Our Farmers' Column.

SOMETHING INTERESTING TO THOSE WHO TILL THE SOIL.

"There is no material progress that is well based and permanent without agricultural progress."

BONES. Those farmers who allow animal bones to lie about the premises are neither tidy nor wise. If they cannot be broken up they should be buried near grape vines or fruit trees, the roots of which will gradually appropriate them for food.

REGULARITY ON THE FARM. Systematic feeding and care of every kind is a part of a farmer's capital that makes the best investment. The cows should be fed, milked and cared for morning, noon and night, with exactitude and on time.

PROPER CARE OF MANURE. The heap of manure ought not to have all the virtue washed out before it is wheeled out on the ground; yet this too often occurs. If there is no possibility of getting it out early, the least that can be done is to throw all up together in one large heap, making it very solid either by carting over it or by trampling.

PLANTING CORN. It is well to plant early. If frost cuts down the young plants no harm will come of it; if it kills them, it is not very great labor to plant over again.

cover: the seed very shallow. The reason for this is two-fold: First, the ground is very liable to pack, bake and crust in early spring, and when this happens the young corn often fails to get through and reach the surface, if it has much thickness of soil to come through; second, the grain requires a certain amount of heat to germinate (it will not sprout when the average temperature is below forty), and this it will get near the surface more quickly than when it is deep down—for the ground is cold in the spring, and the warming up begins at the surface and travels downward.

The question is often asked: Shall we plant home-raised seed or that from a distance? There is nothing gained by procuring seed from a distance. Corn does not deteriorate from being planted long in the same locality. Get the variety that has given the best results in your own neighborhood.

ALLIANCE NOTES, DISCUSSIONS AND THE DOINGS OF THE VARIOUS LODGES.

The CAUCASIAN was adopted as the official Organ of the Sampson County Alliance at the meeting in January 19th, 1889.

A UNION MEETING OF LODGES. Public Issues to be Discussed. All of the Sub-Alliances of Honeycutt's township, also Oak Ridge and Andrew's Chapel Lodges will meet in joint session with White Oak Lodge on Saturday, previous to the meeting of the County Alliance in April. The Union Meeting of Lodges will be called to order at 10 o'clock a. m.

A New Sewer Pipe Constructor. A sewer pipe machine is the latest to claim public attention as a Minneapolis invention, and the owners of the patents are confident that they will revolutionize sewer pipe making by its use.

The Heart Line in Palmistry. The line of the heart rises at the outer edge of the palm, and commonly about an inch below the root of the little finger.

Lord Kenyon stands at the head of the legal fraternity of balls. He once addressed a prisoner at the bar who had been convicted of stealing wine from his master's cellar in a very bombastic style, likening his crime to the most atrocious man can commit, and concluded by saying that for many years he had been "feathering his nest with his master's bottles."

La Grippe Again. During the epidemic of La Grippe last season King's New Discovery for Consumption, Coughs and Colds, proved to be the best remedy.

Consumption Surely Cured. TO THE EDITOR—Please inform me by return of mail if you have any remedy for the above named disease. By its timely use thousands of hopeless cases have been permanently cured. I shall be glad to send two bottles of my remedy gratis to any of your readers who have consumption if they will send me their express and post office address. Respectfully, T. A. SLOCUM, M. C., 281 East St., New York.
