He is not a socialist, nor even a Populist, yet the following paragraph shows that he has adopted the most radical plank in the platform of the most extreme social revolutionist:

submission to a schedule is slavery. Liberty is upon the will of another for shelter, clothing and food cannot be a free man in the broad full meaning of that word. Freedom does not alienable rights of every human being makes no man independent. The right to liberty is an empty mockery and delusion unless the power to be free exists also. It is only when he comes to consider the causes for conditions which he deplores that Mr. Ingalls shows his weakness. Then one understands that he must travel a little longer this road, which is new to him, before he is able to decipher all its sign posts. Without attributing other cause for existing conditions than that the freemen of this country have not used the ballot wisely, he declares as fallacious the claim that extreme wealth is the cause of extreme poverty. By this he means that the rich do not become rich at the expense of the

There is no necessity for repeating the ruths upon this point so familiar to conomic students. Until Mr. Ingalls recognizes the logical fact that no one can drain abnormal riches from the wealth jointly created without depriving others of a portion of their share, and couples that fact with his knowledge that the possessors of great wealth use their possessions to squeeze all they can out of the less fortunate, he will continue to stumble along the stony pathway, not understanding from whence came the impediments to his progress nor how to get rid of them. He can see how the peculations of one man in a business concern may make him rich while it impoverishes his partners, but he is unable to apply this parallel to society, which is only a huge business con-

particular. He says: benefits of society depends upon legislation, institutions and government, then under a system wealth results from unjust laws and poverty from legislative oppression, the remedy is in the hands of the victims. If they suffer, it is from self inflicted wounds.

The workingmen of this country, the poor and oppressed, have the ballot, and if they would use it in their own interests they could obtain their rights and poverty be abolished. A peaceful revolution is not only possible, but with united action upon the part of those who are the victims of vicious legislation nothing under the heavens could prevent the change for the better. Look at the situation in Germany, a country in which the common people have nothing like the opportunities ever open here.
