THE EDITOR'S CHAIR.

HOW THINGS LOOK FROM OUR STAND POINT.

The Opinion of The Editor and the Opinion of Others which we Can Endorse on the Various Topics of the Day.

The average newspaper correspondent has recently reached high water mark as a bold, reckless and malicious liar. When President Polk was recently in Kansas dispatches were sent out to this State and other parts of the country, crediting him with using language so preposterous that the most prejudiced man could scarcely give credence to it. They represented Polk as apologizing before a Kansas audience for going into the Southern army, saying that he did so only that he might help to defeat the South. No sane man believed this when it was published, and since the facts have come out all see that there was not the slightest foundation for it. The same reporters represented that some of the old Union soldiers had gotten profane at Col. Polk had during the war, and that they tried to take him from the stand and tar and feather him. This also turns out to be equally false and malicious, completely without foundation. It is humiliating to see journalism sinking to such degraded depths. The organized money power that is employing and instructing these correspondents to misrepresent the Alliance and its officers, should have their livings to tell plausible lies at least; when you see such stuff published in the "brisan press" do not be disturbed by it, simply say a week and hear the truth. And further, watch and see which papers make the corrections when the truth is presented to them—which papers make the corrections freely and candidly and gladly. Some papers make the corrections grudgingly and in an insinuating manner. They are meaner than the papers that make no corrections at all. This applies not only to the abuse of your officers, but also to the misrepresentation of your measures. Only a few days since a dispatch was sent out from Atlanta that the Georgia legislature, a majority of it being Alliance men, had refused to endorse the Ocala demands. All the papers published the report, fact and commented on it. It now turns out that the dispatch was a willful misrepresentation. Mark it! How many of the papers have made the correction, made it gladly, in the interest of truth and fair play? We say to the farmers, beware of such papers. And if this is proscription, make the most of it.

ALLIANCE MEETING Being Held in the Court House To-Day.

(Asheville Journal, October 2)
The District Alliance meeting is being held in the Court house to-day. A large number of the County Lecturers of Western North Carolina was present. Hon. Marion Butler, president of the State Farmers' Alliance of North Carolina, made a magnificent speech, which was received with much applause. Mr. J. S. Bell, State Lecturer, also made a fine and telling speech.

OVERPRODUCTION LIARS.

Of all the liars that ever infested a distressed country, the "overproduction" liars are the worst. Look at the hardworking men, women and children in the cities fishing out of the slop barrels of the rich suburbs to stay their hunger; thousands of girls selling their bodies to keep their families from starving; and we have a set of platitudinous editors who are crying "overproduction!" "We've raised so much corn, wheat and meat that we must starve! Have we manufactured so many hats, caps, boots and shoes that we must go bare headed and bare footed! There are plenty of people half dead day and night, yet in the midst of all this suffering a smiling, self-satisfied politician has the audacity to say that we have raised too much; that overproduction is ruining the country. Countries are not ruined that way. They are ruined by corruption in the affairs of government, and by the case with us to-day.—Lincoln (Neb.) State Laborer.

NORTH CAROLINA AHEAD.

North Carolina is the State of all others for rare minerals. The preface of Bulletin 74 of the United States Geological Survey for that year, dated 1881, says "a number of species have been added to the list," and that minerals formerly supposed to be rare now found abundantly and have acquired commercial importance. For example, copper, bismuth and industrial demand, North Carolina has supplied airon and manganese by the ton, and samasite by the hundred weight, and the output can be increased indefinitely. The State has also contributed to science several new specimens as yet found elsewhere, and some of those, notably among the vertebrates, are significant for the light they shed upon other associated minerals.—Manufacturers' Record.

A SUNDAY REFLECTION.

The more we read of the underlying principles of the Alliance the more we see in the spirit of the order something to admire. It is declared "we aim to elevate man by blending together more intimately the ties of brotherhood and humanity in social life, thus dissolving prejudice and selfishness in the sunlight of human love."
This is a sermon in a nutshell and no sentiments are more noble or commendable. Whenever any member of the Alliance seeks to breed prejudice and to implant hate and distrust he is not a good Alliance man. He is untrue to the teachings of his Order.—State Chronicle.

