tendant upon the inception and in-

troduction of the bill, Mr. Bryan

said it was an unprecedented repu-

diation of the principles of the

Democratic government. No declaration in favor of the annihilation of greenbacks had been made by any party or President and yet, immediately after the late elections the most remarkable in many respects the country had ever seen, the party in charge of this Congress proposed to surrender, in the last hours of their possession of power the control of our banking and currency system to the banks, by a measure that includes the prohibition of greenbacks. There was absolutely no excuse for the bill, said Mr. Bryan. Its introduction at this time could not be defended unless it would afford a remedy for the evil complained of. The reason given by its friends and time at school, whenever nobody was promoters for bringing it into the House was that the exigencies of the Treasury demand it; that the Treasury is being drained of gold by the just know she's goin' to give me an aw- exchange of greenbacks therefrom ful goin' over for standin' round here But the bill did not provide even a foolin' with you. When that was done, if it was ever done, the trouble would still exist, for the silver certificates would still remain and they must be redeemed in gold on demand. The gentleman from Connecticut (Mr. Sperry) admitted at the close of his speech the other day that the situation demanded the funding not only of the greenbacks, but also a portion of the silver certificates. Mr. Bryan de nounced the bond issue as a conspiracy against the government, justing the movement of gold from the Treasury between the dates of advertising for bids of the last issue of bonds and of the delivery of the last lot of bonds as proof of his agsertion. "If we had brave Andrew Jackson in the White House now, he would rise in his might and say: By the Eternal! the rights of the people are dearer than those of Wall Street.
