February 1st, 1898. Mr. J. C. Hobbs, Hobton, N. C. Dear Sir—I notice that my father, James Britt, Sr., is using your non-friction Ring for plow lines. His lines are good not fretted at all, while mine are frayed nearly in two. You will please send me two pair of your patent Ring Rings.

Very truly, JAMES BRITT, JR., Business Agent, of Bluff Alliance. CLINTON, N. C., May 21st, '88. J. C. Hobbs, Hobton, N. C. Dear Sir—I have thoroughly tested your patented attachment for holding Plow lines. I am well pleased with it. It adds ease to man and horse, and to last of lines. It affords me pleasure to recommend them favorably. Yours respectfully, R. PAGE.

25 cents per pair. 30 cents if sent by mail. For sale by Messrs. A. J. Johnson & Co., Messrs. A. Hobbs & Son, Clinton, N. C.; or J. C. HOBBS, Hobton, N. C.

Inherited Blood Poison.

How many people there are whose distress from sores, aches, pains and eruptive tendencies are due to inherited blood poison. Bad blood passes from parent to child, and it is the duty of the husband and wife to keep their blood pure. This is easily accomplished by a timely use of B. B. B. (Bottanic Blood Balm). Send to Blood Balm Co., Atlanta, for book of most convincing proof. James Hill, Atlanta, Ga., writes: "My two sons were afflicted with blood poison, which doctors said was hereditary. They both broke out in sores and eruptions which B. B. B. promptly cured. I am finally relieved completely."

Mrs. S. M. Williams, Sandy, Tex., writes: "My three poor afflicted children, who inherited blood poison, have improved rapidly after a use of B. B. B. It is a Godsend!" J. R. Wilson, Glen Alpine Station, N. C., Feb. 13, 1885, writes: "Bone and blood poison forced me to have my leg amputated, and on the stump there came a large ulcer, which grew worse every day until doctors gave me up to die. I only weighed 120 pounds when I began to take B. B. B., and 122 bottles increased my weight to 180 pounds and made me sound and well. I never knew what good health was before."

Deafness Can't be Cured by local application, as they can not reach the diseased portion of the ear. There is only one way to cure Deafness, and that is by restoring the inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed, you have a rumbling sound in your ears, which is caused by the inflamed condition of the mucous lining of the Eustachian Tube. My great-grandfather met death in the same way. He was captain of a vessel, and an ignorant engineer blew it to atoms by pumping cold water into a hot boiler. Engineers should be educated and cautious men. They should stand an examination, be licensed, and it should be an indictable offence for any other to take charge of an engine.

THE CAUCASIAN.

Pure Democracy and White Supremacy.

VOL. VIII.

CLINTON, N. C., THURSDAY, MARCH 6, 1890.

No. 21.

THE EDITOR'S CHAIR.

HOW THINGS LOOK FROM OUR STAND POINT.

The Opinion of The Caucasian and the Opinion of others which we Can Endorse on the Various Topics of the Day.

Our people can remember, not many years ago, when a case would stay in court from five to twenty years waiting for a hearing, so crowded was the docket. The spring term of court for the hearing of civil cases in this county was a two weeks term, covering last week and this. Court was at work only about two days. We met a citizen, he called our attention to the fact that the morals, or rather the sense of justice in our county was decidedly on the increase. We met a lawyer, he called our attention to the fact that our county was in a bad way, he said when people were prosperous that there was much conflict of interest and much litigation, and that people were then able to defend their rights. Now which is right? We went to dinner and took a seat by Judge Graves. We asked for his opinion. He said it was due to a narrowing of the field of litigation by the Legislature and the decisions of the Supreme Court. For instance the Supreme Court has decided that when a man commits tort, a wrong for which he is amenable in damages, that he can "take water" under the homestead act. This decision is clearly wrong, it was not for the protection of wrong doers that the homestead law was passed. The Judge, we believe, is right, for there would be equally as much justice in giving the man who commits a wrong against the State the benefit of the exemption as the man who commits a wrong against his neighbor. Under this decision at least nine-tenths of the citizens of this county can be lawless in their acts toward their fellow-man and still not be amenable before the courts. There are at least twenty such grievances in this county that would have been before the last term of this court had it not been for this decision. By it twenty aggrieved persons must bear their unrequited wrongs and two wrong doers go unpunished. Let the constitutionality of the decision be tested. The Farmers' Alliance committees on the good of the order have done much to lessen the number of cases, but the fact is still as we have stated it.

THE EDITOR'S CHAIR.

HOW THINGS LOOK FROM OUR STAND POINT.

The Opinion of The Caucasian and the Opinion of others which we Can Endorse on the Various Topics of the Day.

Our readers will remember our comments upon the movement several weeks since in this column. But even as an independent movement it is very unwise and much to be regretted. There are as good, true, honest, upright people in one profession as another and they all have rights which must be respected. Profession arraigned against profession is one of the saddest spectacles that ever humiliated and weakened a Republic in form of government. It is one of the evils that our form of government was intended to prevent. When one profession rules to the exclusion of the others then we will have the anomaly under a Republic a form of government of taxation without representation. There may be grievous wrongs, but such a remedy is worse than the wrongs.

