United States if and when the time comes to occupy the Azores.
