POWER OF "MONEY" POWER

t Track of the Scheme Illustrated by the Circulars Covering a Period of More Than Thirty Years The Banks Always the Paramount Interest.

The Catteastan and all of there form papers have from time to timebave asserted that the pr sent financial system of this country is one for which money lenders and speculators have been scheming for many years past. It has not been long since the old Sherman secretly and sneakingly hand, and forsted a great debt on the people a debt for which interest must be paid for thirty years.

It has not been long since the old who talked about "Wall street;" and yet they themselves are talking about

They tried as long as they could to keep the people from knowing what was going on, and they succeeded for a long time; for the people trusted their leaders were generally bought tools of the money power. But the people have been thinking. They have grown suspicious, and the open and brazen deception of the past two years has awakened them as nothing else

Now, in connection with their thinking let them read the same noted bank circulars, which were secretly issued, but which have become public, and they can see that the great scheme of the shylocks was thoroughly planned, and has already been too successful up to this time. Let the people also remember that the shylocks are still trying to push their great scheme to completion-which scheme is to make the masses of the people the slaves

of gold. Here are the circulars: The first one was issued by London and New York bankers in 1862.