A CHAMPION.

THE ALLIANCE HAS FOUND IN SENATOR VANCE.

He introduces a Bill identical With the Demands MADE BY THE NATIONAL ALLIANCE AT ST. LOUIS.

Government Warehouses for Farm Products.

Washington, March 4th.—Last week Senator Vance introduced a bill covering identically one of the demands made by the National Alliance at St. Louis last December. It is to establish a system of government store-houses for agricultural products. The bill provides that whenever one hundred or more citizens of any county in any State, the average value of the farm products of which county for the two years next preceding shall have amounted to \$500,000 at the current prices, shall request the location of one or more government storehouses and the fact the farm products of such county shall be certified under oath by the county clerk or sheriff to the Agricultural Department, it shall be the duty of the Secretary of Agriculture to immediately cause an examination to be made to verify the representation of such citizens, and if the examination proves satisfactory then the Secretary shall at once proceed to have erected one or more Government storehouses. But as a necessary preliminary, it must be certified under oath to the Secretary that a site or sites for the store-house or storehouses have been designated by a majority of the legally qualified voters of the county at an election held for that purpose; also that at such election, by a majority vote, the legal voters selected suitable managers for the proposed storehouse. It is also required that the necessary ground for locations shall be donated to the Government by the citizens. These requirements having been complied with, the Secretary shall proceed, under laws and regulations governing the erection of public buildings, to have erected such storehouse or storehouses as have been requested. Or the Secretary in his discretion may purchase or lease suitable warehouses or buildings for the purpose. Farmers may store in such government storehouse the products of their farms as are not perishable; no perishable or imported products can be stored. It shall be the duty of the manager to issue to the farmer a warehouse receipt setting forth the quantity, quality and value of the products stored, the value to be based upon the current market prices. The manager shall in this receipt also set forth the amount of insurance, of weighing, classing and all other charges against the farm products stored. This warehouse receipt shall be negotiable. The products may be demanded at any time by the holder of the warehouse receipt, but he must remove them within eleven months from date of storage. The Secretary of Agriculture is authorized to make all necessary regulations for governing these storehouses. Senator Vance says his bill will relieve farmers. His plan is that the manager of the government storehouse shall issue to the farmer storing products, United States Treasury notes for eighty per cent of the value of products shown by warehouse receipts; that the manager of the storehouse shall be a Treasury agent, and issue these notes, taking the warehouse receipt as security, that within eleven months the farmer must redeem this receipt and his stored products, with Treasury note, and to prevent inflation of the currency, these notes must be cancelled. The farmer must pay in addition to insurance and warehouse charges one per cent per annum for the loan advanced him by the government. If he fails to redeem, his products will be sold and the proceeds paid to the National Treasury. Senator Vance believes this plan will afford great relief to Southern farmers by enabling them to hold their crops of tobacco, cotton, etc., for higher prices, and at the same time the government will be absolutely secure.

Engineers should be educated and cautious men. They should stand an examination, be licensed, and it should be an indictable offence for any other to take charge of an engine.

STARTLING EXPENDITURES.

The Government estimates for current expenses, as shown by Mr. Peters, a Representative from Kansas, in a recent speech in the House, foot up \$442,000,000. That itself is somewhat startling. But, in addition, there are schemes upon schemes. The following measures for squandering are being pressed by Republicans in Congress: Prison Pension Bill, 11,500,000; Arrears of pensions, 471,000,000; Service pension bill, 144,000,000; Dependent pension bill, 35,678,500; Dolph's fortification bill, 50,000,000; Blair bill, 87,000,000; River and Harbor bill 20,000,000.

Our Farmers' Column.

SOMETHING INTERESTING TO THOSE WHO TILL THE SOIL.

There is no material progress that is well based and permanent without agricultural progress.

INTERESTING DISCUSSIONS.

At the Farmers' Institute held in Kinston last week, there were many interesting points we learn from the Free Press brought out. Prof. Chamberlain said. He heard a cotton manufacturer say if he used the same kind of machinery now that he used 30 years ago it would bankrupt him in six months. We have to keep up with the improved methods and implements of farming, as well as do manufacturers have to keep up with the improved methods and machines in their business, to succeed. STOCK RAISING AND MANURE. The speaker spoke at length on the great advantages of raising stock. He said large stock raising is the means by which the lands of England have been redeemed in a few years from poor to the richest lands in the world. The manures produced by the cows are worth more than the milk. A horse makes about nine tons of fertilizers each year. Fifteen to twenty per cent of the manure from stock is lost by exposure. There is a loss in waiting for manure to rot, much of its strength being lost by leaching in the ground. He wanted the question of rotted or fresh manure discussed here today. The time has come for the use of less commercial and more home-made fertilizers, which must come from stock. A ton of clover hay worth \$9, if fed to cattle will produce manure worth \$8; a ton of cotton seed meal worth \$28, when fed to cattle will produce manure worth \$25.25; bran worth \$17, fed to cattle will produce manure worth \$11.17. Some allowance for waste must be made, but it is safe to calculate manure worth \$7.20 from \$9 worth of clover; \$10.55 worth of manure from \$17 worth of bran; \$22.08 worth of manure from \$28 worth of cotton seed meal. After this will you continue to buy commercial guano? One inch of rainfall gives 100 tons of water per acre. Every ton of water passed through a ton of manure carries away about 60 cents worth of plant food. Can you afford to leach the manure before carrying it to the field? \$3 worth of horse stable manure was exposed to the weather and in six months lost 42 per cent of its value, so that it was only worth \$1.74. (Continued next week.)

