ANSWERS
To Timely Farm Questions

Question: What preparations are necessary for pigs that are to be farrowed within the next few weeks?

Answer: Ellis Vestal, extension swine specialist, says many pigs will be farrowed soon. Before farrowing time, the sow should be put in a field that has been cultivated since hogs ranged over it. Never let the pigs go to old hog lots or pens. Keep them on clean land until they weigh at least 100 pounds. Vestal also said a sow worth feeding should have a good farrowing house. County agents have blueprints of these houses which any grower may obtain free.

Question: When should fruits and vegetables be selected for fairs?

Answer: September is the beginning of the annual season for fairs, so farm families should begin now to get their horticultural exhibits in readiness. Fruits to be exhibited should be picked and handled with extreme care. Keep in mind the fact that the best fruit for show purposes is found near the top of the tree. Don't pick the largest specimens but those which are typical of the variety. Then wrap each in paper and pack snugly. Vegetables for show should be free from blemishes, clean, and fully matured.

Question: How should tobacco fields be handled after the crop is harvested?

Answer: Jack Rowell, extension entomologist, says tobacco fields should be plowed and planted to a good cover crop to aid in the control of tobacco insects. This will prevent the development of tobacco suckers which furnish a food supply for hordes of flea beetles, horn worms, bud worms, and other pests until frost. Cotton farmers should follow the same practice to fight weevils.

Wheat

Production of American Spring and Winter wheat this year will reach 950,953,000 bushels, the U. S. Department of Agriculture reports.

The farm real estate market throughout the nation has shown great improvement during the first six months of 1941.

Camp Davis Officer Observes Barrage Balloons In Britain

CAMP DAVIS, Aug. 21.—Lieut. Col. Robert D. Turley, Jr., executive officer of the Barrage Balloon Training Center at Camp Davis, returned this week from an official tour of the British Isles bearing "valuable information" concerning the use of barrage balloons as instruments of defense against aerial bombardment.

The officer was sent to England by the War Department to observe barrage balloon tactics under actual wartime conditions. His visit he reported, was not confined to London, but took him to several important cities in the island kingdom. He witnessed several German air raids, one of them lasting two hours.

Although the information Colonel Turley assembled on barrage balloons was not disclosed, it is expected to play an important part in the development of this country's barrage balloon training program. Colonel Turley is assistant commandant of the Camp Davis Barrage Balloon School, first and only school of its kind in the United States.

In traveling through the British Isles, Colonel Turley said, he was especially impressed by the "beauty of the English countryside," where virtually all available land is under cultivation. Despite large scale air attacks, many ancient castles and historical landmarks have escaped unscathed, and Colonel Turley visited some of these.

Like other observers returning from England, Colonel Turley was enthusiastic about the morale of the English people. In London, for example, where most of the citizens are forced to spend long hours in air raid shelters, the spirit of the people is high, he said.

Colonel Turley left the United States June 22, following the Pan-American Clipper route to Bermuda, the Azores and Lisbon, Portugal. From Portugal he flew to England in a British plane. On the return trip he followed the same route.

He was the first military observer authorized to visit England for the purpose of studying barrage balloon tactics since the army officially adopted the new aerial defense weapon last spring. The army's only barrage balloon training base is at Camp Davis.

More than 1,000 different kinds of European weeds have invaded this country in the past year.

MORE ABOUT WATERFRONT
(Continued from page 1)

for the establishment of which too much credit cannot be given Lincolney Warren, whose pioneer efforts resulted in passage of the enabling act by Congress in 1935, are incalculable.

IF ONLY a fraction of the number of tourists visit the Seashore Park that have already visited North Carolina's other great National Park in the great Smokies, the area would experience a tremendous boom.

AND WE EXPECT not a fraction, but as many, if not more tourists to come here as to the Smokies.

THAT IS A large order, because the Great Smoky Mountains National Park now is the most popular in all the American Park system, and last month alone, was visited by 256 persons in 74,444 vehicles.

DURING THE 12 months ended June 30, there were 516,117 visitors to the Great Smoky Mountains Park. That was 42 percent above the year before, and shows how the public recreational business is growing.

WITH OVERSEAS travel impossible due to war conditions and hemispheric travel curtailed by lack of ocean transportation facilities, Americans are seeing America as they have never before.

THEY ARE turning by the hundreds of thousands to Roanoke Island, where America was born, and they will come on down the Outer Banks if it is possible for them to do so in comfort.

CONDITIONS are now ripe for the establishment of this project as never before in our history, and we should proceed with all speed

to establish the park and invite the world to visit it.

BUT WE MUST not make the invitation too extensive before we are ready for the world to come. It would be tragic if guests came beyond our facilities to care for them. There is a great deal to be done, but with the cooperation of all it will be done and without undue loss of time.

THE OUTER Banks have stood as North Carolina's outposts since

the beginning of America. Even more so than the mountains of the west, natural barriers cut them off from their fellow citizens. This, in the past, seemed an unsurmountable obstacle to development. Actually it was responsible for preserving a primitive charm that today is a tremendous asset. With the coming of highways and the National Park, the Outer Banks are on the threshold of a new era beyond imaging even a decade ago.

NEWS and FACTS ... of Statewide Interest

PROTECTION

For over two years this Committee has waged its "Clean Up or Close Up" campaign to protect the legitimate beer retailing business by eliminating those few undesirables who use their beer licenses as a cloak for unlawful activities.

Law enforcement agencies and the brewing industry both recognize that no program can be entirely successful without the approval and active support of law-abiding citizens.

We ask your cooperation in this work. Please do not patronize beer outlets that tolerate anti-social practices—that compromise ethical conduct.
