THIS WEEK IN DEFENSE

President Roosevelt informed Congress he had ordered a Navy force to Iceland to forestall any pacifist movement--by Germany against the Western Hemisphere.

He said German occupation of that country would threaten the North American continent, shipping in North Atlantic, and the flow of munitions to Britain. The President said the Navy had been ordered to take "all necessary steps" to insure safety of communications in the approaches between Iceland and the United States, as well as on the seas between the U. S. and all other strategic outposts.

The president later told his press conference that whether Iceland lies outside the Western Hemisphere is an academic question. He said there are points outside the commonly accepted Hemisphere limits which are of importance to U. S. defense, and that in occupying Iceland he acted to forestall a hostile move which strategists considered logical or likely.

Selective Service Headquarters announced that 21-year-olds who registered July 1 will be given draft numbers so they will be called in proportion to previous registrants rather than ahead of or after older men. Order numbers will be determined by national lottery on July 17.

Headquarters advised local boards to defer men who have volunteered for civilian or military duty with Canadian or British forces. The House passed legislation to permit deferment of all men who were 28 on July 1.

Alien Education The President allocated \$14,000,000 of WPA funds for a program to educate 1,000,000 aliens in the duties and responsibilities of citizenship. More than 11,000 teachers on WPA rolls will conduct classes for aliens who wish to become citizens.

Registered Civilian WPA announced that more than 200,000 national, State and local civilian organizations with 50,000,000 members will be catalogued within the next 60 days to determine the parts the organizations and individuals can play in home defense so the Office of Civilian Defense can find qualified persons for new programs. All except purely local clubs will be indexed.

Civilian Supply OPM conservation officials announced that "our purchases, our habits, our daily lives, perhaps even our styles, will be controlled by the requirements of national defense." Some of the changes facing the public, according to OPM: No corks in bottle tops; beverages in bottles rather than cans; silk used in parachutes will make silk stockings more scarce; women will have fewer permanent waves, cosmetics and facial creams; it will not be patriotic to buy two automobiles; farmers will choose from 300 instead of 1,400 types of plows; chrome, copper, aluminum and woods such as mahogany will probably not be available to the furniture industry, and many designs will be eliminated.

Buy Coal Now

The Federal Bituminous Coal Consumers' Council appealed to the nation to buy coal now so it can be moved from the mines before growing defense production burdens the country's transportation system. There is an ample supply of the coal, the Council said, but by September 15 shortages in some places may develop unless coal is stored for the winter before then.

Prices

Price Administrator Henderson announced that price ceilings on rubber tubes and other rubber products will be deferred for several months to allow the industry time to work out price problems voluntarily. He announced, however, that ceiling prices will be placed within a few days on cottonseed oil and certain grades of West coast lumber used by the Government. Mr. Henderson also stated that recent action to check rises in hide prices does not mean the OPACS expects to freeze livestock or meat prices.

Army

The President asked Congress for an additional \$4,700,000,000 for the Army, most of it for purchase of heavy guns, \$400,000,000 for clothing and other equipment, \$200,000,000 for the Air Force and \$350,000,000 for the Signal Corps, and \$1,000,000 for horses.

The War Department announced formation of a completely motorized, and heavily armed experimental division, strengthened with tanks, with 50 per cent more fire power than a present armored division although with 14,000 instead of 15,550 men. The Department also announced that to bolster anti-tank defenses, anti-tank specialists will be assigned to every Army large unit to work out methods of defeating armored attacks.

Air

OPM announced that during June 1,476 military planes were delivered to the Army, Navy, and Great Britain--142 more than the previous month and a new record. The War Department announced contracts of nearly \$200,000,000 for new airplane manufacturing facilities and ordered all Air Corps Reserve Officers except those in key civilian positions to active duty by August 1. The Army Air Force established its own Air Staff to form Air Force plans and decide on equipment and other matters without the approval of the General Staff as heretofore.

