**SNAPPY FACTS ABOUT RUBBER**

Success of the Dutch in transplanting the quinine tree from Peru to Java helped encourage interest in the development of rubber plantations in the Far East in the early 1870's.

With all the discouragements of rubber and gasoline restrictions, automobile registrations at the end of 1942 were only 5 per cent lower than in 1941, a record year. Commercial vehicle registrations were down 5.5 per cent.

It is estimated that at one time there were between 300 million and 500 million wild rubber trees in the Amazon Valley and that less than 10 per cent have been tapped to date.