JONES AND THE CIRCUS TO COLLIDE.

Sam Jones' meetings will begin in Wilmington on October 10th. No definite date has yet been set for the Charlotte meeting, but they will probably commence in the first week in November. Some people have an idea, though, that Sam will arrange his date so as to have a collision here with the circus. Just to see how the experiment would work, Charlotte wouldn't mind having Mr. Jones and Mr. Foreman here at one and at the same time.—Charlotte News.

MASS MEETING ETC IN THE WEST.

(Editorial Correspondence.)
Salisbury, N. C., Oct. 3, '91.

We spoke with Gen. Weaver of Iowa at several of his appointments in the west last week. He is a fluent, able and convincing speaker. His power over an audience is wonderful and his defense of the position of the Alliance was unanswerable. His speeches have been much misrepresented by some newspapers. We take pleasure in saying that we endorse every sentiment to which he gave utterance. On Wednesday night he left for his home in Des Moines. On Thursday we went to Lenoir in Caldwell county, not to speak, but to organize the District Lecturer Bureau for the 8th District. However a crowd had gathered and called for a speech and we could not refuse. It was the same case at Asheville the next day where we went to organize the 9th District with State Lecturer Bell, Bureau. We organize the 7th District here to-day. The next District will be the 5th and 4th which will be organized at Greensboro and Raleigh.

We had intended to give our readers a fuller account and especially of Gen. Weaver's speeches, but for want of time must stop with these brief notes.

M. B.

We have in the South a certain class of editors who are continually crying out against the Farmers' Alliance and averring that it is splitting the Democratic Party. Do not these editors know that their continual snarling will do more in one year towards splitting the Democratic party than the Alliance will do in ten years. About a half dozen such fellows as Oates of Alabama, would be enough to kill and bury the Democratic party in short order. Oates wants to read Alliance men out of the party. Under his plan the Third Party at the South would be a certainty.—Charleston world.

ANNE BISSELL.

By AUGUSTA LARNED

CHAPTER VI.

"They've caught the thief who stole your money."

Amie went off in a hurry by rail next morning, about an hour before Dr. Tibbets came home from the city to find her gone. The house seemed strangely cold and empty and ungentle and he was glad to be called away to a scarlet fever case at Deadman's Hollow. At ten Mrs. Bissell seemed to have changed into a petrification of her former self. She looked as if she had been struck by lightning, and she was so pale and so cold and so dead that she was almost unrecognizable. She was sitting at the table, and she was looking at the clock, and she was waiting for the doctor to come. She was waiting for the doctor to come, and she was waiting for the doctor to come, and she was waiting for the doctor to come.

"No, no, you did not think I was a thief," his frank, sunny smile broke out all over his face. "The thing is too absurd. You couldn't suppose that I had stolen anything from the bureau drawer?"

"The poor woman looked so distressed he wanted to spare her. "And Miss Anne," he stammered, "did Miss Anne really steal that money?"

"No, no," protested Mrs. Bissell, stretching out her hands. "She could never think anything of your injury. What was I made for?" It is a sensible and righteous question, and the youth ought to keep on asking it until it is so fully answered that the young man or the young woman can say with as much truth as its author, though on a less expansive scale, "To this end was I born."

There is too much divine skill shown in the physical, mental and moral constitution of the ordinary human being to suppose that he was constructed without any divine purpose. If you take me out on some vast plain and show me a pillared temple surmounted by a dome like St. Peter's, and having a floor of precious stones, and arches that must have taxed the brain of the greatest draftsman to design, and walls scrolls and niches and colonnades and wainscots and painted, and I should ask you what this building was put up for, and you answered, "For nothing at all," how could I believe you?