THE CATTLE BOT FLY.

(Special Cor. Caucasian.) CLINTON, N. C., March 1, '90. During the past few weeks the writer has heard so much complaint of the ravages of that prevalent pest of cattle, the Gad Fly, or Bot Fly, (that goes by the popular and meaningless name of "wolf"), and has heard so many inquiring for a remedy against their damages that, with your permission, Mr. Editor, he will give briefly some important facts relative to the pestilent insect for the benefit of the farmers and others interested in cattle who read THE CAUCASIAN. And right now is a most opportune time for suggesting an effective remedy. Now the pest can be easily exterminated, for on account of its habits it can be easily reached and every one of the race destroyed. The posts are now within the swellings which they make on the backs of cattle and which can be easily felt by passing the hand over the skin. The grubs may be removed by squeezing the tumors, when they will be forced out, and then be crushed. If the opening in the skin is too small it may be enlarged with the sharp point of a knife to facilitate the removal of the grub. If this is not done now, when warm weather comes the grubs will come out and drop to the ground, where they will remain until July, when they will mature into perfect flies and repeat the round of existence of their species. The fly attacks its victims in the late summer by stinging them on the back and depositing an egg in the place stung. The eggs thus deposited become small white grubs, which form an abscess under the skin, causing the secretion of puss by the irritation produced, and living upon this as their food. They grow rapidly to a large size and breathe through a hole in the skin, which always remains open. There they stay during the winter a source of constant irritation to their victims, and thereby preventing their full growth and greatly reducing the yield of milk. The fly is much like a bee in appearance and is larger than the horse-bot fly, which lays its eggs on the hair of the animal. Its attacks upon cattle may be prevented by smearing their backs with grease, with which a small quantity of crude carbolic acid has been mixed. T. J. LEE, Druggist.

WHY THERE ARE SO FEW GREAT PREACHERS.

Men of intellect and education, who are capable of enthusiasm and ardor in the service of mankind, are deterred from seeking to do that service through the christian ministry. They cannot honorably accept its doctrinal requirements and will not submit to its mental restrictions. Hence they are excluded from a calling in which they are fitted to accomplish great good for the human race. The young generation, absorbing as it grows to maturity the knowledge and the thought of the living time, the results of investigation and criticism that filter from the studies of scholars through the printing press, the public library and the reading room, and permeates the subtle medium of communication in which all society moves and lives, is repelled from religious association by dogmas which its common sense will not accept. The prediction in Victor Hugo's tale of the time of Louis XI., that the printing press would kill the church, was true of the ecclesiastical fabric of that time, which is already a curious fossil. Whether it is us of the universal Christian church depends upon whether the vitality of that body is in the integuments of creed and doctrine that have been wrapped about it, or in the enduring necessities of the human soul.—A. K. Fiske in the March Forum.

NEW ADVERTISEMENTS.

A Long Felt Want At Last Satisfied. Read the following testimonials, which are a sample of the hundreds we have received:

February 1st, 1898. Mr. J. C. Hobbs, Hobton, N. C. Dear Sir—I notice that my father, James Britt, Sr., is using your non-friction Ring for plow lines. His lines are good not fretted at all, while mine are frayed nearly in two. You will please send me two pair of your patent Ring Rings.

Very truly, JAMES BRITT, JR., Business Agent, of Bluff Alliance. CLINTON, N. C., May 21st, '88. J. C. Hobbs, Hobton, N. C. Dear Sir—I have thoroughly tested your patented attachment for holding Plow lines. I am well pleased with it. It adds ease to man and horse, and to last of lines. It affords me pleasure to recommend them favorably. Yours respectfully, R. PAGE.

25 cents per pair. 30 cents if sent by mail. For sale by Messrs. A. J. Johnson & Co., Messrs. A. Hobbs & Son, Clinton, N. C.; or J. C. HOBBS, Hobton, N. C.

Inherited Blood Poison.

How many people there are whose distress from sores, aches, pains and eruptive tendencies are due to inherited blood poison. Bad blood passes from parent to child, and it is the duty of the husband and wife to keep their
