Message Bearing Swallows. John Desbouvrie, who resides at Roubaix in France, has exhibited there fifteen swallows that he has trained after the manner of carrier pigeons. The swallows were set free, each one marked with a colored ribbon, and they dispersed in all directions. In fifteen minutes later the first one returned, and perched on one of Desbouvrie's fingers; one after another the others came back in quick succession. Desbouvrie is of the opinion that swallows are far superior to pigeons for the carrier service in time of war. Their flight is higher and swifter, and they are

more reliable, smarter and more easily They need not rest when flying long distances in order to partake of food, because they can do so on the wing.