And it is impossible for me to believe that any ordinary human being, who is in his muscular, nervous and cerebral organization more wonderful than Christopher Wren lifted in St. Paul's or Phidias ever chiseled on the Acropolis, and built in such a way that it shall last long after St. Paul's cathedral is as much a ruin as the Parthenon—that such a being was constructed for no purpose and to exercise no mission and without any divine intention toward some end. The object of this sermon is to help you to find out what you are made for, and help you find your sphere, and assist you into that condition where you can say with certainty and emphasis and enthusiasm and triumph, "To this end was I born."

WHAT YOU WERE MADE FOR.
But my subject now mounts into the incognitons. Let me say that you are made for usefulness and heaven. Judge for yourself how you are built, go into a shop where you are only one wheel turning, and that by a workman's foot on a treadle, and you say to yourself, "Here is something good being done, yet on a small scale;" but if you go into a factory covering many acres, and you find thousands of hands pulping on thousands of wheels, and slutes flying, and all the while some being widened with activities, driven by water or steam or electric power, you conclude that the factory was put up to do great work, and on a vast scale.

Now, I look at you, and if I should find that you had only one faculty of body, only one muscle, only one nerve, if you could see but could not hear, or could hear and not see, if you had the use of only one foot or one hand, and as to your higher nature, if you had only one mental faculty, and you had memory but no judgment, or judgment but no will, and if you had a soul with only one capacity, I would say not much is expected of you.

But stand up, O man, and let us look you squarely in the face. Eyes capable of seeing everything. Ears capable of hearing everything. Hands capable of grasping everything. Mind able to take any of his children's ever turned, more power than Corlies' engine ever moved. A soul that could outlive all the universe except heaven, and would outlive all heaven if the life of other humans were a moment short of the eternal. Now, what has the world a right to expect of you? What has God a right to demand of you? God is the greatest of economists in the universe, and he makes nothing uselessly, and for what purpose did he build your body, mind and soul as they are built?

There are only two things in the universe who can answer that question. The angels do not know. The schools do not know. Your kindred cannot tell.

A Powerful Sermon.

PREACHED BY DR. TALMAGE ON SUNDAY OCTOBER 4.

What Were You Made For?—An Important Question Asked and Answered.

"TO THIS END WAS I BORN."
--JOHN XVIII, 37, THE TEXT.

BROOKLYN, Oct. 4.—A most impressive scene is that witnessed in the Brooklyn Tabernacle, when at the opening of the morning service seven thousand persons on the main floor, in the two galleries and the adjoining rooms, sing the Doxology. This morning, in addition to the congregational singing, Professor Henry E. Browne rendered from the organ, "Theme and Variations" by Kramer. Dr. Talmage's text was taken from John xviii, 37, "To this end was I born."

After Pilate had said, "What art thou?" and that his body was taken out and thrown into the Rhone, and similar disturbances swept that river and its banks. Then the body was taken out and removed to Lucanum and put in a deeper pool, which immediately became the center of similar atmospheric and aqueous disturbances. Through these are fanciful and false traditions, they show the exertion with which the world looked upon Pilate. It was before this man, when he was in full life and power, that Christ was arraigned as in a court of honor and honor. Pilate said to his prisoner, "Art thou a king, then?" and Jesus answered, "To this end was I born." Sure enough, although all earth and hell arose to keep him down, he is today enshrined, enthroned and coronated king of earth and king of heaven. "To this end was I born."

That is what he came for, and that was what he accomplished.

By the time a child reaches ten years of age the parents begin to discover that the child's destiny; but by the time he or she reaches fifteen years of age the question is on the child's lips: "What am I to be? What am I going to be? What was I made for?" It is a sensible and righteous question, and the youth ought to keep on asking it until it is so fully answered that the young man or the young woman can say with as much truth as its author, though on a less expansive scale, "To this end was I born."

There is too much divine skill shown in the physical, mental and moral constitution of the ordinary human being to suppose that he was constructed without any divine purpose. If you take me out on some vast plain and show me a pillared temple surmounted by a dome like St. Peter's, and having a floor of precious stones, and arches that must have taxed the brain of the greatest draftsman to design, and walls scrolls and niches and colonnades and wainscots and painted, and I should ask you what this building was put up for, and you answered, "For nothing at all," how could I believe you?
