Mammoth Bronze Turkeys! Baise Turkeys weighing from 30 to 40 pounds, and worth twice as much as common stock, by buying full-blood breeds. Address, S. H. CUDWELL, Wallace P. O., Duplin Co., N. C.

THE EDITOR'S CHAIR.

HOW THINGS LOOK FROM OUR STAND POINT.

The Opinion of The Editor and the Opinion of Others which we Can Endorse on the Various Topics of the Day.

We have already been convinced, though reluctantly, that the News and Observer was a Railroad paper; but we did not know until reading its editorial of December 23d, '90, that it was an organ of the National Bank.

All sort of subterfuges are being proposed to keep the government from issuing money direct to the people, and they all come to those friendly to the money owners. Every proposition so far contemplates either bonds or the payment of tribute to the banks. Such statesmanship will not merit the approval of the people, and if persisted, it will result at the next election in a much worse disaster than the one just passed. The people demand an increase of currency issued to them direct, without the tribute that for twenty-five years they have been compelled to pay. The party or parties who permit this demand to remain unheeded will be hurled from power never to return.

We have within the last few days received a number of communications from various Sub-Alliances in this and adjoining counties, calling upon the members of the Legislature not to support any man for the United States Senate who would not pledge himself to advocate and vote for some measure of financial relief on the Sub-Treasury plan. These resolutions were passed at the last meeting of the Sub-Alliances, and would have been published in full in this paper, had not the recent letter of Senator Vance to President Carr, stating that he would, if elected, observe and faithfully carry out the instructions of the Legislature. This settles the whole matter. The Legislature will pass instructions and then proceed to elect a Senator upon those instructions.

WHAT IS A COLD WAVE? A subscriber writes to THE CAUCASIAN for information concerning cold waves. He says that he frequently sees in the papers about a cold wave here or there, and he desires to know the condition of the temperature and atmosphere at such times. A cold wave is defined by Prof. T. Russell as a fall of temperature in twenty-four hours of twenty degrees over an area of 50,000 square miles, the temperature in some part of this area descending to thirty-six degrees. Between 1880 and 1890 no less than 691 cold waves were recorded in the United States. In the great cold wave of January 17, 1882, the fall of twenty degrees extended over an area of 1,101,000 square miles, and the fall of ten degrees included 2,929,000 square miles. In six cold waves of the ten years the area of the fall of twenty degrees was more than a million square miles. Cold waves follow a day after an area of low pressure, or occur to the southeast of an area of high pressure, reaching their greatest extent when both conditions are present.

"A MODEST REQUEST." Under the above heading the Raleigh News and Observer has the following editorial: "The Clinton Caucasian last week did us the favor to print a few lines we wrote in reply to its question. May we ask our contemporary to reproduce in its columns the following?"
