BY FRANK R. STOCKTON.

There was a Queen who founded, pondent Lillian W. from Umon in her capital city, a grand museum. This institution was the pride of her heart, and she devoted nearly all her time to overseeing the collection of objects for it, and their arrangement times does the word girl occur in the in the spacious hall. This museum was intended to elevate the intelligence of her people, but the result was quite disappointing to the Queen. For some reason, and what it was she could not imagine, the people were not interested in her museum She considered it the most delightful place in the world, and spent hours every day in examining and studying the thousands of objects it contained; but although here and there in the city there was a person who care I to much success, I am Yours visit the collection, the great body or the people found it impossible to feel the slightest interest in it. At first this grieved the Queen, and she tried to make her museum better; but as this did no good, she became very angry, and she issued a decree that all persons of mature age who were not interested in her museum should be sent to prison.

This decree produced a great sensation in the city. The people crowded to the building, and did their very best to be interested; but, in the majority of cases, the attempt was an utter failure. They could not feel any interest whatever. The consequence was that hundreds and thousands of the people were sent to prison, and as there was not room enough for them in the ordinary jails, large temporary prisons were erected in various parts of the city. Those who were actually needed for work or service which no one else could do were allowed to come out in the day-time on parole; but at night they had to return to their prisons.

It was during this deplorable state of affairs that a stranger entered the city one day. He was surprised at saw a very respectable-looking citi- 1845. I will ask two questions.