Navy

The President asked Congress for \$1,625,000,000 in appropriations and contract authority for the Navy for additional ordnance, yard equipment, planes, and repairs, including \$400,000,000 for defense installations on naval and private ships--anti-mine equipment, armor, etc., but, the President emphasized, not for guns to arm merchant ships.

Rear Admiral Robinson, Chief of the Navy's Bureau of Ships, announced the Navy shipbuilding program is proceeding so rapidly that "every single combat ship is ahead of schedule." He said the problem of labor supply has been solved and the rate of expansion is limited chiefly by the ability to obtain materials.

Ships

The President asked Congress for \$1,625,000,000 for the U. S. Maritime Commission, including \$698,000,000 in cash for newships

Aged and Needy Receive \$31,938

Public assistance payments for Carteret County's aged, needy and dependent children totaled \$31,938 for the fiscal year ending July 1, according to Nathan H. Yelton, director of the public assistance division of the State Board of Charities and Public Welfare.

Yelton said \$22,779 was spent during the year for old age assistance in the county with 278 persons receiving grants from this fund during the month of June. In addition, 2 widows of Confederate veterans received \$600 for the 12-months period making the total spent for needy aged \$23,379.

Dependent children received \$8,559 during the year, with 132 being given checks during the month of June. Grants in both categories were paid from combined federal, state and local funds of which the county paid one-fourth the cost of grants and administration, with the state making up another fourth and the national government providing one-half the total outlay.

Yelton said the total expenditure for the state during the fiscal year was \$6,416,528.

The public assistance director, who has managed the program for four years and two months leaves the state welfare department this week to take over as secretary to the State School Commission.

Mrs. W. T. East, State welfare commissioner, announced the appointment of R. Eugene Brown, assistant to the commission since 1930, as acting director of the public assistance division effective July 1. Brown will serve as division head until a director is chosen from the merit system register to be set up following merit examinations this fall. It will be the first prominent post in the state government to be filled from a merit register.

Military gains are reported as constituting Hitler's strongest hold on South American respect.

and \$1,200,000,000 in contract authorizations.

The U. S. Maritime Commission announced a saving of more than 500,000 tons of steel in the building of 705 commission-designed ships by construction methods not known in the first World War. The Commission said the greatest single weight saving measure was the introduction of welding to replace riveting so that entire ships are now built without a single rivet.

Explains How To Milk Supply Of The Farm Family

The handling in the home of milk produced by the family cow has long been a troublesome problem, says John A. Arey, Extension dairy specialist at N. C. State College.

"You find almost as many different flavors of milk and butter as there farm homes," the specialist said. "As a matter of fact, cows do not produce all these many flavored products. The different tastes found in dairy products in different homes are due to the different ways the milk is handled."

A simple method of handling the milk will solve almost any problem that arises from the home production of dairy food, Arey added. He said that the best container for milk from one or two cows is the standard glass milk bottle. Just after milking, the milk should be filtered through a good filter-sterilized cloth should be discarded.

Three or four folds of cheesecloth can be used when a filter-type strainer is not available but it is necessary to sterilize the cloth with boiling water after each use. Unless the cloth is sterilized, it will act as a source of bacterial infection to milk each time the liquid is strained through it. After straining, the milk should be poured into quart glass bottles. A small tin funnel is good for use to prevent spilling. The bottles then should be capped with standard

milk bottle caps. Several months' supply of caps can be bought for less than 50 cents.

The milk next should be cooled in cold water before it is removed to the refrigerator or ice box.

Bugs

J. L. Horn, Negro cotton farmer of Rt. 1, Marshville, is fighting an insect similar to the Army worm which is attacking his cotton, says Otis Buffalo, Anson county Negro farm agent of the N. C. Extension Service.

Mosaic

A large amount of Mosaic is showing up in flue-cured tobacco this year, says James F. Webb, Pitt county assistant farm agent of the N. C. Extension Service.

Phosphate

Just add lime and phosphate to get rid of broom sage in pastures, advises R. H. Crouse, Yancey county farm agent of the N. C. Extension Service.
